

# **P.S.R. ENGINEERING COLLEGE**

(An Autonomous Institution, Affiliated to Anna University, Chennai)

**Sevalpatti (P.O), Sivakasi – 626140.**

## **B.E Civil Engineering**

**U.G  
Regulations 2019**

## **Department of Civil Engineering**

**CANDIDATES ADMITTED DURING 2019-2020 AND ONWARDS**

# **P.S.R. ENGINEERING COLLEGE**

(An Autonomous Institution, Affiliated to Anna University, Chennai)

**Sevalpatti (P.O), Sivakasi – 626140.**

**B.E. Civil Engineering**

**U.G  
Regulations 2019**

**Department of Civil Engineering**

**CANDIDATES ADMITTED DURING 2019-2020 AND ONWARDS**

**DEPARTMENT OF CIVIL ENGINEERING****VISION**

- The vision of the Civil Engineering Department is to produce the Civil Engineers to meet the dynamic problems in the society with human values.

**MISSION**

- To provide high-class engineering education.
- To join hands with organizations to provide training and internship.
- To facilitate the students for research and development.
- To deliver good Civil Engineering graduates with human values.

**PROGRAM OUTCOMES (PO's) OF CIVIL ENGINEERING**

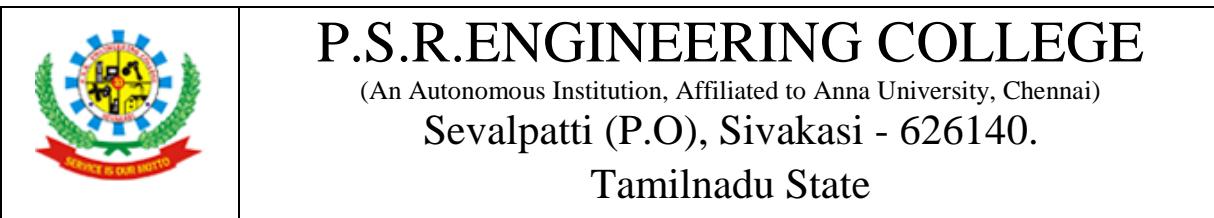

The Program Outcomes of B.E in Civil Engineering are:

1. Apply knowledge of mathematics, physical sciences and Civil Engineering fundamentals.
2. Able to identify, formulate, analyze and solve for Civil Engineering problems.
3. Able to design and realize civil structures to meet desired needs within practical constraints such as economical, environmental, social, political, ethical, health and safety, manufacturability and sustainability.
4. Able to investigate and conduct experiments, as well as to analyze and interpret data.
5. Use of techniques, skills and modern engineering tools necessary for engineering practice
6. Contextual knowledge to assess societal, health, safety, legal and cultural issues related to Engineering.
7. Realize the impact of Civil Engineering solutions in a global, economic and environmental context.
8. Apply ethical principles and commitment to professional ethics and responsibility.
9. Function as an individual and as a member or leader in multidisciplinary teams.
10. Communicate effectively with the engineering community and society at large.
11. Knowledge and understanding of management and business practices and their limitations.
12. Recognize the need and have the ability to engage in life-long learning.

**PROGRAMSPECIFIC OUTCOMES (PSO's) OF CIVIL ENGINEERING**

The Program Specific Outcomes of B.E in Civil Engineering are:

1. Proficiency in Civil Engineering problem identification, formulation, analysis, design, execution and safety using appropriate tools.
2. Solve problems in the hydraulics, transportation geotechnical and Surveying disciplines of Civil Engineering with competence in modern tool usage.
3. Apply modern construction techniques, equipment and management tools so as to complete the project within specified time and funds.
4. Graduates will have a broad understanding of economical, environmental, societal and health involved in infrastructural development and ability to function within multidisciplinary teams.

## 1. PRELIMINARY DEFINITIONS AND NOMENCLATURE

In these Regulations, unless the context otherwise requires:

- i) **“Programme”** means Under Graduate Degree Programme (B.E./B.TECH)
- ii) **“Branch”** means specialization or discipline of B.E./B.TECH Degree Programme like “Mechanical Engineering”, “Computer Science and Engineering”, etc.
- iii) **“Course”** means Theory or Practical subject that is normally studied in a semester, like Digital Electronics, Engineering Graphics, etc.
- iv) **“Head of the Institution”** means the Principal of a College / Institution who is responsible for all academic activities of the College / Institution and for implementation of relevant Rules and Regulations.
- v) **“Head of the Department”** means Head of the Department concerned.
- vi) **“Controller of Examinations”** means the Authority of the College who is responsible for all activities of the Examinations.
- vii) **“University”** means ANNA UNIVERSITY.
- viii) **“College”** or **“Institution”** means P.S.R. Engineering College.

## 2. ELIGIBILITY FOR ADMISSION

Students for admission to the first year of the four year B.E / B.Tech Degree programme shall be required to have passed.

- i) The higher secondary examination (academic stream) conducted by the Government of Tamilnadu with Mathematics, Physics and Chemistry (OR)
- ii) The higher secondary examination(Vocational stream offering the vocational groups of Engineering and Technology) conducted by the Government of Tamilnadu (OR)
- iii) An examination of any university or authority, accepted by the Anna University as equivalent thereto
- iv) Any other examinations as notified by the Government of Tamilnadu

Students for admission to the second year (Third Semester) of the four year B.E / B.Tech Degree programme shall be required to have passed.

Diploma in Engineering / Technology conducted by the Directorate of Technical Education and

Any other conditions as notified by the Government of Tamilnadu

### 3. PROGRAMMES OFFERED

A student may be offered admission to any one of the programme of study approved by the AICTE and University. The medium of instruction is English. The following programmes are offered in this college:

1. B.E-Electronics and Communication Engineering
2. B.E-Computer Science and Engineering
3. B.E-Electrical and Electronics Engineering
4. B.E-Mechanical Engineering
5. B.E-Civil Engineering
6. B.TECH-Bio-Technology
7. B.E – Biomedical Engineering

### 4. STRUCTURE OF THE PROGRAMMES

#### 4.1 Categorization of Courses

B.E. / B. Tech. Programme will have a curriculum with syllabi consisting of theory and practical courses that shall be categorized as follows:

- i) **Humanities and Social Sciences (HS)** courses include English, Professional Ethics, Communication skills, Management courses.
- ii) **Basic Sciences (BS)** courses include Mathematics, Physics, Chemistry, etc.
- iii) **Engineering Sciences (ES)** courses include Engineering Workshop, Engineering Graphics, Basics of Electrical / Electronics / Mechanical / Computer Engineering, etc.
- iv) **Professional Core (PC)** courses include the courses relevant to the chosen specialization/branch
- v) **Professional Elective (PE)** courses include the elective courses relevant to the chosen specialization/ branch.
- vi) **Open Elective (OE)** courses include the courses relevant to the chosen specialization / branch which a student can choose from the curriculum of other B.E. / B. Tech. programmes.
- vii) **Project (PROJ)** Project Work as prescribed in the curriculum and syllabus
- viii) **Employability Enhancement Courses (EEC)** includes Seminar, Internship in industry or elsewhere, Industrial/Practical Training, Value Added Courses.
- ix) **Mandatory Courses (MC)** includes Environmental Sciences, Induction Programme, Indian Constitution, Essence of Indian Knowledge Tradition

#### 4.2 **Induction Programme**

Every student admitted in to the first year of the B.E. / B.Tech programme have to undergo a three weeks mandatory induction programme of the Institution. The three weeks induction programme will cover the following as per the guidelines of AICTE and Anna University:

- Physical activity
- Creative Arts
- Universal Human Values
- Literary
- Proficiency Modules
- Lectures by Eminent People
- Visits to local Areas
- Familiarization to Dept./Branch & Innovations

#### 4.3 **Personality and Character Development**

The students shall enroll in any one of the personality and character development programmes

- National Service Scheme (NSS) - will have social service activities in and around the college/institution.
- Youth Red Cross (YRC) - will have activities related to social service in and around college/institution.
- Red Ribbon Club (RRC) - will have activities to improve health awareness among the people in and around the college campus.
- Indian Society for Technical Education (ISTE) - will have activities to improve students' technical skill and career development.
- Institution of Electrical and Electronics Engineers (IEEE) - will have activities to enhance professional students' innovative skill.
- Department Association - will have activities to improve students' technical skill and personality development.
- Sports / Games, etc.

#### 4.4 **Industrial Training / Internship**

The students have to undergo minimum two weeks duration Industrial Training / Internship during summer / winter vacation at Research Organizations, Industries and / or at the Institution itself with due approvals of the HOD and Principal. The duration of Industrial training / Internship may be in parts or continuously during the course of study.

#### 4.5 **Industrial Visit**

Every student is required to undergo one industrial visit, starting from the second year of the programme. The Heads of Departments shall ensure that necessary arrangements are made in this regard.

### **5. DURATION OF THE PROGRAMMES**

- 5.1 A student is normally expected to complete the B.E. / B.Tech. Programme in 4 years (8 Semesters) but in any case not more than 8 years (16 Semesters). In the case of Lateral entry students, it is not more than 7 years (14 semesters) from the date of admission to the course, even if the candidate discontinues and rejoins subsequently.
- 5.2 Each semester shall normally consist of 90 teaching days (including examination days). The Head of the Department shall ensure that every faculty member imparts instruction as per the number of periods specified in the syllabus covering the full content of the syllabus for the course being taught.
- 5.3 The total duration for completion of the programme reckoned from the commencement of the first semester to which the student was admitted shall not exceed the maximum duration specified in clause 5.1 irrespective of the period of break of study (vide clause 18) or prevention (vide clause 7.3) in order that the student may be eligible for the award of the degree (vide clause 13).

### **6. COURSE REGISTRATION AND REAPPEARANCE REGISTRATION**

- 6.1 The students on admission have to register and study the courses prescribed in the curriculum in the student's first Semester of study.
- 6.2 Each student shall be assigned to a Faculty Advisor who shall advice and counsel the student about the details of the academic programme and the choice of courses considering the students' academic background and career objectives from second semester onwards.
- 6.3 Every student shall enroll / register for the course of the semester as notified by the Principal. However, the student shall confirm the enrollment by registering for the courses within the first three working days or as per the direction of the Principal after the commencement of the concerned semester.
- 6.4 If the student wishes, the student may drop or add courses (from III to VIII semesters only) within three working days or as per the direction of the Principal after the commencement of the concerned semester and complete the registration process duly authorized by the Faculty Advisor. Total number of credits of such courses cannot exceed 3. However the maximum number of credits the student can register in a

- particular semester cannot exceed 36 credits (including courses for which the student has done reappearance registration).
- 6.5 No course shall be offered by a Department unless a minimum of 10 students register for that course.
  - 6.6 The student shall register for the project work in the semester as specified in the curriculum.
  - 6.7 After registering for a course, a student shall attend the classes, satisfy the attendance requirements, earn Continuous Assessment marks and appear for the End Semester Examinations.
  - 6.8 If a student fails in a theory course, the student shall do reappearance registration compulsorily for that course in the subsequent semester. The student can optionally earn Continuous Assessment marks and attend End Semester examination, in such case latest Assessment marks will only be valid.  
The student may attend the classes for the reappearance registration Courses, if the student wishes. The attendance requirement (vide clause 7) is not compulsory for such courses.
  - 6.9 A student who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of letter grades / marks.
  - 6.10 If the theory course, in which the student has failed, is a Professional Elective or an Open Elective, the student may register for the same or any other Professional Elective or Open Elective Course respectively in the subsequent semesters. Such changes can be done only with due approval by Head of the Department.
  - 6.11 The student who fails in any Laboratory Course/ Project work / Seminar shall register for the same in the subsequent Semester and reappear for the End Semester Examinations.
  - 6.12 If a student is prevented from writing end semester examination of a course due to lack of attendance, the student has to register for that course again, when offered next, attend the classes and fulfill the attendance requirements as per Clause 7. If the course, in which the student has lack of attendance, is a Professional Elective or an Open Elective, the student may register for the same or any other Professional Elective or Open Elective Course respectively in the subsequent Semester of Study.

## **7. ATTENDANCE REQUIREMENTS FOR APPEARING SEMESTER EXAMINATION**

A student who has fulfilled by the following conditions shall be deemed to have satisfied the requirements for appearing end semester examination of a particular course.

- 7.1 A student will be permitted to appear for the end semester examination of a course,

only if he/she secures not less than 75% of attendance taking into account the number of periods required for that course as specified in the curriculum.

- 7.2 If a student secures attendance between 65% and less than 75% in any course in the current semester of his / her studies due to medical reasons (hospitalization / accident / specific illness) or due to participation in the College / University / State / National / International level Sports events with prior permission from the Head of the Department concerned and Principal. The student shall be given exemption from the prescribed attendance requirement and the student shall be permitted to appear for the end semester examination of that course. In all such cases, the students should submit the required documents on joining after the absence.
- 7.3 Students who do not satisfy clause 7.1 and 7.2 and who secure less than 65% attendance in a course will not be permitted to write the End-Semester Examination of that course. The student has to register and repeat this course in a subsequent semester when it is offered next.
- 7.4 In the case of reappearance registration for a course, the attendance requirement as mentioned in Clauses 7.1 - 7.3 is not applicable. However, the student has to register for examination in that course by paying the prescribed fee.

## **8. ASSESSMENT PROCEDURE FOR AWARDING MARKS**

All B.E. / B.Tech. Programmes consist of Theory Courses, Practical Courses and Employability Enhancement Courses. Appearance in End Semester Examination is mandatory for all courses including Theory, Practical and Project work. Performance in each course of study shall be evaluated based on (i) Internal Assessments throughout the semester and (ii) End Semester Examination at the end of the semester. Each course shall be evaluated for a maximum of 100 marks as shown below:

Category	Internal Assessment	End Semester Examination
Theory Courses	30	70
Theory Cum Practical Courses	30	70
Practical Courses	30	70
Project Work	30	70
Mandatory Courses (Non-Credit)	100	Nil

### **8.1 Internal Assessment For Theory Courses**

The criteria for determining the internal assessment marks are:

i) **Internal Tests [60% weightage]**

Three tests each carrying sixty (60) marks shall be conducted for theory part by the department / Institution. The marks obtained in best of two tests shall be reduced to 60 marks and rounded to nearest integer. Retest at the discretion of the head of the department may be conducted for the deserving candidates.

ii) **Assignment or Mini project [20% weightage]**

A student has to carry out either an assignment or mini project.

- An assignment normally requires work of average 5 to 6 hours of study and written work of average 5 to 6 hours which has to be submitted to the course tutor for evaluation.
- A mini project shall be in hardware or software. The student has to submit a report before the end of the semester. Mini project will be assessed based on the model presentation and report as decided by the department.

iii) **Seminar [10% weightage]**

Seminar may be considered for the courses as per the feasibility and decision of the HoD. In this case, the student has to make seminar on the topics related to the course. The seminar will be assessed by the course tutor with common parameters as described by the department and included in the internal assessment. If seminar is not considered, weightage of Assignment or Mini-Project (sec 8.1 (ii) ) shall be 30%.

iv) **Attendance [10% weightage]**

(refer clause 8.5)

## 8.2 Internal Assessment For Practical Courses

Every practical exercise / experiment shall be evaluated based on conduct of exercise / experiment and records maintained. There shall be at least one test. The criteria for determining the internal assessment marks are:

Experiment / Record / Average	
Practical classes' performance:	60% weightage
Practical Test:	30% weightage
Attendance (refer clause 8.5):	10% weightage

## 8.3 Internal Assessment For Theory Cum Practical Courses

i) **Internal Tests for Theory Part [50% weightage]**

Three tests each carrying sixty (60) marks shall be conducted for theory part by the department / Institution. The marks obtained in best of two tests shall be reduced to 40 marks and rounded to nearest integer. Retest at the discretion of the head of the department may be conducted for the deserving candidates. Assignment is allotted 10 marks.

ii) **Continuous Assessment for Practical Part [40% weightage]**

Every practical exercise / experiment shall be evaluated based on conduct of exercise / experiment and records maintained. The criteria for determining the Continuous Assessment for Practical Part are:

Observation and Record: 20% weightage

Lab Exam : 20 % weightage

iii) **Attendance [10% weightage]**

#### 8.4 Internal Assessment For Project Works

There shall be three assessments during the semester by a review committee. The students shall make presentation on the progress made before the committee. The criteria for arriving the internal assessment marks for the project work evaluated for 30 marks are:

Work assessed by the Project Guide: 50% weight

Assessment by an internal review committee: 50% weight

#### 8.5 Internal Assessment For Mini Project Works

A mini project shall be in hardware or software. The student has to submit a report before the end of the semester. Mini project will be assessed based on the model presentation and report as decided by the department.

#### 8.6 Internal Assessment For Mandatory Courses (Non-Credit)

The courses under Mandatory are evaluated by Continuous Assessments only. The Course Committee (vide clause 16) shall devise a common evaluation procedure.

In all the above cases, marks awarded for **100** shall be reduced to **30**.

#### 8.7 Awarding Marks for Attendance

% of Attendance	Below 75	75	76-80	81-85	86-90	Above 90
-----------------	----------	----	-------	-------	-------	----------

Marks	0	2	4	6	8	10
-------	---	---	---	---	---	----

The student on doing reappearance registration has to appear for the assessments along with the current batch of students and earn internal assessment marks again.

## 9. PASSING REQUIREMENTS

- For each subject the examination will be conducted for 100 marks. A candidate who secures not less than 50% of the total marks in the end semester examinations and internal assessment put together in both theory and practical courses, including project work, subject to securing a minimum of 50% in the end-semester examination, wherever applicable, shall be declared to have passed the examination in that subject.
- When the mark secured for 100 in end-semester examination is converted to 70, minimum 35 marks must be secured for pass.
- If any programme, during any semester, conducts the laboratory in two parts, say Part A and Part B, a candidate should register and appear for both parts in the end semester practical examination. If a candidate for any reason is absent in any one part of the practical examination, despite his/her presence in the other part, he/she is declared as fail in both parts A and B (marked as absent in end semester examination) and should appear again for both part A and B in the next attempt.
- For a pass, a candidate should secure a minimum of 50% in each part and final mark secured is the sum of marks secured in Part A and B.

## 10 AWARD OF LETTER GRADES

The performance of a student will be reported using letter grades, each carrying certain points as detailed below:

Marks Scored	Letter Grade	Grade Points	Description
90 - 100	O	10	Outstanding
80 - 89	A +	9	Excellent
70 - 79	A	8	Very Good
60 - 69	B +	7	Good
50 - 59	B	6	Above Average
0 - 49	RA	0	Reappearance
Absent	AB	0	-
Shortage of	SA	0	-

Attendance			
Withdrawal	W	0	-

‘RA’ denotes Reappearance registration is required for that particular course.

‘SA’ denotes shortage of attendance (as per Clause 7) and hence prevented from writing end semester examination.

## 11 GPA AND CGPA CALCULATION

11.1 After results are declared, Grade Sheets will be issued to each student which will contain the following details:

- the list of courses registered during the semester and the grades scored.
- the Grade Point Average (GPA) for the semester and
- the Cumulative Grade Point Average (CGPA) of all courses registered from first semester onwards.

During each semester, the list of courses registered and the grades scored in each course are used to compute the Grade Point Average (GPA). GPA is the ratio of the sum of the products of the number of credits of courses registered and the grade points corresponding to the grades scored in those courses, taken for all the courses, to the sum of the number of credits of all the courses in the semester.

$$GPA = \frac{\sum_{i=1}^n C_i GP_i}{\sum^n C_i}$$

Where,

C<sub>i</sub> - is the Credits assigned to the course

G<sub>Pi</sub> - is the grade point corresponding to the letter grade obtained for each course

n - is number of all Courses successfully cleared during the particular semester in the case of GPA and during all the semesters in the case of CGPA.

CGPA will be calculated in a similar manner, considering all the courses enrolled from first semester. “RA” and “SA” grades will be excluded for calculating GPA and CGPA.

11.2 If a student studies more number of electives (PE/OE) than required as per the student’s programme curriculum, the courses with higher grades alone will be considered for calculation of CGPA.

## **12 EXAMINATION PROCEDURE**

End Semester examination shall be conducted by the office of the Controller of Examination of the College as per the prescribed rules and regulation on examinations of the college.

### **12.1 Issue of Mark Sheet**

Individual mark sheet for each semester will be issued to the students, through the head of the department concerned, after the publication of the result. The mark sheet will contain credit, grade, grade point and result status for the course concerned.

### **12.2 Malpractice**

If a student indulges in malpractices in any of the end semester examination, he/she shall be liable for punitive action as prescribed by the Anna University, Chennai from time to time.

### **12.3 Revaluation**

- i) Copies of answer script for the theory course(s) can be obtained from the Office of the Controller of Examinations on payment of a prescribed fee specified for this purpose through proper application.
- ii) A candidate can apply for revaluation of his/her examination answer paper in a theory course, within a week from the declaration of results, on payment of a prescribed fee through proper application to the Office of the Controller of Examinations, as per the prescribed norms of the College. Revaluation is not permitted for practical course and for project work.
- iii) Re totaling is permissible for all arrear and current theory courses.

### **12.4 Challenging Valuation**

In case the student is not satisfied with the outcome of the revaluation the student can apply for ‘Challenge Valuation’. The highest marks obtained by the student in all of the above will be considered for grading.

## **13 ELIGIBILITY FOR THE AWARD OF DEGREE**

A student shall be declared eligible for the award of the B.E/B.Tech. degree provided the student has

- i) Successfully gained the required number of total credits as specified in the curriculum corresponding to the student’s programme within the stipulated time.
- ii) Successfully completed the course requirements and has passed all the prescribed examinations in all the 8 semesters within a maximum period of 8 years from the commencement of first semester to which the student was admitted.

- iii) In the case of lateral entry, the student successfully completed the course requirements and has passed all the prescribed examinations in all the 6 semesters within a maximum period of 7 years from the commencement of third semester to which the student was admitted.
- iv) Approval by the University for the award of degree.

## 14 CLASSIFICATION OF DEGREE

### 14.1 First Class With Distinction

A student who satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:

- Should have passed the examination in all the courses of all the eight semesters in First Appearance within five years, which includes authorized break of study of one year. Withdrawal from examination (vide Clause 17) will not be considered as an appearance.
- Should have secured a CGPA of not less than 8.50
- Should NOT have been prevented from writing end semester examination due to lack of attendance in any of the courses.

### 14.2 First Class

A student who satisfies the following conditions shall be declared to have passed the examination in First class:

- Should have passed the examination in all the courses of all eight semesters within six years, which includes one year of authorized break of study (if availed) or prevention from writing the End Semester Examination due to lack of attendance (if applicable).
- Should have secured a CGPA of not less than 7.00

### 14.3 Second Class

All other students (not covered in clauses 14.1 and 14.2) who qualify for the award of the degree (vide Clause 12) shall be declared to have passed the examination in **Second Class**.

### 14.4

A student who is absent in semester examination in a course/ project work after having registered for the same shall be considered to have appeared in that examination (except approved withdrawal from end semester examinations as per clause 17) for the purpose of classification.

## 15 FACULTY ADVISOR

To help the students in planning their courses of study and for general advice on the

academic programme, the Head of the Department of the students will attach a certain number of students to a faculty of the Department who shall function as Faculty Advisor for those students throughout their period of study. The Faculty Advisor shall advise the students in registering and reappearance registering of courses, authorize the process, monitor their attendance and progress and counsel them periodically. If necessary, the Faculty Advisor may also discuss with or inform the parents about the progress / performance of the students concerned.

The responsibilities for the faculty advisor shall be:

- To inform the students about the various facilities and activities available to enhance the students' curricular and co-curricular activities.
- To guide student enrollment and registration of the courses.
- To authorize the final registration of the courses at the beginning of each semester.
- To monitor the academic and general performance of the students including attendance and to counsel them accordingly.

## **16 COURSE COMMITTEES**

### **16.1 Common Course Committee**

A theory course handled by more than one faculty member shall have a "Common Course Committee" comprising of all faculties teaching that course and some students who have registered for that course. There shall be two student representatives from each batch of that course. One of the faculty members shall be nominated as Course Coordinator by the Head of the Department duly approved by the Principal.

The first meeting of the Common Course Committee shall be held within fifteen days from the date of commencement of the semester. Two or three subsequent meetings in a semester may be held at suitable intervals. During these meetings, the student members shall meaningfully interact and express their opinions and suggestions of all the students to improve the effectiveness of the teaching-learning process. It is the responsibility of the student representatives to convey the proceedings of these meetings to the whole batch.

In addition the faculty members of a Common Course shall meet to ensure uniform evaluation of continuous assessments and prepare a common question paper for the continuous assessment tests after arriving at a common scheme of evaluation for the assessments (vide clause 8). The question paper for the end semester examination is common.

## **16.2 Multiple Courses Committee**

If course(s) handled by a single faculty member, there will be “Multiple Courses Committee”. This committee comprises of all the above faculty members and two student representatives from each course. One of the above faculty members, nominated by the Head of the Department shall coordinate the activities of this committee.

The functions of this committee is similar to that of the common course committee, which is as follows:

The first meeting of the Multiple Courses Committee shall be held within fifteen days from the date of commencement of the semester. Two or three subsequent meetings in a semester may be held at suitable intervals. During these meetings, the student members shall meaningfully interact and express their opinions and suggestions of all the students to improve the effectiveness of the teaching-learning process. It is the responsibility of the student representatives to convey the proceedings of these meetings to all the students.

## **16.3 Overall Monitoring Committee**

In addition, there shall be a overall monitoring committee for each semester of a programme which comprises of (i) the Course Coordinators / Course Faculty (as applicable), and (ii) Head of the Department. This overall monitoring committee shall meet periodically to discuss academic related matters, progress and status of the students of the semester concerned.

The overall monitoring committee can invite the Faculty Advisors or students for any of the committee meetings if necessary.

# **17 PROVISION FOR WITHDRAWAL FROM EXAMINATION**

- 17.1 A student may, for valid reasons, (medically unfit / unexpected family situations / National / International sports) be granted permission to withdraw from appearing for the end semester examination in any course or courses in **ANY ONE** of the semester examinations during the entire duration of the degree programme. The application shall be sent to Principal, through HOD with required documents.
- 17.2 Withdrawal application shall be valid only if the student is otherwise eligible to write the examination (Clause 7) and if it is made a week before the commencement of the end semester examination in that course or courses and also recommended by the

Head of the Department.

- 17.3 Withdrawal shall not be considered as an appearance for deciding the eligibility of a student for First Class with Distinction.
- 17.4 Withdrawal is permitted for the end semester examinations in the final semester only if the period of study the student concerned does not exceed 5 years as per clause 14.

## **18 TEMPORARY BREAK OF STUDY FROM A PROGRAMME**

- (i) A student is not normally permitted to temporarily break the study. However if a student intends to temporarily discontinued the programme in the middle for valid reasons (such as accident or hospitalization due to prolonged ill health) and to rejoin the programme in a later than the last date for registering for the semester examinations of the semester in question, through the head of the department starting the reasons thereof.
- (ii) The student permitted to rejoin the programme after the break shall be governed by the rules and regulations in force at the time of rejoining.
- (iii) The duration specified for passing all the course for the purpose of classification vide clause 14 shall be increased by the period of such break of study permitted.
- (iv) The period for completion of the programme reckoned from, the commencement of the first/third semester to which the candidate was admitted shall not exceed the maximum period specified in clause 8(iii) irrespective of the period of break of study in order that he/she may be eligible for the award of the degree (vide clause 13).
- (v) If any student is detained for want of requisite attendance, progress and good conduct, the period spent in that semester shall not be considered as permitted ‘break of study’ and clause 19(iii) is not applicable for this case.

## **19 RANK OF STUDENT**

A student who qualifies for the degree by passing the examination in all subjects of the entire course in first attempt within a period of four (three for lateral entry) consecutive academic years from the date of admission to the course can be given his/her position in the class as rank. The rank is determined from III semester to VIII semester examination CGPA. Student transferred from other institution to P.S.R. Engineering College are not eligible for rank.

## **20 PROCEDURE FOR USING SCRIBER**

If a student is physically handicapped (in case of accidents/ill health) at the time of examination, he/she may be permitted to use a scribe to write the examination. In such case

30 minutes, extra time will be permitted. The scribe shall be a non-engineering student/graduate.

## **21 DISCIPLINE**

Every student is required to observe disciplined and decorous behavior both inside and outside the college and not to indulge in any activity, which will tend to bring down the prestige of the college. If an act of indiscipline reported, the principal shall constitute a disciplinary committee consisting of three senior faculty members / HODs of which one should be from the faculty of the student, to inquire into acts of indiscipline. The disciplinary action is subject to review by the Principal in case the student represents to the Principal. Any expulsion of the student from the college shall be with prior concurrence from directorate of technical education / university.

## **22 RESPONSIBILITIES OF A COURSE TUTOR**

- Every course tutor member is required to maintain an ‘Attendance and Assessment Record’ for every semester which consists of attendance marked in each Theory / Practical / Employability Enhancement, the assessment marks and the record of class work (topics covered), separately for each course handled by them. This should be submitted to the Head of the Department periodically (at least three times in a semester) for checking the syllabus coverage and the records of assessment marks and attendance. The Head of the Department will affix his/her signature and date after due verification.
- At the end of the semester, the record should be verified by the Head of the Department who shall keep this document in safe custody (for eight years).
- The records of attendance and assessment of both current and previous semesters should be available for inspection.
- The assessments on Course Outcomes (CO), Programme Outcomes (PO) and Programme Educational Objectives also should be carried out and submitted to Programme Coordinator / HOD.

## **23 REVISION OF REGULATION AND CURRICULUM**

The College may from time to time revise, amend or change the Regulations, Curriculum, Syllabus and Scheme of examinations through the Academic Council of the College.

## **24 ANY OTHER RULES AND PROCEDURE**

Any other rules and procedure which are not covered under the above clauses shall be discussed and framed by the Standing Committee of the college. Implementation of the

Standing Committee resolutions is based on the approval / ratification by the Academic Council / Board of Management.

<b>191HS11</b>	<b>COMMUNICATIVE ENGLISH</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>2</b>
<b>Programme:</b>	<b>B.E./B.Tech. (Common to all Branches)</b>	<b>Sem:</b>	<b>I</b>
<b>Prerequisites:</b>	Acquire Language proficiency.	<b>Category:</b>	<b>HSMC</b>
<b>Aim:</b>	To acquire basic Language Skills in order to communicate with English Language Speakers		
<b>SHARING INFORMATION RELATED TO ONESELF, FAMILY AND FRIENDS</b>			<b>6</b>
<p><b>Reading</b> – Short comprehension passages, Practice in skimming and scanning. <b>Writing</b> – Sentence structures, Developing Hints. <b>Listening</b> – Short texts, Short formal and informal conversations. <b>Speaking</b> – Introducing oneself, Exchanging personal information. <b>Language Development</b> – WH questions, Asking and answering YES or NO questions, Parts of Speech. <b>Vocabulary Development</b> – Prefixes &amp; Suffixes, Subject verb Agreement.</p>			
<b>GENERAL READING AND FREE WRITING</b>			<b>6</b>
<p><b>Reading</b> – <b>Comprehension</b> – Pre-reading &amp; Post-reading. Comprehension questions (Multiple choice questions, Short questions, Open-ended questions), Short narratives and Descriptions from Newspapers including Dialogues. <b>Writing</b> – Paragraph writing, Use of Phrases and Clauses in sentences, Listening Telephonic conversations. <b>Speaking</b> – Sharing information of a personal kind, Greetings.</p> <p><b>Language Development</b> – Noun Pronoun agreement. <b>Vocabulary Development</b> – The Concept of Word Formation. (Norman Lewis' <i>Word Power Made Easy</i>)</p>			
<b>GRAMMAR AND LANGUAGE DEVELOPMENT</b>			<b>6</b>
<p><b>Reading</b> – Short texts &amp; Longer passages (Cloze reading). <b>Writing</b> – Importance of proper punctuation, Jumbled sentences. <b>Listening</b> – Listening to longer texts and filling up the table, Product description, Narratives from different sources. <b>Speaking</b> – Asking about routine actions and Expressing opinions.</p> <p><b>Language Development</b> – Degrees of Comparison, Pronouns. <b>Vocabulary Development</b> – Misplaced modifiers, Relative clauses.</p>			
<b>READING AND LANGUAGE DEVELOPMENT.</b>			<b>6</b>
<p><b>Reading</b>- Comprehension. <b>Reading</b> longer texts- reading different types of texts. <b>Writing</b>- letter Writing, informal or personal Letters-Achieving Coherence. <b>Listening</b>- listening to dialogues or conversations and completing exercises based on them. <b>Speaking</b>- Speaking about oneself- Speaking about one's friend.</p> <p><b>Language Development</b>- Articles. <b>Vocabulary Development</b> – Root words from foreign languages and their use in English.</p>			
<b>EXTENDED WRITING</b>			<b>6</b>
<p><b>Reading</b>-Longer texts-closer reading. <b>Writing</b>-Organizing principles of paragraphs in documents. <b>Listening</b> – Listening to talks, conversations. <b>Speaking</b> – Participating in conversations, short group conversations.</p> <p><b>Language Development</b> - Clinches, Tenses. <b>Vocabulary Development</b> - Prepositions.</p>

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Develop the basic reading and writing skills.
<b>CO2</b>	Listen actively and grasp the contents of the speech.
<b>CO3</b>	Develop their speaking skills and speak fluently in real contexts.
<b>CO4</b>	Develop vocabulary of a general kind by developing their reading skills.
<b>CO5</b>	Use the grammar effectively to exhibit their speaking and writing skill.
<b>CO6</b>	Speak in English with clarity.

**Mapping with Programme Outcomes:**

<b>191HS12</b>	<b>CALCULUS AND LINEAR ALGEBRA</b>			<b>L-T-P</b>	<b>C</b>
				<b>3-1-0</b>	<b>4</b>
<b>Programme:</b>	<b>B.E./B.Tech. (Common to all Branches)</b>	<b>Sem:</b>	<b>I</b>	<b>Category:</b>	<b>BSC</b>
<b>Prerequisites:</b>	Matrices, Differentiation and Integration.				
<b>Aim:</b>	The course is aimed at developing the basic mathematical skills of engineering students				
<b>MATRICES</b>					<b>12</b>
Characteristic equation - Eigen Values and Eigen vectors of a real matrix - Properties of Eigen values - Cayley-Hamilton Theorem (without proof) and its application - Orthogonal Transformation of a Symmetric matrix to diagonal form - Quadratic form - Orthogonal reduction to canonical form.					
<b>CALCULUS</b>					<b>12</b>
Radius of Curvature - Cartesian and Parametric Coordinates - Circle of Curvature - Involutes and Evolutes – Beta and Gamma functions and their properties.					
<b>MULTIVARIABLE CALCULUS</b>					<b>12</b>
Partial Derivatives - Total Derivative - differentiation of Implicit function – Jacobian - Taylor's Expansion - Maxima/Minima for function of two variables - Method of Lagrange's multipliers.					
<b>VECTOR CALCULUS</b>					<b>12</b>
Gradient, Divergence and Curl – Directional derivative – Irrotational and Solenoidal vector fields – Vector integration – Green's theorem in a plane, Gauss divergence theorem and Stokes' theorem (excluding proofs) – Simple applications involving cubes and rectangular parallelepiped.					
<b>COMPLEX VARIABLE – DIFFERENTIATION</b>					<b>12</b>
Functions of a complex variable – Analytic functions – Necessary conditions, Cauchy– Riemann equation and Sufficient conditions (excluding proofs) – Harmonic and orthogonal properties of analytic function(without proof) – Harmonic conjugate – Construction of analytic functions – Conformal mapping : $w = z + c$ , $cz$ , $1/z$ , and bilinear transformation.					
					<b>Total Periods</b> <b>60</b>
<b>Text books:</b>					
1. B.S. Grewal, " <b>Higher Engineering Mathematics</b> ", Khanna Publishers, New Delhi, 43 <sup>rd</sup> Edition,2014. 2. G.B. Thomas and R.L. Finney, Calculus and Analytic geometry, 9 <sup>th</sup> edition, Pearson, Reprint,2002

<b>Course Outcomes:</b>					
At end of this course, the students will be able to					
<b>CO1</b>	Find the inverse and the positive powers of a square matrix				
<b>CO2</b>	Apply the concept of orthogonal reduction to diagonalize the given matrix				
<b>CO3</b>	Estimate of curves, Beta and Gamma Functions.				
<b>CO4</b>	Apply Lagrangian multiplier method for finding maxima and minima of an unconstrained problem				
<b>CO5</b>	Apply the concepts of Differentiation and Integration in Vectors.				
<b>CO6</b>	Predict an analytic function, when its real or Imaginary part is known.

<b>Programme:</b>	<b>B.E./B.Tech. (Common to all Branches)</b>	<b>Sem:</b>	<b>I</b>
<b>Prerequisites:</b>	School Level Physics	<b>Category:</b>	<b>BSC</b>
<b>Aim:</b>	To endow the students with the fundamentals of Physics and apply new ideas in the field of Engineering and Technology.		
<b>SOLID STATE PHYSICS</b>			<b>6</b>
Lattice – Unit cell – Bravais lattice – Lattice planes – Miller indices – d spacing in cubic lattice – Calculation of number of atoms per unit cell – Atomic radius – Coordination number – Packing factor for SC, BCC, FCC and HCP structures – Crystal Defects-point, Line and surface defects –burger vector.			
<b>WAVE OPTICS</b>			<b>6</b>
<b>LASERS:</b> Introduction – Principle of Spontaneous emission and stimulated emission. Population inversion, pumping. Einstein's A and B coefficients – Derivation- Types of lasers – CO <sub>2</sub> , Nd-YAG - Industrial Applications - Lasers in welding, cutting and Soldering <b>FIBER OPTICS:</b> Optical Fiber-Classification- Principle and propagation of light in optical fibres- Numerical aperture and Acceptance angle-Fibre optical communication system- Sensors ( Active and passive) – Displacement and Temperature Sensors.			
<b>PROPERTIES OF MATTER</b>			<b>6</b>
Elasticity–Stress - strain diagram and its uses -factors affecting elastic modulus and tensile strength –torsional stress and deformations – twisting couple- torsion pendulum: theory and experiment -bending of beams - bending moment –cantilever: theory and experiment–uniform and non-uniform bending: theory and experiment – I shaped girders - stress due to bending in beams.			
<b>QUANTUM PHYSICS</b>			<b>6</b>
Black body radiation – Planck's theory -Photoelectric effect - Matter waves – Schrödinger's wave equation – Time independent and time dependent equations – Physical significance of wave function – Particle in a one-dimensional box.			
<b>ACOUSTICS AND ULTRASONICS</b>			<b>6</b>
<b>ACOUSTICS:</b> Classification of sound - loudness and intensity - Weber-Fechner Law - standard intensity and intensity level - decibel - reverberation - reverberation time - Sabine's formula - absorption coefficient and its determination – factors affecting acoustics of buildings : focusing, interference, echo, Echelon effect, resonance - noise and their remedies. <b>ULTRASONICS:</b> Ultrasonics - production - magnetostriction and piezoelectric methods - acoustic grating - Industrial applications - NDT.			
			<b>Total Periods</b> <b>30</b>
<b>Textbooks:</b>			
1. Gaur R. K., Gupta S. C., "Engineering Physics" Dhanpat Rai Publications, New Delhi(2016) 2. Avadhanulu M. N., Kshirsagar, P. G., "A Textbook of Engineering Physics", S.Chand and company, Ltd., New Delhi, 2017.			
<b>References:</b>			
1. Serway and Jewett., "Physics for Scientists and Engineers with Modern Physics",6 <sup>th</sup> Edition, Thomson Brooks/Cole, Indian reprint(2016) 2. Arither Beiser, Concepts of Modern Physics, Tata Mc Graw Hill, New Delhi(2015)			

<b>Course Outcomes:</b>	
At end of this course, the students will be able to	
<b>CO1</b>	Understand the theory and various crystal structures.
<b>CO2</b>	Use basic configuration of a Laser, types of lasers and the industrial applications of Laser.
<b>CO3</b>	Apply principle behind fiber optic communication and the electronic devices involved in the transmission and reception of data.
<b>CO4</b>	Analyze basics of properties of matter and its applications,
<b>CO5</b>	Gain knowledge about basic equations of Quantum mechanics and its applications.
<b>CO6</b>	Understand the basic concepts of acoustics and ultrasonic.

**Mapping with Programme Outcomes:**

Course Outcomes	Program Outcomes (POs)												Program Specific Outcomes (PSOs)			
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PS O1	PS O2	PS O3	PS O4

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

<b>191HS14</b>	<b>ENGINEERING CHEMISTRY</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>2</b>
<b>Programme:</b>	<b>B.E./B.Tech. (Common to all Branches)</b>	<b>Sem:</b>	<b>I</b>
<b>Prerequisites:</b>	Basic Science	<b>Category:</b>	<b>BSC</b>
<b>Aim:</b>	To impart a sound knowledge on the principles of chemistry involving the different Application oriented topics required for all engineering branches.		
<b>WATER TECHNOLOGY</b>			<b>6</b>
Hardness -Types and Estimation by EDTA method- alkalinity –types of alkalinity and determination - Domestic water treatment –disinfection methods – Boiler feed water– internal conditioning– external Conditioning – desalination and reverse osmosis.			
<b>ELECTROCHEMISTRY</b>			<b>6</b>
Electrochemical cells – reversible and irreversible cells – EMF –measurement of emf – Single electrode potential – Nernst equation– reference electrodes –Standard Hydrogen electrode – Calomel electrode – Ion selective electrode – glass electrode and measurement of pH – electrochemical series			
<b>SPECTROSCOPIC TECHNIQUES AND APPLICATIONS</b>			<b>6</b>
Introduction of UV-Visible and IR spectroscopy and selection rules- principles and instrumentation of UV-Visible (electronic) spectroscopy – IR (vibrational) spectroscopy - its applications. Fluorescence spectroscopy and its applications in medicine-calorimetry– estimation of iron by calorimetry .			
<b>INORGANIC &amp; ORGANIC COATINGS</b>			<b>6</b>
Paint–Definition–Components of Paints and their functions–Varnish–Definition–Preparation of Oil Varnish– Differences between Paint and Varnish–Special Paints–Luminescent Paints, Fire Retardant Paints–Aluminum Paints - Distemper. Corrosion control– electroplating (Au) and electro less (Ni) plating.			
<b>PREPARATION OF CONSUMER PRODUCTS</b>			<b>6</b>
Washing Powder- Cleaning powder - phenoys (white, Black & coloured)- Shampoo- liquid blue- inks - blue –red - green inks – Soap - bathing & detergent – oils - Face powder and bleaching powder.			
			<b>Total Periods</b> <b>30</b>
<b>Textbooks:</b>			
1. P. Kannan, A. Ravikrishnan, “Engineering Chemistry”, Sri Krishna Hi-tech Publishing Company Pvt. Ltd. Chennai, 2009. 2. P.C.Jain and Monica Jain, “Engineering Chemistry” Dhanpat Rai Pub, Co., New Delhi(2002)

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Demonstrate the essential concept of water and their properties and applications.		
<b>CO2</b>	Analyze treatment of water for potable and industrial purposes		
<b>CO3</b>	Understand the operating principles and the reaction involved in electrochemistry.		
<b>CO4</b>	Recall the principles and application of spectroscopy		
<b>CO5</b>	Learn the basic ingredients required for paint formulation		
<b>CO6</b>	Know the preparation techniques of consumer products		

**Mapping with Programme Outcomes:**

<b>191CSF1</b>	<b>PROGRAMMING FOR PROBLEM SOLVING</b>			<b>L-T-P</b>	<b>C</b>			
				<b>3-0-0</b>	<b>3</b>			
<b>Programme:</b>	<b>B.E./B.Tech. (EEE, CIVIL, MECH,BIO-TECH)</b>			<b>Sem:</b>	<b>I</b>			
<b>Prerequisites:</b>	Nil			<b>Category:</b>	<b>ESC</b>			
<b>Aim:</b>	To provide an awareness to Computing and Programming.							
<b>INTRODUCTION</b>					<b>9</b>			
Generation and Classification of Computers- Basic Organization of a Computer - Number System - Binary - Decimal - Conversion - Problems. Software - Types, Development Steps. Algorithm - Pseudo code - Flow Chart. Problem formulation - Problem Solving.								
<b>C PROGRAMMING BASICS</b>					<b>9</b>			
Introduction to Unix Operating System - Introduction to ‘C’ programming - fundamentals - structure of a ‘C’ program - compilation and linking processes - Constants, Variables - Data Types - Expressions using operators in ‘C’ - Managing Input and Output operations - Decision Making and Branching - Looping statements - solving simple scientific and statistical problems								
<b>ARRAYS AND STRINGS</b>					<b>9</b>			
Arrays - Initialization - Declaration - One dimensional and Two dimensional arrays. String- String operations - String Arrays. Simple programs –Bubble Sort – Linear Search -Matrix Operations.								
<b>FUNCTIONS AND POINTERS</b>					<b>9</b>			
Function - Definition of function - Declaration of function - Pass by value - Pass by reference - Recursion - Pointers - Definition - Initialization - Pointers arithmetic - Pointers and arrays- Example Problems.								
<b>STRUCTURES AND FILES</b>					<b>9</b>			
Introduction - need for structure data type - structure definition - Structure declaration - Structure within a structure - Union - Programs using structures and Unions - File Manipulation - Storage classes - Pre-processor directives.								
					<b>Total Periods</b> <b>45</b>			
<b>Text books:</b>								
1. Anita Goel and Ajay Mittal, “Computer Fundamentals and Programming in C”, Dorling Kindersley (India) Pvt. Ltd., Pearson Education in South Asia,2017. 2. Balagurusamy E, “Programming in ANSI C”, Tata Mcgraw-Hill Education,2016 3. Reema Theraja, “Computer Fundamentals and Programming in C”, 2e, Oxford University Press,2016.								
<b>References:</b>

Kernighan.B.W and Ritchie, D.M, “The C Programming language”, 2 <sup>nd</sup> Edition, Pearson Education,2006.								
<b>Course Outcomes:</b>								
At end of this course, the students will be able to								
<b>CO1</b>	Understand the basic terminologies of Computer and various Problem solving techniques.							
<b>CO2</b>	Write, compile and debug programs in C language.							
<b>CO3</b>	Use different data types in a computer program.							
<b>CO4</b>	Design programs involving decision structures, loops and functions.							
<b>CO5</b>	Analyze the dynamics of memory by the use of pointers.							
<b>CO6</b>	Use different data structures and create/update basic data files.							

**Mapping with Programme Outcomes:**

<b>191MEF7</b>	<b>MECHANICAL WORKSHOP</b>	<b>L-T-P</b>	<b>C</b>
		<b>1-0-4</b>	<b>3</b>
<b>Programme:</b>	<b>B.E./B.Tech. (EEE, CIVIL, MECH, BIO-TECH)</b>	<b>Sem:</b>	<b>I</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To Provide exposure to the students with hands on experience on various basic Engineering Practices		
<b>FITTING OPERATIONS &amp; POWER TOOLS</b>			<b>12</b>
Preparation of square fitting, vee & step – fitting models			
<b>CARPENTRY</b>			<b>12</b>
Study of the joints in roofs, doors, windows and furniture; Hands-on-exercise: Dismantling & Assembling of various wooden furniture; Preparation of T Joint, dove tail joint			
<b>SHEET METAL FORMING</b>			<b>12</b>
Preparation of tray and funnel			
<b>WELDING</b>			<b>12</b>
Preparation of arc welding of butt joints and lap joints			
<b>PLUMBING</b>			<b>12</b>
Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings; Hands-on-exercise -basicpipeconnections–Mixedpipematerialconnection– Connections with different joining components			
			<b>Total Periods</b> <b>60</b>
<b>LIST OF EQUIPMENTS (For a batch of 30 students)</b>			
1. Fitting vice (fitted to work bench) -15Nos			
2. Fitting Tools – 15set			
3. Carpentry vice (fitted to work bench) - 15Nos.			
4. Models of industrial trusses, door joints, furniture joints - 5Nos.			
5. Standard woodworking tools - 15Sets			
6. Hand Shear -01			
7. Standard tools and calipers for sheet metal work -05			
8. Arc welding transformer with cables and holders -5Nos.			
9. Welding booth - 5Nos.			
10. Welding accessories like welding shield, chipping hammer, Wire brush, etc., -5Sets			
Assorted components for plumbing consisting of metallic pipes, Plastic pipes, flexible pipes, couplings, unions, elbows, plugs and other fittings - 15 Sets			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Make the square fitting, vee & step fitting		
<b>CO2</b>	Produce simple wooden joints using wood working tools		
<b>CO3</b>	Fabricate tray and funnel in sheet metal		
<b>CO4</b>	Create simple lap, butt and tee joints using arc welding equipment		
<b>CO5</b>	Identify the various pipe joints		
<b>CO6</b>	Make the pipe connections

<b>191HS17</b>	<b>PHYSICS AND CHEMISTRY LABORATORY-I</b>	<b>L-T-P</b>	<b>C</b>			
		<b>0-0-2</b>	<b>1</b>			
<b>Programme:</b>	<b>B.E./B.Tech. (Common to all Branches)</b>	<b>Sem:</b>	<b>I</b>			
<b>Aim:</b>	To introduce the basic Physics concepts through experiments and to impart the basic analysis in chemistry					
<b>LIST OF EXPERIMENTS - PHYSICS PART</b> <b>(A minimum of five experiments shall be offered)</b>						
<b>NAME OF THE EXPERIMENT</b>						
1.	1. (a) Determination of Particle Size using Diode LASER. (b) Determination of wavelength of the LASER source. (c) Determination of Acceptance angle and Numerical aperture of an optical fibre.					
2.	Torsional pendulum – Determination of rigidity modulus					
3.	Determination of Velocity of sound and compressibility of liquid –Ultrasonic Interferometer.					
4.	Determination of Dispersive power of a prism using Spectrometer.					
5.	Determination of Young's modulus of the material - Non uniform bending					
6.	Determination of thermal conductivity of a bad conductor - Lee's Disc method					
<b>LIST OF EXPERIMENTS – CHEMISTRY PART</b>						
<b>NAME OF THE EXPERIMENT</b>						
1.	Estimation of Total Hardness of their home town Water by EDTA method.					
2.	Estimation of Alkalinity of Water sample					
3.	Estimation of Chloride ion in water sample by Argentometric method.					
4.	Estimation of Ferrous Ion by Potentiometric Titrations.					
5.	Conductometric Titration of strong acid Vs strong base					
			<b>Total Periods</b> <b>45</b>			
<b>References:</b>						
1.	Text book of Quantitative Inorganic Analysis, A.I.Vogel, ELBS, London, (2006)					
2.	“Practical A. Ravi Krishnan Engineering Chemistry”, Sri Krishna Publications, Chennai(2002)					
3.	Engineering Physics Laboratory Manual					
4.	Engineering Chemistry Laboratory Manual					
<b>Course Outcomes:</b>						
At end of this course, the students will be able to						
<b>CO1</b>	Understand the laser light propagation in optical fibre and the rigidity modulus of the materials					
<b>CO2</b>	Examine the velocity of sound in liquid and propagation light in the medium					
<b>CO3</b>	know about the stress analysis and thermal conductivity of the material					
<b>CO4</b>	Analyze of water quality parameter of potable water					
<b>CO5</b>	Determine the unknown concentrations of chemicals					
<b>CO6</b>	Apply the instrumental technique for calculating the amount of unknown substance					

**Mapping with Programme Outcomes:**

<b>191CSF7</b>	<b>C PROGRAMMING LABORATORY</b>			<b>L-T-P</b>	<b>C</b>
				<b>0-0-2</b>	<b>1</b>
<b>Programme:</b>	<b>B.E./B.Tech. (EEE, CIVIL, MECH,BIO-TECH)</b>	<b>Sem:</b>	<b>I</b>	<b>Category:</b>	<b>ESC</b>
<b>Prerequisites:</b>	Nil				
<b>Aim:</b>	To provide practical knowledge in developing C Programming.				
<b>LIST OF EXPERIMENTS:</b>					
1)	Draw a flowchart for various algorithms using Raptor				
2)	C Programming using Simple statements and expressions.				
3)	Scientific problem-solving using decision making and looping.				
4)	Simple programming for one dimensional and two-dimensional arrays.				
5)	Solving problems using String functions.				
6)	Programs with user defined functions - Includes Parameter Passing.				
7)	Program using Recursive Function and conversion from given program to flowchart.				
8)	Programs using pointers				
9)	Program using structures and unions.				
10)	Program using files.				

<b>Total Periods</b>	<b>60</b>
----------------------	-----------

<b>LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:</b>
--

Standalone desktops with C compiler 30 Nos.

(or)

Server with C compiler supporting 30 terminals or more.

<b>Course Outcomes:</b>
-------------------------

At end of this course, the students will be

<b>CO1</b>	Able to have fundamental concept on basics commands in Linux.
<b>CO2</b>	Able to write, compile and debug programs in C language.
<b>CO3</b>	Able to formulate problems and implement algorithms in C.
<b>CO4</b>	Able to effectively choose programming components that efficiently solve computing problems in real-world.
<b>CO5</b>	Able to design application oriented programs in C.
<b>CO6</b>	Structures and unions through which derived data types can be formed.

**Mapping with Programme Outcomes:**

<b>191HS21</b>	<b>TECHNICAL ENGLISH</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>2</b>
<b>Programme:</b>	<b>B.E./B.Tech. (Common to all Branches)</b>	<b>Sem:</b>	<b>II</b>
<b>Prerequisites:</b>	Acquire Proficiency in Technical Communication	<b>Category:</b>	<b>HSMC</b>
<b>Aim:</b>	To develop the students' intellectual, personal & Professional abilities		
<b>INTRODUCTION TO TECHNICAL ENGLISH</b>			<b>6</b>
<b>Listening</b> - Listening to talks mostly of a scientific/technical nature and completing information-gap exercises. <b>Speaking</b> – Asking for and giving directions. <b>Reading</b> – reading short technical texts, Newspapers. <b>Writing</b> - Purpose statements, Extended definitions, Writing Instructions & Recommendations, Checklists. <b>Vocabulary Development</b> - Technical Vocabulary. <b>Language Development</b> – Subject Verb Agreement.			
<b>READING AND STUDY SKILLS</b>			<b>6</b>
<b>Listening</b> - Listening to longer technical talks and completing exercises based on them. <b>Speaking</b> – Describing a process. <b>Reading</b> – Reading longer technical texts, Newspapers identifying various transitions in a text-paragraphing. <b>Writing</b> - Techniques for writing Precisely. <b>Vocabulary Development</b> -vocabulary used in formal letters/emails and reports. <b>Language Development</b> - Personal & Impersonal Passive voice, Numerical adjectives			
<b>TECHNICAL WRITING AND GRAMMAR</b>			<b>6</b>
<b>Listening</b> - Listening to classroom lectures on Engineering / Technology. <b>Speaking</b> – Introduction to Technical presentations. <b>Reading</b> – Reading longer texts both general and Technical, practice in rapid reading. <b>Writing</b> - Describing a process, Use of sequence words, Causes and Effects <b>Vocabulary Development</b> - Sequence words, Nominal compounds, Misspelled words. <b>Language Development</b> –Embedded sentences.			
<b>REPORT WRITING</b>			<b>6</b>
<b>Listening</b> - Listening to documentaries and Making notes. <b>Speaking</b> – Mechanics of presentations. <b>Reading</b> – Reading for detailed comprehension. <b>Writing</b> - Job application, cover letter, Resume preparation. <b>Vocabulary Development</b> - Finding suitable synonyms, Paraphrasing. <b>Language Development</b> – Clauses, If conditionals.			
<b>GROUP DISCUSSION AND JOB APPLICATIONS</b>			<b>6</b>
<b>Listening</b> - TED/Ink talks. <b>Speaking</b> – Participating in a Group discussion. <b>Reading</b> – Reading and Understanding Technical articles. <b>Writing</b> – Writing reports, Minutes of Meeting, Introduction and Conclusion. <b>Vocabulary Development</b> - Verbal analogies. <b>Language Development</b> –Reported speech.

<b>Extensive Reading</b>			
Kalam, Abdul. <i>The Wings of Fire</i> . Hyderabad: UP, 1999.Print.			

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Remember words and its meanings for the specific purpose.
<b>CO2</b>	Understand the basic nuances of language
<b>CO3</b>	Apply written communication methodologies at workplace.
<b>CO4</b>	Develop Listening skill to respond and to gather information.
<b>CO5</b>	Interpret the text using comprehending skill.
<b>CO6</b>	Involve in professional correspondences confidently.

<b>191HS22</b>	<b>DIFFERENTIAL EQUATIONS &amp; NUMERICAL METHODS</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-1-0</b>	<b>4</b>
<b>Programme:</b>	<b>B.E. / B.Tech. (Common to all branches)</b>	<b>Sem:</b>	<b>II</b>
<b>Aim:</b>	To analyze the engineering problems using the techniques and the mathematical skills acquired by studying ODE and PDE uses numerical methods.		
<b>ORDINARY DIFFERENTIAL EQUATIONS</b>			<b>12</b>
Higher order linear differential equations with constant coefficients – Method of variation of parameters – Cauchy's and Legendre's linear equations – Simultaneous first order linear equations with constant coefficients.			
<b>PARTIAL DIFFERENTIAL EQUATIONS</b>			<b>12</b>
Formation of partial differential equations – Lagrange's linear equation – Solutions of standard types of first order partial differential equations (without reducing the standard type) – Linear homogeneous partial differential equations of second and higher order with constant coefficients.			
<b>SOLUTION OF EQUATION &amp; INTERPOLATION, NUMERICAL DIFFERENTIATION</b>			<b>12</b>
Solutions of Polynomial and transcendental equations – Newton Raphson method - Interpolation using Newton's forward and backward difference formulae - Interpolation with unequal intervals- Newton's divided difference and Lagrange's formulae - Numerical differentiation using Newton's forward and backward difference formula - Numerical Integration – Trapezoidal rule and Simpson's 1/3 <sup>rd</sup> rule.			
<b>NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS</b>			<b>12</b>
Taylor's series method – Euler's method – Modified Euler's method – Fourth order Runge-Kutta method – Milne's predictor – corrector methods for solving first order equations – Finite difference methods for solving Second order equation.			
<b>BOUNDARY VALUE PROBLEMS OF PARTIAL DIFFERENTIAL EQUATIONS</b>			<b>12</b>
Finite differences solution of one-dimensional heat equation by explicit and implicit methods – One-dimensional wave equation and two-dimensional Laplace and Poisson equations.			
			<b>Total Periods</b> <b>60</b>
<b>Text books:</b>

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Use suitable method to solve higher order Differential Equations		
<b>CO2</b>	Use suitable method to solve higher order PDE		
<b>CO3</b>	Interpolate discrete data by means of continuous function.		
<b>CO4</b>	Discover Numerical integration using Trapezoidal and Simpson's 1/3 <sup>rd</sup> rules		
<b>CO5</b>	Solve the solution for the IVPs in ODE using single step and Multistep methods		
<b>CO6</b>	Solve the solution of BVPs in PDE using finite difference methods

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Understand the theory and processing of conducting, superconducting materials.
<b>CO2</b>	Acquire knowledge of polymer and ceramic materials.
<b>CO3</b>	Categorize composites materials and applications.
<b>CO4</b>	Enhance the knowledge new materials.
<b>CO5</b>	Understand about some exciting properties of nanomaterials
<b>CO6</b>	Assess Characterization Techniques of materials

<b>191HS24</b>	<b>ENVIRONMENTAL SCIENCE</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>2</b>
<b>Programme:</b>	<b>B.E. / B.Tech. (Common to all branches)</b>	<b>Sem:</b>	<b>II</b>
<b>Prerequisites:</b>	Basic Science	<b>Category:</b>	<b>BSC</b>
<b>Aim:</b>	To Impart the social groups and individuals to acquire knowledge of pollution and environmental degradation		
<b>ENVIRONMENT AND ENERGY RESOURCES</b>			<b>6</b>
Environment- definition, scope and importance – Need for public awareness – Forest resources-deforestation– Energy resources: Growing energy needs, renewable (solar energy and wind energy) and non-renewable energy sources- Nuclear energy – fission and fusion reactions and light water nuclear reactor for power generation (block diagram only), Petroleum processing and fractions			
<b>ECOSYSTEM</b>			<b>6</b>
Concept of an ecosystem – Structure and function of an ecosystem: Producers, consumers and decomposers, Energy flow in the ecosystem-Nitrogen cycle, Food chains, food webs and ecological pyramids - Introduction, types, characteristics, structure and function of the Forest ecosystem and Aquatic ecosystems (lake and rivers)			
<b>ENVIRONMENTAL POLLUTION</b>			<b>6</b>
Definition – Causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Marine pollution (d) Noise pollution . Solid waste Management: Causes, effects and control measures of urban and industrial wastes. Role of an individual in prevention of pollution –Disaster management: floods- landslides.			
<b>SOCIAL ISSUES AND EARTH'S CLIMATE SYSTEM</b>			<b>6</b>
Population-variation among nation-Unsustainable to Sustainable development – Urban problems related to energy – Water conservation, rain water harvesting– climate change, global warming, acid rain, Ozone layer depletion.			
<b>GREEN CHEMISTRY</b>			<b>6</b>
Introduction to green chemistry- 12 principles of green chemistry-toxicology and green chemistry- energy and green chemistry-education in green chemistry. Reuse and recycling technologies-material selection for green design- recycled water technology.			
			<b>Total Periods</b> <b>30</b>
<b>Text books:</b>

P.Meenakshi, Elements of Environmental Science and Engineering, PHI learning (P) Ltd., India.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Understand the basic concepts of environment and energy resources		
<b>CO2</b>	Get knowledge about the ecosystem		
<b>CO3</b>	Identify and analyze causes, effects and control measures of various types of pollution		
<b>CO4</b>	Classify types of disaster and mitigation measures		
<b>CO5</b>	Understand the impact of social issues and climate change		
<b>CO6</b>	Understand to create the green environment.

<b>191EE11</b>	<b>BASIC ELECTRICAL AND ELECTRONICS ENGINEERING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. (CIVIL, MECH, BIO-TECH)</b>	<b>Sem:</b>	<b>II</b>
<b>Prerequisites:</b>	Algebra, calculus and electrostatics	<b>Category:</b>	<b>ESC</b>
<b>Aim:</b>	To provide comprehensive idea about AC and DC circuit analysis, working principles and applications of basic machines in electrical engineering and protection schemes in power system.		
<b>ELECTRICAL CIRCUITS</b>			<b>12</b>
Ohm's Law – Kirchhoff's Laws –Reduction of series and parallel circuits-Mesh and Nodal Analysis of DC circuits – Introduction to AC Circuits - RMS Value, Average value, Form factor and peak factor phasor representation – Single Phase AC series circuits with R, RL, RC - Power and Power factor. Introduction to three phase circuits- Star and delta connected balanced load.			
<b>DC MACHINES &amp; TRANSFORMER</b>			<b>8</b>
DC Generators - construction, principle of operation, Types, EMF equations and applications. DC Motors - operation, Types, Speed and torque equation – speed control of DC shunt motors. Single Phase Transformer - Constructional details and operation, Types, EMF equation, transformation ratio			
<b>AC MACHINES</b>			<b>8</b>
Single phase induction motor - construction, operation and applications, Three phase induction motor – Types, Construction and operation, Torque equation, slip torque characteristics, Synchronous generators - construction and operation, EMF equation - Synchronous motors – principle of operation.			
<b>SEMICONDUCTOR DEVICES</b>			<b>9</b>
Introduction to semiconductors-PN Junction Diode – characteristics, breakdown effect and applications - Half wave and Full wave rectifiers, Zener Diode - characteristics and voltage regulator. Bipolar Junction Transistor – operation of NPN and PNP, characteristics of CB, CE, CC configurations.			
<b>DIGITAL ELECTRONICS</b>			<b>8</b>
Number System – Binary, octal, hexadecimal, Logic Gates, Half and Full Adders – Flip-Flops –RS, JK, T and D - Counters – synchronous up counter, synchronous down counter, asynchronous up counter, asynchronous down counter, shift registers – shift right and shift left register			
			<b>Total Periods</b> <b>45</b>

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Analyze DC and AC circuits using basic laws.
<b>CO2</b>	Understand the operation of measuring instruments.
<b>CO3</b>	Apply the basic laws governing the operation of the instruments.
<b>CO4</b>	Demonstrate about DC machines, AC machines and its applications.
<b>CO5</b>	Analyze and compare the construction, theory and characteristics of the semiconductor devices.
<b>CO6</b>	Design basic combinational and sequential logic circuits.

<b>191MEF1</b>	<b>ENGINEERING GRAPHICS</b>	<b>L-T-P</b>	<b>C</b>
		<b>1-0-4</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. / B.Tech. (EEE, CIVIL, MECH, BIO-TECH)</b>	<b>Sem:</b>	<b>II</b>
<b>Prerequisites:</b>	Nil	<b>Category:</b>	<b>ESC</b>
<b>Aim:</b>	To develop graphic skills in students		
<b>Concepts and conventions (Not for Examination)</b>			<b>12</b>
Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning			
<b>PLANE CURVES</b>			<b>12</b>
Conics – Construction of ellipse, Parabola and hyperbola by eccentricity method – Construction of cycloid – Construction of involutes of square and circle – Drawing of tangents and normal to the above curves.			
<b>PROJECTION OF POINTS, LINES AND PLANE SURFACES</b>			<b>12</b>
Projection of Points in all four quadrants - Projection of straight lines located in the first quadrant – inclined to both planes – Determination of true lengths and true inclinations – Projection of regular polygonal and circular lamina inclined to both reference planes.			
<b>PROJECTION OF SOLIDS</b>			<b>12</b>
Projection of simple solids like Prisms, Pyramids, Cylinder and Cone when the axis is inclined to one reference plane			
<b>SECTION OF SOLIDS AND DEVELOPMENT OF SURFACES</b>			<b>12</b>
Sectioning of above solids in simple vertical position by cutting planes inclined to HP and perpendicular to VP – Obtaining true shape of section; Development of lateral surfaces of truncated solids – Prisms, Pyramids, Cylinder and Cone			
<b>ISOMETRIC AND ORTHOGRAPHIC PROJECTIONS</b>			<b>12</b>
Principles of isometric projection – isometric scale – isometric projections of truncated Prisms, Pyramids, Cylinder and Cone; Conversion of Isometric Views to Orthographic Views and Vice-versa.			
			<b>Total Periods</b> <b>60</b>
<b>Text books:</b>

<b>191HS27</b>	<b>PHYSICS AND CHEMISTRY LABORATORY-II</b>	<b>L-T-P</b>	<b>C</b>
		<b>0-0-2</b>	<b>1</b>
<b>Programme:</b>	B.E/B.Tech (Common to all Branches)	<b>Sem:</b>	<b>II</b>
<b>Prerequisites:</b>	Engineering Physics & Engineering Chemistry		
<b>Aim:</b>	To introduce the basic Physics concepts through experiments and to impart knowledge on the application of chemistry in engineering branches.		
<b>LIST OF EXPERIMENTS - PHYSICS PART</b> <b>(A minimum of five experiments shall be offered)</b> <b>NAME OF THE EXPERIMENT</b>			
1. Determination of thickness of thin wire – Air wedge method 2. Determination of Young's modulus of the material – Uniform bending 3. Determination of viscosity of liquid – Poiseuille's method. 4. Determination of wavelength of mercury spectrum- Spectrometer Grating. 5. Determination of Band Gap of a semiconductor material. 6. Determination of specific resistance of a given coil of wire – Carey Foster Bridge.			
<b>LIST OF EXPERIMENTS – CHEMISTRY PART</b> <b>NAME OF THE EXPERIMENT</b>			
1. Estimation of HCl by pH metry 2. Estimation of Copper in brass by EDTA method. 3. Estimation of iodine in iodized salt with thiosulfate 4. Determination of percentage of calcium in limestone by EDTA method 5. Determination of DO in water (Winkler's method)

<b>191HS31</b>	<b>TRANSFORMS AND DISCRETE MATHEMATICS</b>			<b>L-T-P</b>	<b>C</b>
			<b>2-1-0</b>		<b>3</b>
<b>Programme:</b>	<b>B.E. / B.Tech. (Common to all branches)</b>	<b>Sem:</b>	<b>III</b>	<b>Category:</b>	<b>BSC</b>
<b>Prerequisites:</b>	NIL				
<b>Aim:</b>	To introduce basic mathematical ideas such as reasoning techniques, basic counting techniques and their applications .				
<b>LAPLACE TRANSFORMS</b>					<b>6+3</b>
Laplace transform —Properties of Laplace Transforms – Laplace Transform of periodic functions –Inverse Laplace transforms by partial fraction method and Convolution theorem (excluding proof) – Solving ODE using Laplace transformation techniques.					
<b>FOURIER TRANSFORMS</b>					<b>6+3</b>
Fourier integral theorem (without proof) – Fourier transform pair – Sine and Cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's identity.					
<b>Z-TRANSFORMS</b>					<b>6+3</b>
Z-transforms – Elementary properties – Inverse Z-transform – Convolution theorem – Formation of difference equations – Solution of difference equations using Z-transform.					
<b>INTRODUCTION TO COUNTING</b>					<b>6+3</b>
Decision problems on Propositional logic – Basic counting techniques – inclusion & exclusion- Pigeonhole principle –Permutations and combinations-Recurrence relations-Solving Linear recurrence relations and generating functions					
<b>INTRODUCTION TO GRAPHS</b>					<b>6+3</b>
Graphs and their basic properties – Graph terminology and special types of graphs - Representing graphs and graph isomorphism – Euler and Hamilton paths.					
					<b>Total Periods</b> <b>45</b>

P and Manohar R, "Discrete Mathematical Structures with Applications to Computer Science", Tata McGraw–Hill Pub. Co. Ltd, NewDelhi, 30 <sup>th</sup> Re-print (2007). 4 Dr.P.Kandasamy,Dr.K.Thilagavathy,Dr.K.Gunavathy, "Transforms and Partial Differential Equation", S.Chand & Company Ltd. Ram Nagar, New Delhi.					
<b>Course Outcomes:</b>					
At end of this course, the students will be able to					
<b>CO1</b>	Solve problems in LaPlace transforms equations.				
<b>CO2</b>	Solve the problems related to Fourier integral theorem and Fourier transform				
<b>CO3</b>	Solve the problems related to Z-transforms and Inverse Z-transform				
<b>CO4</b>	Solve the problems related to Permutations and combinations Linear recurrence relations functions				
<b>CO5</b>	Explain the Graphs and their basic properties				
<b>CO6</b>	Solve problems Representing graphs and graph isomorphism – Euler and Hamilton paths.

<b>191BT31</b>	<b>BIOLOGY FOR ENGINEERS</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E./B.Tech. (Common to all Branches)</b>	<b>Sem:</b>	<b>III</b>
<b>Prerequisites:</b>	Basic science	<b>Category:</b>	<b>BSC</b>
<b>Aim:</b>	To understand basic and fundamental engineering knowledge from biology.		
<b>INTRODUCTION.</b>			<b>9</b>
Biological analogy in engineering science, Biological elements-Carbohydrate, protein, amino acids, lipids and nucleic acids structure and function. Primary, secondary, tertiary and quaternary structure of protein. Protein as enzymes, transporter, receptors and structural elements.			
<b>METABOLISM AND ENGINEERING</b>			<b>9</b>
Engineering aspects in thermodynamics of energy transactions, exothermic and endothermic versus endergonic and exergonic reactions. ATP as an energy source, glycolysis, Krebs cycle and photosynthesis. Energy yielding and energy consuming reactions. Enzymes classification, mechanism of enzyme action, enzyme kinetics and kinetic parameters			
<b>GENETICS AND TRANSFORMATION TECHNOLOGY</b>			<b>9</b>
Molecular basis of information transfer. DNA as a genetic material. Concept of genetic code. Mendel's laws, concept of segregation and independent assortment. Concept of allele, Gene mapping, Gene interaction, Epistasis, concepts of recessiveness and dominance and their relativity to programming. Cell multiplication. Phenotype and genotype. Single gene disorders in humans and human genetics.			
<b>CLASSIFICATION AND SYSTEM ENGINEERING</b>			<b>9</b>
Structure, function and relativity to engineering of prokaryotes and eukaryotes. Habitats- aquatic or terrestrial. Molecular taxonomy-three major kingdoms. Microbial species and strains. Identification and classification of microorganisms. Industrial application of microorganisms. Sterilization and media compositions. Growth kinetics.			
<b>SENSOR BIOLOGY AND COMMUNICATION SYSTEMS</b>			<b>9</b>
Sensory system, circulatory system and excretory system and their relativity to communication engineering. Hormonal regulation. General defense mechanism in human. Major human disorder and diseases.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Arthur T. Johnson, CRC Press, New York 2011			
2. Thyagarajan.S., Selvamurugan. N., Rajesh.M.P., Nazeer.R.A., Richard W. Thilagaraj, Barathi.S., and Jaganthan.M.K., "Biology for Engineers", Tata McGraw-Hill, New Delhi, 2012

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Comprehend various biochemical interactions and the structure and function of various biological molecules		
<b>CO2</b>	Explain basic concepts of thermodynamics and energy transactions		
<b>CO3</b>	Classify different aspects of molecular computing		
<b>CO4</b>	Demonstrate an understanding of Mendelian laws of inheritance		
<b>CO5</b>	Describe cellular architecture and utilize these concepts to design an engineering system		
<b>CO6</b>	Recognize fundamental concepts in sensory physiology analogy with communication systems

<b>191ME31</b>	<b>ENGINEERING MECHANICS</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-1-0</b>	<b>3</b>
<b>Programme:</b>	B.E. Civil Engineering	<b>Sem:</b>	<b>III</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To impart a sound knowledge on the applied physics laws in different engineering applications.		
<b>BASICS &amp; STATICS OF PARTICLES</b>			<b>6+3</b>
Introduction – Units and Dimensions – Laws of Mechanics – Lame’s theorem, Parallelogram and triangular Law of forces – Vectors – Vectorial representation of forces and moments – Vector operations: additions, subtraction, dot product, cross product – Coplanar Forces – Resolution and Composition of forces – Equilibrium of a particle – Forces in space – Equilibrium of a particle in space – Equivalent systems of forces – Principle of transmissibility – Single equivalent force.			
<b>EQUILIBRIUM OF RIGID BODIES</b>			<b>6+3</b>
Free body diagram – Types of supports and their reactions – requirements of stable equilibrium –Moments and Couples – Moment of a force about a point and about an axis – Vectorial representation of moments and couples – Scalar components of a moment – Varignon’s theorem – Equilibrium of Rigid bodies in two dimensions – Equilibrium of Rigid bodies in three dimensions – Examples.			
<b>PROPERTIES OF SURFACES AND SOLIDS</b>			<b>6+3</b>
Determination of Areas and Volumes – First moment of area and the Centroid of sections – Rectangle, circle, triangle from integration – T section, I section, - Angle section, Hollow section by using standard formula – second and product moments of plane area – Rectangle, triangle, circle from integration – T section, I section, Angle section, Hollow section by using standard formula – Parallel axis theorem and perpendicular axis theorem – Polar moment of inertia – Principal moments of inertia of plane areas – Principal axes of inertia.			
<b>DYNAMICS OF PARTICLES</b>			<b>6+3</b>
Displacements, Velocity and acceleration, their relationship – Relative motion – Curvilinear motion –Newton’s law – Work Energy Equation of particles.			
<b>FRICITION AND ELEMENTS OF RIGID BODY DYNAMICS</b>			<b>6+3</b>
Frictional force – Laws of Coulomb friction – simple contact friction – Rolling resistance – Belt friction. Translation and Rotation of Rigid Bodies – Velocity and acceleration – General Plane motion.			
			<b>Total Periods</b>
			<b>45</b>
<b>Text books:</b>			
1. Beer, F.P and Johnson Jr. E.R. “Vector Mechanics for Engineers”, Vol. 1 Statics and Vol. 2Dynamics, McGraw-Hill International Edition,(2012)

5. Ashok Gupta, “Interactive Engineering Mechanics – Statics”, Pearson Education Asia Pvt., Ltd.,(2002)			

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Recite the laws of mechanics, Lame's theorem, parallelogram law, triangular law of forces and principle of transmissibility
<b>CO2</b>	Classify types of supports and equilibrium of rigid bodies in three dimensions
<b>CO3</b>	Explain the parallel axis theorem and perpendicular axis theorem
<b>CO4</b>	Analyze moment of inertia and polar moment of inertia of various sections
<b>CO5</b>	Analyze the displacement, velocity and acceleration problems and their relationship with work energy equation of particles
<b>CO6</b>	Analyze the various Frictional forces and general plane motion of rigid bodies

<b>191CE31</b>	<b>SURVEYING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>III</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To make the student aware of various surveying methods and applications to Civil Engineering fields.		
<b>CHAIN AND COMPASS SURVEYING</b>			<b>9</b>
Surveying –Definition, principles and classification –Scale and Conventional signs - Survey instruments - handling and adjustments - Chain surveying- Reciprocal ranging - Setting perpendiculars - well conditioned triangles – Obstacles- Sources and limits of error and their correction –Compass Surveying –Types- Bearings - magnetic and true north, magnetic declination and its variation –Traversing- Local attraction and its elimination.			
<b>LEVELLING AND ITS APPLICATIONS</b>			<b>9</b>
Levelling principles - Levels and staves – Accessories - Temporary and Permanent adjustments - Sensitiveness of bubble tube - Bench marks – Types of levelling – Booking - Reduced levels – Determination - Plotting LS and CS-curvature and refraction corrections – Contour types - Applications.			
<b>TRIANGULATION AND TRILATERATION</b>			<b>9</b>
Theodolitesurvey:Instruments,Measurementofhorizontalandverticalangle;Horizontalandverticalcontrol - methods -triangulation - network- Signals. Baseline - choices - instruments and accessories - extension of base lines - corrections - Satellite station - reduction to centre - Intervisibility of height and distances - Trigonometric leveling - Axis single corrections. Curves. Elements of simple and compound curves – Method of offsettingout–ElementsofReversecurve-Transitioncurve–lengthofcurve–Elementsoftransitioncurve- Vertical curves.			
<b>TACHEOMETRIC SURVEYING</b>			<b>9</b>
Tacheometry principle systems - Tangential-stadia methods - Horizontal and inclined sights – Staff vertical and normal - Fixed and movable hairs - Stadia constants – Anallatic lens - Subtense bar.			
<b>REMOTE SENSING &amp; PHOTOGRAHMTRY</b>			<b>9</b>
Introduction –Electromagnetic Spectrum - interaction of electromagnetic radiation with the atmosphere and earth surface, remote sensing data acquisition - platforms and sensors - visual image interpretation; digital image processing. Basic concepts of photogrammetry - perspective geometry of aerial photograph - relief and tilt displacements –terrestrialphotogrammetry, flight planning - Stereoscopy, ground control extension for photographic mapping- aerial triangulation, radial triangulation, methods; photographic mapping- mapping using paper prints, mapping using stereo plotting instruments, mosaics, map substitutes.			
	<b>Total Periods</b>		<b>45</b>
<b>Text books:</b>			
1. Arora, K.R., “Surveying”, Vol. I, II and III, Standard Book House, 2010. 2. Duggal R.K, “Surveying”, Vol. I & II, Tata McGraw Hill Publishing Company Ltd., New Delhi,2004.			
<b>References:</b>			
1. Bannister A and Raymond S, “Surveying”, Addison Wesley Longman Ltd, England, 2006. 2. Schofield, W. and Breach M., “Engineering Surveying”, 6th Ed., Butterworth-Heinemann, 2007. 3. Kanetkar T.P., “Surveying and Levelling”, Vols. I and II, Standard Publishers, New Delhi2008.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Carry out preliminary surveying to prepare a layout of a given area.		
<b>CO2</b>	Plot LS, CS and Contouring using leveling applications.		
<b>CO3</b>	Execute a theodolite traverse and set out different types of curves.		
<b>CO4</b>	Determine heights and distances using tacheometry surveying		
<b>CO5</b>	Understand the importance of advanced techniques involved in surveying such as Total station and GPS.		
<b>CO6</b>	Explain techniques used in hydrographic surveying with theoretical background

<b>191CE32</b>	<b>ENGINEERING GEOLOGY</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>III</b>
<b>Prerequisites:</b>	Nil	<b>Category:</b>	PCC
<b>Aim:</b>	To impart the concepts of geological agents and their processes		
<b>GENERAL GEOLOGY</b>			<b>9</b>
Earth structure - Lithosphere - Internal structure of the earth - Composition – Scope of Geology in Engineering - Geological Agencies - External Agencies - Weathering, Wind, River, Sea, Landslide - Internal Agencies - Earthquake, Plate Tectonics, Ground Water.			
<b>MINERALS OF THE EARTH'S CRUST</b>			<b>9</b>
Rock Forming Minerals - Physical Properties of Minerals – Quartz group, Feldspar group, Mica - Calcite - Clay Minerals and its importance, Indian resource of Coal and Petroleum.			
<b>ROCKS OF THE EARTH'S CRUST</b>			<b>9</b>
Rocks and their study - Rock Cycle - Igneous Rocks - Sedimentary Rocks - Metamorphic Rocks -Engineering Properties, Uses and Indian Occurrence of the following rocks - Granite, Diorite, Dolerite, Pegmatite, Basalt, Shale, Sandstone, Limestone, Breccia and Conglomerate, Gneiss, Schist, Slate, Quartzite and Marble.			
<b>STRUCTURAL GEOLOGY AND GEOPHYSICAL METHODS</b>			<b>9</b>
Geological maps – attitude of beds, study of structures – folds, faults and joints – relevance to civil engineering. Geophysical methods – Seismic and electrical methods for subsurface investigations.			
<b>GEOLOGICAL INVESTIGATIONS IN CIVIL ENGINEERING</b>			<b>9</b>
Geological conditions necessary for construction of dams, tunnels, buildings, road cuttings- Landslides – Causes and preventions- Improvement of sites-Coastal protection.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Parbin Singh, "Engineering and General Geology", S.K.Kataria& Sons, 2012. 2. DuggalS.K., H.K.Pandey and N.Rawal, "Engineering geology", McGraw Hill EducationPrivate limited,2013.

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Acquire the knowledge of the topographical formation, interior earth, gradational activities and weathering		
<b>CO2</b>	Interpret minerals and rocks and assess its physical, mechanical and engineering properties		
<b>CO3</b>	Determine geological structures and its relevance in civil projects		
<b>CO4</b>	Analyze the surface and subsurface geological structures of the crust, soil and weathered thickness through geophysical exploration and report writing aspects with relevance to civil engineering projects		
<b>CO5</b>	Explain about fault, folds, unconformity and joints which are present in the strata of the earth crest, by which they can able to compare the particular area with their construction site or engineering projects		
<b>CO6</b>	Assess the geological aspects of the site suitability with relevance to the design of civil structures and vice-versa.		

**Mapping with Programme Outcomes:**

<b>191CE33</b>	<b>FLUIDS MECHANICS</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-2</b>	<b>4</b>
<b>Programme:</b>	B.E. Civil Engineering	<b>Sem:</b>	<b>III</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To provide knowledge in the field of Mechanics of Fluids and related areas.		
<b>FLUID PROPERTIES AND HYDROSTATICS</b>			<b>9+6</b>
Density – Viscosity – Surface tension – compressibility – capillarity – Hydrostatic forces on plane – inclined and curved surfaces – buoyancy – Centre of buoyancy – metacenter.			
<b>FLUID KINEMATICS &amp; DYNAMICS</b>			<b>9+6</b>
Control volume – Fluid Kinematics - Types of flows; Steady flow, Unsteady flow, Uniform and Non Uniform flow, Rotational flow, Irrotational flow, 1-D, 2-D, 3-D flows– Boundary layer- Laminar & Turbulent flow - Streamline and Velocity potential lines- Euler and Bernoulli's equations and their applications – moment of momentum			
<b>OPEN CHANNEL FLOW</b>			<b>9+6</b>
Open channel flow – Types and regimes of flow - Velocity distribution in open channel – Wide open channel - Specific Energy – Critical flow concept – specific force – Hydraulic jump – uniform flow and gradually varying flow concepts.– Measurement of pressure – flow – velocity through pipes and open channels.			
<b>DIMENSIONAL ANALYSIS</b>			<b>9+6</b>
Dimensional homogeneity – Raleigh and Buckingham theorems – Non-dimensional numbers – Model laws and distorted models-Unit quantities-Specific quantities.			
<b>TURBINES &amp; PUMPS</b>			<b>9+6</b>
Turbines - Classification - Reaction turbines - Francis turbine, Radial flow turbines, draft tube and cavitation - Propeller and Kaplan turbines - Impulse turbine - Performance of turbine - Specific speed - Centrifugal pumps - Minimum speed to start the pump - Operating characteristics – Reciprocating pump (working principle only).			
			<b>Total Periods</b> <b>45+30</b>
<b>LIST OF EXPERIMENTS</b>			
<ol style="list-style-type: none"> <li>Calibration of orifice for flow measurement in tanks</li> <li>Flow measurement in Open channel using various types of Notches</li> <li>Determination of co-efficient of discharge for venturimeter</li> <li>Calibration of orifice meter to measure the flow of liquid through pipes</li> <li>Computation of friction factor for the given pipe to calculate the head loss in pipe networks</li> <li>Determination of various minor losses in pipes to compute the total headloss</li> <li>Verification of Bernoulli's theorem to apply in flow measuring devices</li> <li>Determination of efficiency of the Francis turbine used for hydropower generation</li> <li>Performance characteristics of Kaplan turbine</li> <li>Performance characteristics of Centrifugal pumps (Constant speed / variable speed)</li> <li>Determination of efficiency of the reciprocating pump to decide its suitability for specific purpose.</li> </ol>			
<b>Text books:</b>

<b>191CE38</b>	<b>SURVEY PRACTICAL</b>					<b>L-T-P</b>	<b>C</b>							
						<b>0-0-3</b>	<b>1</b>							
<b>Programme:</b>	<b>B.E. Civil Engineering</b>					<b>Sem:</b>	<b>III</b>							
<b>Prerequisites:</b>	Nil													
<b>Aim:</b>	The aim of this course is to make the student familiar with geometric principles of surveying.													
<b>LIST OF EXPERIMENTS</b>														
1. Chain traversing.														
2. Compass Traversing-open and closed Traversing.														
3. Determination of reduced level Fly levelling using Dumpy level.														
4. Check levelling.														
5. Plotting LS and CS.														
6. Contouring.														
7. Measurement of horizontal angles by reiteration and repetition and vertical angles.														
8. Theodolite survey traverse.														
9. Trilateration.														
10. Setting out works - Foundation marking														
11. Field observation for and Calculation of azimuth, Latitude and Longitude.														
12. Determination of angles and height measurement using total station.														
13. Determination of area of a given plot using total station														
<b>Total Periods</b> <b>45</b>														
<b>References:</b>														
1. Arora, K.R., "Surveying", Vol. I, II and III, Standard Book House, 2010.														
2. Duggal R.K, "Surveying", Vol. I & II, Tata McGraw Hill Publishing Company Ltd., New														
<b>Course Outcomes:</b>														
At end of this course, the students will be able to														
<b>CO1</b>	Use conventional surveying tools such as chain/tape, compass, plane table, level in the field of Civil Engineering applications such as structural plotting and highway profiling.													
<b>CO2</b>	Apply the procedures involved in field work and to work as a surveying team.													
<b>CO3</b>	Plan a survey appropriately with the skill to understand the surroundings.													
<b>CO4</b>	Take accurate measurements, field booking, plotting and adjustment of errors													
<b>CO5</b>	Plot traverses / sides of building													
<b>CO6</b>	Predict the location of points present in the field and to transfer the same on paper

<b>191HS42</b>	<b>PROBABILITY AND STATISTICS</b>				<b>L-T-P</b>	<b>C</b>					
					<b>2-1-0</b>	<b>3</b>					
<b>Programme:</b>	<b>B.E. / B.Tech. (CIVIL, CSE, EEE, MECH, BIO-TECH &amp; BIO-MEDICAL)</b>	Sem:	<b>III</b>	<b>Category:</b>	<b>BSC</b>						
<b>Prerequisites:</b>	191HS31										
<b>Aim:</b>	To analyze the engineering problems using the techniques and the mathematical skills acquired by studying ODE and PDE uses numerical methods.										
<b>PROBABILITY AND RANDOM VARIABLES</b>						<b>9</b>					
Probability spaces – Conditional probability – Bayes rule - Discrete and continuous random variables – Moments - Moment generating functions and their properties.											
<b>DISCRETE AND CONTINOUS PROBABILITY DISTRIBUTION</b>						<b>9</b>					
Binomial, Poisson, Geometric, Uniform, Exponential, Gamma and normal distributions – Function of Random Variable											
<b>TWO DIMENSIONAL RANDOM VARIABLES</b>						<b>9</b>					
Joint distributions - Marginal and conditional distributions – Covariance - Correlation and Regression - Transformation of random variables - Central limit theorem (for 2-D random variables)											
<b>STATISTICS</b>						<b>9</b>					
Curve fitting by the method of least squares – fitting of Straight lines , Second degree parabolas and more general curves – Test of significance – Large sample test for single proportion , difference of proportions, single mean, difference of means and difference of standard deviations.											
<b>TESTING OF HYPOTHESIS</b>						<b>9</b>					
Sampling distributions – Testing of hypothesis for mean, variance, proportions and differences using Normal, t, Chi-square and F distributions - Tests for independence of attributes and Goodness of fit.											
						<b>Total Periods</b> <b>45</b>					
<b>Text books:</b>

<b>Course Outcomes:</b>											
At end of this course, the students will be able to											
<b>CO1</b>	Solve Probability and discrete and continuous random variables problems										
<b>CO2</b>	Solve problems related to binomial,Poisson, geometric and normal distributions										
<b>CO3</b>	Solve problems related to correlation and regression										
<b>CO4</b>	Solve problems related to curve fitting methods										
<b>CO5</b>	Solve problems related to proportions, single, mean and standard deviations										
<b>CO6</b>	Solve the problems related to sampling distributions , testing of hypothesis for mean.

<b>191CE41</b>	<b>MECHANICS OF SOLIDS-I</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>IV</b>
<b>Prerequisites:</b>	191ME31	<b>Category:</b>	PCC
<b>Aim:</b>	To provide knowledge in the field of Mechanics of Solids.		
<b>CONCEPT OF STRESS AND STRAIN</b>			<b>9</b>
Introduction - Normal stress and strain - Mechanical properties of materials - Elasticity, plasticity and creep - Linear elasticity- Hooke's law - Poisson's ratio - Shear stress and strain - Elastic constants- Allowable stresses and allowable loads - Thermal stresses in compound bars – Stress-strain diagram – Concept of Factor of Safety and permissible stresses.			
<b>COMPLEX STRESSES</b>			<b>9</b>
Components of stress on inclined planes – Expression for stressed element subjected to two normal stresses with shear – Principal stresses and Principal planes – Mohr's circle of stress.			
<b>SHEAR FORCE AND BENDING MOMENT</b>			<b>9</b>
Types of beams – Types of loads and loading diagrams –Shear force and Bending moment – Relationship between loading intensity, shear force and bending moment – Shear force and bending moment diagram for statically determinate beams.			
<b>THEORY OF SIMPLE BENDING</b>			<b>9</b>
Theory of simple bending – Stress distribution due to shear force and bending moment – Design of beams – Beams of uniform strength – Flitched beams			
<b>TORSION AND SPRINGS</b>			<b>9</b>
Torsion of solid and hollow circular shafts – Power transmitted through shafts – Strain energy due to torsion – Combined bending and torsion – Close coiled and open coiled helical springs – Leaf spring, Buffer Spring.			
			<b>Total Periods</b> <b>45</b>

"Strength of Materials", S.Chand and Co, New Delhi,2007.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Analyze the concept of stress and strain relationship		
<b>CO2</b>	Analyze the components of complex stress in all the planes		
<b>CO3</b>	Analyze the shear force and Bending moment for all type of beams		
<b>CO4</b>	Apply theory of simple bending in design of beams		
<b>CO5</b>	Apply theory of torsion in spring and its properties		
<b>CO6</b>	Explain thermal stress in compound bars

<b>191CE42</b>	<b>IRRIGATION ENGINEERING AND HYDROLOGY STRUCTURES</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-1-0</b>	<b>4</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>IV</b>
<b>Prerequisites:</b>	-	<b>Category:</b>	<b>PCC</b>
<b>Aim:</b>	To impart the student aware of hydraulic engineering concepts and methodology		
<b>IRRIGATION PRINCIPLES</b>			12
Need for irrigation – Advantages and ill effects – Development of irrigation — Tamilnadu scenario - Physical properties of soil -Soil moisture characteristics – Retention of water in soils and concept of plant available water – Movement of water into and within the soils – Duty, Delta, Base Period– Factors affecting Duty-Irrigation efficiencies–Consumptive use of water-Irrigation requirements of crops - Standards for irrigation water.			
<b>HYDROLOGY &amp; DESIGN FLOOD ESTIMATION</b>			12
Importance of hydrology – Hydrological cycle – Types of precipitation – Measurement of rainfall by rain gauges – Mean rainfall over a drainage basin – Various methods of computing runoff from its given rainfall – Design flood - Estimating design flood and flood flows.			
<b>DIVERSION AND IMPOUNDING STRUCTURES</b>			12
Head works –Weirs and Barrage –Types of impounding structures - Factors affecting, location of dams -Forces on a dam -Design of Gravity dams- Earth dams, Arch dams – Spillways -Energy dissipaters.			
<b>CANAL IRRIGATION</b>			12
Classification of canals- Alignment of canals – Design of irrigation canals– Regime theories - Canal Head works– Canal regulators - Canal drops – Cross drainage works – Canal Outlet, Escapes –Lining and maintenance of canals – Other methods of Irrigation – Surface and Subsurface methods – Merits and Demerits.			
<b>IRRIGATION WATER MANAGEMENT</b>			12
Modernization techniques – Rehabilitation – Command Area Development - Systems of rice intensification - Water delivery systems - Participatory Irrigation Management - Farmer's organization and turn over – Water users associations - Economic aspects of irrigation.			
			<b>Total Periods</b> 60
<b>Text books:</b>

Asawa, G.L., "Irrigation Engineering", New Age International Publishers, New Delhi, 2009			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Apply principles of irrigation system and standards of irrigation water		
<b>CO2</b>	Explain importance of hydrology and design of flood estimation		
<b>CO3</b>	Discover details of headwork and different types of dams		
<b>CO4</b>	Design canal irrigation and other methods of irrigation		
<b>CO5</b>	Explain modern irrigation techniques and water delivery system		
<b>CO6</b>	Apply modernization techniques in rehabilitation work

<b>191CE43</b>	<b>SOIL MECHANICS AND FOUNDATION ENGINEERING</b>			<b>L-T-P</b>	<b>C</b>
			<b>3-0-0</b>		<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>IV</b>	<b>Category:</b>	<b>PCC</b>
<b>Prerequisites:</b>	Nil				
<b>Aim:</b>	To Provide adequate knowledge of engineering properties of soil & foundation Engineering.				
<b>INTRODUCTION TO SOIL AND WATER FLOW</b>					<b>9</b>
Nature of Soil - Problems with soil – Three phase relation - classification for engineering purposes - BIS Classification system – Soil compaction and consolidation concepts – factors affecting compaction – field compaction methods and laboratory compaction methods. Soil water – Various forms – Capillary rise – Suction – Effective stress concepts in soil – Total, neutral and effective stress distribution in soil -- quick sand condition - Seepage - Introduction to flow nets – properties and uses					
<b>STRESS DISTRIBUTION AND SHEAR STRENGTH</b>					<b>9</b>
Stress distribution in soil media – Boussinesque formula – stress due to line load and Circular and rectangular loaded area - approximate methods - Use of influence charts – Terzaghi's one dimensional consolidation theory – governing differential equation problems on final and time rate of consolidation. Shear strength of cohesive and cohesion less soils - Mohr - Coulomb failure theory – Saturated soil - Strength parameters - Measurement of shear strength, direct shear, Tri-axial compression, UCC and Vane shear tests Suitability and applications.					
<b>SOIL EXPLORATION AND SELECTION OF FOUNDATION</b>					<b>9</b>
Scope and objectives – Methods of exploration- Bore log report – Penetration tests (SPT and SCPT) – Introduction – Location and depth of foundation – codal provisions Data interpretation (Strength parameters and Liquefaction potential) – Selection of foundation based on soil condition- Requirements of a good foundation. Types of foundation – Contact pressure distribution below footings and raft - floating foundation					
<b>SHALLOW FOUNDATION</b>					<b>9</b>
Bearing capacity of shallow foundation on homogeneous deposits – Terzaghi's formula and BIS formula – factors affecting bearing capacity – problems - Settlement – Components of settlement – Determination of settlement of foundations on granular and clay deposits–Allowable settlements–Codal provision– Methodsofminimizingsettlement,differential settlement. - Isolated and combined footings – Types and proportioning - Mat foundation– Types, applications uses and proportioning					
<b>PILE FOUNDATION</b>					<b>9</b>
Types of piles and their function – Factors influencing the selection of pile – Load Carrying capacity of single pile in granular and cohesive soil - Static formula - dynamic formulae (Engineering news and Hiley's) – Negative skin friction – uplift capacity – Group capacity by different methods (Feld's rule, Converse Labarra formula and block failure criterion) – Settlement of pile groups – Forces on pile caps – under reamed piles – Capacity under compression and uplift.					
					<b>Total Periods</b> <b>45</b>
<b>Text books:</b>					
1. Purushothama Raj. P., "Soil Mechanics and Foundation Engineering", 2nd Edition, Pearson Education, 2013. 2. Murthy, V.N.S., "Textbook of Soil Mechanics and Foundation Engineering", CBS Publishers, 2007.

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Explain the behavior of soil with water and water flow
<b>CO2</b>	Identify the stress distribution and settlement in soil
<b>CO3</b>	Apply theory of shear strength and its uses
<b>CO4</b>	Analyze and design of various types of footings and rafts
<b>CO5</b>	Examine the soil exploration and types of foundation
<b>CO6</b>	Summarize factors affecting bearing capacity, problems and in-situ tests for shallow and pile foundation

<b>191CE44</b>	<b>CONSTRUCTION MATERIALS AND TECHNIQUES</b>				<b>L-T-P</b>	<b>C</b>
					<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>IV</b>	<b>Category:</b>	<b>PCC</b>	
<b>Prerequisites:</b>	Nil					
<b>Aim:</b>	To make the student aware of the various construction techniques, practices and the equipment needed for different types of construction activities.					
<b>LOAD BEARING MATERIALS</b>						<b>9</b>
<p><b>Conventional Materials: Stones:</b> classification of rocks – quarrying – dressing – properties – uses of stones – tests for stones. <b>Bricks:</b> composition – manufacturing process – classification – qualities – uses – test for bricks – Paving bricks, Hollow bricks – Terracotta, Stoneware, Earthenware Glazing and their uses – Glazed Ceramic tiles, Fully vitrified tiles, ceramic sanitary appliances, Stoneware pipes and fittings.</p> <p><b>Cement:</b> Introduction – ingredients – manufacturing process – dry and wet process – types of cement – properties – uses – tests for cement. <b>Mortar:</b> functions – requirements – types – properties – uses – tests on mortar. <b>Concrete:</b> Ingredients – functions – w/c ratio – grades – admixtures – test on concrete – properties – uses.</p>						
<b>NON LOAD BEARING MATERIALS</b>						<b>9</b>
<p><b>Paints:</b> Functions – constituents – characteristics – selection – types of paints – defects. <b>Varnishes:</b> Elements – properties – types. <b>Distempers:</b> composition – properties. <b>Asbestos:</b> Properties – uses – asbestos cements products. <b>Glass:</b> Constituents – composition – classification – properties – market form – uses. <b>Plastic:</b> constituents – classification – properties – uses.</p> <p><b>Ferrous metals</b> - Iron and steel, basic metallurgy, composition and grades, market forms and heat treatment - Steel as reinforcement - Corrosion of metals and protection.</p> <p><b>Non-ferrous metals:</b> Aluminum, glass products and their applications - Heat insulating materials - Acoustic materials and components.</p>						
<b>INTRODUCTION TO MATERIAL TESTING</b>						<b>9</b>
<p>Mechanical behavior and mechanical characteristics; Elasticity – principle and characteristics; Plastic deformation of metals; Tensile test – standards for different material (brittle, quasi-brittle, elastic and so on) True stress – strain interpretation of tensile test; hardness tests; Bending and torsion test; strength of ceramic; Internal friction, creep – fundaments and characteristics; Brittle fracture of steel – temperature transition approach; Background of fracture mechanics; Discussion of fracture toughness testing – different materials; concept of fatigue of materials; Structural integrity assessment procedure and fracture mechanics.</p>						
<b>CONSTRUCTION PRACTICES</b>						<b>9</b>
<p>Specifications, details and sequence of activities and construction co-ordination – Site Clearance – Marking – Earthwork - masonry – stone masonry – Bond in masonry - concrete hollow block masonry – flooring – damp proof courses – construction joints – movement and expansion joints – Building foundations – basements – temporary shed – centering and shuttering – slip forms – scaffoldings – de-shuttering forms – laying brick – weather and water proof – roof finishes – acoustic and fire protection.</p>						
<b>SUB STRUCTURE AND SUPER CONSTRUCTION</b>						<b>9</b>
<p>Techniques of Box jacking – Pipe Jacking -under water construction of diaphragm walls and basement- Tunneling techniques – Piling techniques - well and caisson - sinking cofferdam – cable anchoring and grouting-driving diaphragm walls, sheet piles - shoring for deep cutting - well points -Dewatering and stand by Plant equipment for underground open excavation. Launching girders, bridge decks, off shore platforms — in-situ pre-stressing in high rise structures, Material handling - erecting light weight components on tall structures - Erection of articulated structures, braced domes and space decks.</p>

4. Shetty, M.S, Concrete Technology, Theory and Practice, S. Chand and Company Ltd, New Delhi,2005.
5. National Building Code of India, Part V, "Building Materials",2005.

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Classify Load bearing materials and applications
<b>CO2</b>	Classify Non load bearing materials and compositions
<b>CO3</b>	Categorize types of tests available for different materials
<b>CO4</b>	Practices that are followed in construction site
<b>CO5</b>	Design Substructure construction and dewatering methods
<b>CO6</b>	Create Special structures like articulated structures, braced domes and special decks

**Mapping with Programme Outcomes:**

Course Outcomes	Program Outcomes (POs)												Program Specific Outcomes (PSOs)			
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PS O1	PS O2	PS O3	PS O4

<b>191CS46</b>	<b>PYTHON PROGRAMMING</b>			<b>L-T-P</b>	<b>C</b>
			<b>3-0-2</b>		<b>4</b>
<b>Programme:</b>	CIVIL/EEE	<b>Sem:</b>	<b>IV</b>	<b>Category:</b>	ESC
<b>Prerequisites:</b>	Nil				
<b>Aim:</b>	To review the ideas of computer science, programming, and problem-solving ability in python.				
<b>INTRODUCTION</b>					9+3
Python Overview - Comments - Identifiers - Keywords - Variables - Data types - Operators - Statement and Expressions - String Operations - Boolean Expressions - Control Statements - Iterations - Input from Keyboard.					
<b>FUNCTIONS IN PYTHON</b>					9+3
Built-in Functions - Composition of Functions - User defined functions - Parameters and Arguments - Function calls - The return statement - Python recursive function - Anonymous Functions.					
<b>STRINGS AND LISTS</b>					9+3
Strings - Compound Data Types - String slices - String Traversal - Escape Characters - String formatting operator, functions - Lists-Traversing a List - Built-in list operators, methods.					
<b>CLASSES AND OBJECTS</b>					9+3
Class, Objects in python - Built-in Class attributes - Inheritance - Method Overriding - Data Encapsulation - Data hiding.					
<b>DICTIONARIES AND FILES</b>					9+3
Tables-Values - Operations - Functions - Dictionaries - Values - Update - Properties Operations - Files - Text Files - Exceptions - Exception with arguments - User defined Exceptions.					
					<b>Total Periods</b> <b>60</b>
<b>Lab Component:</b>					
<b>Write the programs for the following topics using python:</b>					
<ol style="list-style-type: none"> <li>1. Operators</li> <li>2. Control Statements</li> <li>3. Built-In and User defined functions</li> <li>4. String functions</li> <li>5. List functions.</li> <li>6. Classes and their attributes.</li> <li>7. Inheritance and method overriding.</li> <li>8. Data Encapsulation and hiding.</li> <li>9. File Operations and Exception handling.</li> </ol>

<b>Course Outcomes:</b>										
At end of this course, the students will be able to										
<b>CO1</b>	Extract basic material properties of wood, aluminum and steel such as evaluate Young modulus, tensional strength, hardness and tensile strength of given specimens from simple mechanical tests									
<b>CO2</b>	Demonstrate the major equipment such as, Universal Testing Machine, Torsion Testing Machine									
<b>CO3</b>	Appraise the flexural behavior of simply supported beam.									
<b>CO4</b>	Interpret stiffness of open coiled and closed coiled springs									
<b>CO5</b>	Estimate the compressive strength of concrete cubes and bricks and Pavement block									
<b>CO6</b>	Analyze the use of deflectometer, extensometer, compressometer and strain gauges

<b>191CE48</b>	<b>SURVEY CAMP</b>						<b>L-T-P</b>	<b>C</b>
							<b>0-0-2</b>	<b>1</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>						<b>Sem:</b>	<b>VII</b>
<b>Prerequisites:</b>	191CE47						<b>Category:</b>	<b>PCC</b>
<b>Aim:</b>	To make the student capable of drawing site plans and maps independently of a chunk of land of earth surface.							
<b>LIST OF EXPERIMENTS</b>								
1. Study of theodolite								
2. Measurement of horizontal angles by reiteration and repetition and vertical angles								
3. Theodolite survey traverse								
4. Heights and distances - Triangulation - Single plane method.								
5. Trilateration.								
6. Tacheometry - Tangential system - Stadia system - Subtense system.								
7. Setting out works - Foundation marking - Simple curve (right/left-handed) – Transition curve.								
8. Field observation for and Calculation of azimuth, Latitude and Longitude								
9. Calculating and plotting the given area using Total Station								
10. Calculating and plotting the given area using GPS.								
11. Building Plan and Foundation Marking.								
							<b>Total Periods</b>	<b>45</b>

3. Duggal R.K, "Surveying", Vol. I & II, Tata McGraw Hill Publishing Company Ltd., New Delhi,2004.								
<b>Course Outcomes:</b>								
At end of this course, the students will be able to								
<b>CO1</b>	Use the theodolite along with chain, tape on the field.							
<b>CO2</b>	Apply field procedures in basic types of survey.							
<b>CO3</b>	Defend accurate measurements using different surveying instruments.							
<b>CO4</b>	Use geometric and trigonometric calculations of basic surveying.							
<b>CO5</b>	Build advanced surveying instruments like total station and GPS.							
<b>CO6</b>	List the different types of surveying techniques.

<b>191CE51</b>	<b>MECHANICS OF SOLIDS - II</b>			<b>L-T-P</b>	<b>C</b>
				<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>V</b>	<b>Category:</b>	<b>PCC</b>
<b>Prerequisites:</b>	191CE41				
<b>Aim:</b>	To provide adequate knowledge on engineering properties of solids				
<b>DELECTION OF DETERMINATE BEAMS</b>					<b>9</b>
Governing differential equation – Macaulay’s method – Moment area method – Conjugate beam method.					
<b>STATICALLY INDETERMINATE BEAMS</b>					<b>9</b>
Analysis of propped cantilever and fixed beams - Theorem of three moments – Analysis of continuous beams - slope & deflections in continuous beams.					
<b>COLUMNS AND CYLINDRES</b>					<b>9</b>
Euler’s theory of long columns – Rankine-Gordon formula for eccentrically loaded columns – Eccentrically loaded short columns – middle third rule – Thick cylinders – Compound cylinders - Thin Cylinders and Shell.					
<b>THEORIES OF FAILURE</b>					<b>9</b>
Study on maximum stress and strain – Maximum shear stress – Maximum strain energy - Maximum energy of distortion – Octahedral shear stress – Theories of failure and their importance in design.					
<b>UNSYMMETRICAL BENDING AND SHEAR CENTRE</b>					<b>9</b>
Significance of shear centre – Location of shear centre for thin walled open sections with one axis of symmetry – Analysis of stresses and deflections due to unsymmetrical bending.					
					<b>Total Periods 45</b>
<b>Text books:</b>					
1. Rajput R.K. Strength of Materials, S.Chand&company Ltd., New Delhi –2006. 2. Srinath, L.S. Advanced mechanics and solids, Tata-McGraw Hill publishing company ltd,2008.					
<b>References:</b>

PunmiaB.C. “Theory of Structures (SMTS) Vol 1&II”, Laxmi publishing PvtLtd,New Delhi,2004.					
<b>Course Outcomes:</b>					
At end of this course, the students will be able to					
<b>CO1</b>	Examine the determinate beams for their deflection.				
<b>CO2</b>	Analyse the Statically Indeterminate beams to interpret the slope and deflection				
<b>CO3</b>	Explain the behavior of column for combined bending and axial loading and to analyze the thin & thick cylinders.				
<b>CO4</b>	Examine the different failure criterion and predict failure given the stress state of a body.				
<b>CO5</b>	Identify the shear center and to analyze stresses due to unsymmetrical bending.				
<b>CO6</b>	Inspect strain energy and impact loading

<b>191CE52</b>	<b>STRUCTURAL ANALYSIS - I</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-1-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>V</b>
<b>Prerequisites:</b>	191CE41	<b>Category:</b>	PCC
<b>Aim:</b>	To make the students conversant with classical method of analysis.		
<b>FUNDAMENTAL OF STRUCTURAL ANALYSIS</b>			<b>6+3</b>
Determination of static indeterminacy and kinematic indeterminacy – Deficiency for beams, frames and pin-jointed trusses – Behaviour of structures – Principle of superposition – Analysis of pin-jointed space trusses by method of Tension coefficient.			
<b>STRAIN ENERGY METHOD</b>			<b>6+3</b>
Static indeterminacy - Strain energy method - analysis of indeterminate structures, beams, pin jointed and rigid jointed structures - temperature effect - bending moment and shear force diagram.			
<b>SLOPE DEFLECTION METHOD</b>			<b>6+3</b>
Kinematic indeterminacy- Slope deflection method - analysis of continuous beams and portals - bending moment and shear force diagram.			
<b>MOMENT DISTRIBUTION METHOD</b>			<b>6+3</b>
Moment distribution method - analysis of continuous beams and portals - bending moment and shear force diagram.			
<b>THEOREM OF THREE MOMENTS</b>			<b>6+3</b>
Static indeterminacy - Theorem of three moments- analysis of propped cantilevers- fixed & continuous beam- bending moment and shear force diagram.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Vazirani & Ratwani (2003), Analysis of Structures, Vol. 1 & II , Khanna publishers.			
<b>References:</b>			
1. S.Ramamrutham (2004), Theory of structures, Dhanpat Raipublications. 2. C.S.Reddy (2002), Structural Analysis, TataMc-GrawHill. 3. L.S.Negi (2003), Structural Analysis, Tata Mc-GrawHill. 4. <b>191CE53</b>	<b>ENVIRONMENTAL ENGINEERING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>V</b>
<b>Prerequisites:</b>	Nil	<b>Category:</b>	<b>PCC</b>
<b>Aim:</b>	To impart the basic knowledge on various stages of works involved in planning, designing and execution of underground drainage system for a town/city.		
<b>INTRODUCTION</b>			<b>6+3</b>
Objectives & Components of public water supply scheme – Design period – Water quality parameters– analysis and standards – Population forecasts – Water demands and its variation –Sewage and sullage - Physical chemical & Biological quality of sewage – Sources of wastewater generation –Estimation of sanitary sewage flow & storm runoff – Effluent standards.			
<b>TRANSMISSION OF WATER AND SEWAGE</b>			<b>6+3</b>
Different categories of pipes & materials used in transmission – Application of nomograms in the design – Laying, jointing and testing of pipes – Pumping of water and selection of pumps – HP requirements and operating point of pumps – Pumping station and its requirement – Various valves used in transmission - Hydraulic design of sewer – Sewer appurtenances– Maintenance of sewer– Computer applications.			
<b>TREATMENT AND DISTRIBUTION OF WATER</b>			<b>6+3</b>
Unit operations and unit processes –Objectives, principles, operation, analysis and design of flash mixer, flocculator. Sedimentation and rapid sand filtration units - Objectives and principles of disinfection – Chlorination, aeration, water softening, iron and manganese removal and fluoride removal. Methods and systems of distribution of water – different types of distribution network – Analysis and design of distribution network – Maintenance and leak detection – Corrosion and its control			
<b>TREATMENT OF SEWAGE</b>			<b>6+3</b>
Selection of treatment processes – Onsite sanitation – Septic tank, Grey water harvesting –Principles, functions design and drawing of screen, grit chambers and primary sedimentation tanks -Activated Sludge Process and Trickling filter – ponds and lagoons – Oxidation ditches, UASB – Waste Stabilization Ponds – Recent Advances in Sewage Treatment			
<b>DISPOSAL OF SEWAGE AND SLUDGE</b>			<b>6+3</b>
Standards for Disposal – Self-purification of surface water bodies – Oxygen sag curve – Land disposal – Sewage farming – Deep well injection – Soil dispersion system – Sludge characterization – Thickening – Sludge digestion – Biogas recovery – Sludge Conditioning and Dewatering – disposal – Advances in Sludge Treatment and disposal.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Metcalf & Eddy: “Wastewater Engineering Treatment and Reuse”, Tata McGraw Hill Publishers, New Delhi,2010. 2. Garg S.K. “Sewage Disposal and Air Pollution Engineering”, Khanna Publishers NewDelhi,2008.			
<b>References:</b>

Asawa, G.L., “Irrigation Engineering”, New Age International Publishers, NewDelhi,2000			

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Explain the transmission of water and sewage
<b>CO2</b>	Illustrate the treatment and distribution of water
<b>CO3</b>	Analyse and design primary treatment of sewage
<b>CO4</b>	Design the necessary treatment units for disposal of sewage and sludge
<b>CO5</b>	Identify the suitable mode of environmental sanitation
<b>CO6</b>	Analyze the concepts of biogas recovery, dewatering technique

<b>191CE54</b>	<b>DESIGN OF REINFORCED CONCRETE ELEMENTS</b>			<b>L-T-P</b>	<b>C</b>
			<b>2-1-0</b>		<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>V</b>	<b>Category:</b>	<b>PCC</b>
<b>Prerequisites:</b>	Nil				
<b>Aim:</b>	The aim of this course is to make the students to design the RC elements in limit state method				
<b>LIMIT STATE DESIGN FOR FLEXURE</b>					<b>6+3</b>
Fundamentals – Types of reinforcement specifications as per IS 1786:2008 – Stress-Strain curve for deformed bars – Concept of Working Stress Design (WSD) and Limit State Design (LSD) – Difference between WSD and LSD – Characteristics loads and strengths –Partial Safety factor – Various limit states. Design of singly anddoublyreinforcedrectangularandflangedsections–DesignofLintels–Designofcontinuousbeams using B.M and S.F co-efficient as per IS code – detailing.					
<b>DESIGN OF SLABS</b>					<b>6+3</b>
Types of slabs – I.S code regulations – stiffness requirements – Design of One Way simply supported and continuous slab using B.M and S.F co-efficient as per I.S code – Principles of Rankine – Grashof's method– Design of Two way simply supported and continuous slab as per IS code. Design of waist slab for dog legged staircase – Detailing of Tread-Riser type staircase.					
<b>DESIGN FOR BOND, ANCHORAGE, SHEAR AND TORSION</b>					<b>6+3</b>
Behaviour of RC members in bond and anchorage – Curtailment of reinforcement - Behaviour of RC beams in shear and torsion - Design of RC members for combined bending, shear and torsion. I.S code provisions for the design of Beams – Detailing.					
<b>DESIGN OF COLUMNS</b>					<b>6+3</b>
IS code regulations - Design of short Rectangular and circular columns subjected to axial compressive load - Design of short columns subjected to combined axial compressive load and uniaxial and biaxial bending moments using Design Aids (SP16).					
<b>DESIGN OF FOOTING</b>					<b>6+3</b>
Design of wall footing – Design of Isolated, square and rectangular footings – Combined rectangular and trapezoidal footing –Design of pile and raft foundation.					
					<b>Total Periods</b> 45
<b>Text books:</b>

<b>191CE55</b>	<b>HIGHWAY AND RAILWAY ENGINEERING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-2</b>	<b>4</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>V</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To make the students familiar with principles of highway and Railway Planning and Design.		
<b>HIGHWAY PLANNING AND ALIGNMENT</b>			<b>9+ 3</b>
Highway Development in India - Jayakar Committee Recommendations and Realizations, Twenty-year Road Development Plans- Concepts of ongoing Highway Development Programmes. Requirements of Ideal Alignment, Factors Controlling Highway Alignment Engineering Surveys for Alignment - Conventional Methods and Modern Methods (Remote Sensing, GIS and GPS techniques) -Classification and Cross Section of Urban and Rural Roads (IRC), Highway Cross Sectional Elements -Traffic Signals.			
<b>GEOMETRIC DESIGN OF HIGHWAYS</b>			<b>9+ 3</b>
Design of Horizontal Alignment – Horizontal Curves Super elevation, Widening of Pavements on Horizontal Curves and Transition Curves Design of Vertical Alignments – Rolling, Limiting, Exceptional and Minimum Gradients, Summit and Valley Curves-Sight Distances – Factors affecting Sight Distances, PIEV theory, Stopping Sight Distance (SSD), Overtaking Sight Distance (OSD), Sight Distance at Intersections, Intermediate Sight Distance and Illumination Sight Distance [Derivations and Problems in SSD and OSD] - Geometric Design of Hill Roads [IRC Standards Only].			
<b>HIGHWAY MATERIALS AND CONSTRUCTION PRACTICE</b>			<b>9+ 3</b>
Desirable Properties and Testing of Highway Materials: Soil – California Bearing Ratio Test, Field Density Test - Aggregate - Crushing, Abrasion, Impact Tests, Water absorption, Flakiness and Elongation indices and Stone polishing value test - Bitumen - Penetration, Ductility, Viscosity, Binder content and Softening point Tests. - Construction Practice - Water Bound Macadam Road, Bituminous Road and Cement Concrete Road [as per IRC and MORTH specifications] - Highway Drainage [IRC Recommendations].			
<b>RAILWAY COMPONENTS AND TRACK CONSTRUCTION</b>			<b>9+ 3</b>
Comparison of railway and highway transport – Organization of Indian railways- Railway terminology – Wheels – Rails – Sections – Length – Failures, wear on rails – Long welded rails – Rail joints – Creep – Effects – Remedies – Sleepers – Track fitting and fastenings – Ballast- Gradients – Speed, degree of curves, super elevation and cant deficiency – Negative super elevation – Curves – Points and crossings–Necessity.			
<b>RAILWAY OPERATION AND MAINTENANCE</b>			<b>9+ 3</b>
Stations and yards – Requirements, classification, layout of station – Platform – Loops, siding and level crossing – Loco sheds – Derailing switches, Fouling marks, Butter stop – Sand hump – Signaling – Object engineering principles – Classification and types – interlocking of signals and points.			
			<b>Total Periods</b> <b>60</b>
<b>List of Experiments</b>			
<ol style="list-style-type: none"> <li>1. Softeningpoint</li> <li>2. Penetration test onBitumen</li> <li>3. Specific gravity test on Bitumen</li> <li>4. Determination of Aggregate impact value</li> <li>5. Aggregate crushing strength test</li> </ol>			
<b>Text books:</b>			
1. Khanna K and Justo C E G, Veeraragavan A “Highway Engineering”, 10 <sup>th</sup> Edition, 2015.

- 3. Bureau of Indian Standards (BIS) Publications on Highway Materials.
- 4. Specifications for Road and Bridges, MORTH(India).
- 5. Kadiyali L R, Principles and Practice of Highway Engineering, Khanna Technical Publications, Delhi, 5<sup>th</sup> Edition.

**Course Outcomes:**

At end of this course, the students will be able to

- |            |   |
|------------|---|
| <b>CO1</b> | Examine the highway planning and alignment.                   |
| <b>CO2</b> | Analyze and design the geometric design of highway alignment. |
| <b>CO3</b> | Explain the properties and characteristics of bitumen.        |
| <b>CO4</b> | Analyze and design the various pavement sections.             |
| <b>CO5</b> | Illustrate railway components and track construction          |
| <b>CO6</b> | Infer various railway operation and maintenance               |

<b>191CE57</b>	<b>ENVIRONMENTAL ENGINEERING LABORATORY</b>	<b>L-T-P</b>	<b>C</b>
		<b>0-0-4</b>	<b>2</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>V</b>
<b>Prerequisites:</b>	191CE53	<b>Category:</b>	PCC
<b>Aim:</b>	This laboratory course work is intended to impart hands on training in evaluating the water Quality parameters, wastewater characteristics.		
<b>List of Experiments</b>			
1.	Sampling and preservation methods and significance of characterization of water and wastewater.		
2.	Determination of i) pH and turbidity ii) Hardness		
3.	Determination of fluorides in drinking water - Spectro photometric analysis.		
4.	Determination of residual chlorine		
5.	Determination of Chlorides.		
6.	Determination of Ammonia Nitrogen		
7.	Determination of Sulphate in water sample.		
8.	Determination of Optimum Coagulant Dosage		
9.	Determination of Nitrates- Spectro photometric analysis.		
10.	Determination of chlorination of water.		
11.	Determination of Dissolved oxygen in drinking water.		
12.	Determination of Total solids, suspended solids, Dissolved solids, organic solids, inorganic solids in water and wastewater samples		
13.	Determination of BOD.		
14.	Determination of COD.		
15.	Introduction to Bacteriological Analysis (Demonstrationonly)		
			<b>Total Periods</b> 45

10. IS 3025:Part 44:1993 Method of sampling and test (Physical and Chemical) for water and wastewater: Biochemical Oxygen Demand (BOD)

**Course Outcomes:**

At end of this course, the students will be able to

- |            |  |
|------------|--|
| <b>CO1</b> | Find pH and turbidity of water                               |
| <b>CO2</b> | Explain the water quality parameters                         |
| <b>CO3</b> | Estimate the BOD and COD of water sample                     |
| <b>CO4</b> | Inspect the chemical characteristics of Water and Wastewater |
| <b>CO5</b> | Test for Sodium in water samples using Flame photometer      |
| <b>CO6</b> | Demonstrate water sample for its bacteriological analysis    |

<b>191CE58</b>	<b>SOIL MECHANICS LABORATORY</b>	<b>L-T-P</b>	<b>C</b>
		<b>0-0-4</b>	<b>2</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b> V	<b>Category:</b> PCC
<b>Prerequisites:</b>	191CE43		
<b>Aim:</b>	The aim of this course is to make the students to practice and get familiar with the properties of soil.		
<b>LIST OF EXPERIMENTS</b>			
1. Grain size distribution – Sieveanalysis			
2. Grain size distribution – Hydrometeranalysis			
3. Determination of Specific gravity of soilgrains			
4. Relative density of sands			
5. Atterberg limitstest			
6. Determination of moisture - Density relationship using standard Proctortest.			
7. Permeability determination (constant head and falling headmethods)			
8. Determination of shear strengthparameters.			
9. Direct shear test on cohesion less soil			
10. Unconfined compression test on cohesivesoil			
11. Tri-axial compression test (demonstrationonly)			
12. One dimensional consolidation test (Demonstrationonly)			
13. Field density test (Core cutter and sand replacementmethods)			
14. Standard Penetration Test.			
		<b>Total Periods</b>	45

2. Saibaba Reddy, E. Ramasastri, K. "Measurement of Engineering Properties of Soils", New Age International (P) Limited Publishers, New Delhi, 2002.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Classify the soil based on index and engineering characteristics		
<b>CO2</b>	Evaluate the shear strength parameters for different types of soils		
<b>CO3</b>	Examine the consolidation and permeability characteristics of soil		
<b>CO4</b>	Analyze the bearing capacity of soil from field exploration		
<b>CO5</b>	Estimate the density of soil using field test		
<b>CO6</b>	Demonstrate one dimensional consolidation test

<b>191HS57</b>	<b>Business English</b>				<b>L-T-P</b>	<b>C</b>						
				<b>0-0-2</b>	<b>-</b>							
<b>Programme:</b>	<b>B.E. Civil Engineering</b>				<b>Sem:</b>	<b>III</b>						
<b>Prerequisites:</b>	191HS41				<b>Category:</b>							
<b>Aim:</b>	To Improve learner's Communication Skills in English											
<b>UNIT I</b>												
Elements of effective presentation – Structure of presentation – Presentation tools – Voice Modulation – Audience analysis – Body language – Video samples												
<b>UNIT II</b>												
Time management – Articulateness – Assertiveness – Psychometrics – Innovation and Creativity – Stress Management & Poise – Video Samples												
<b>UNIT III</b>												
Covering letter – strategies to write, resume and it's various kinds												
<b>Course Outcomes:</b>												
At end of this course, the students will be able to												
<b>CO1</b>	Train the students in Language Skills, Soft Skills, Inter Personal Skills, Decision Making and Business Communication											
<b>CO2</b>	Competent in Presentation skill											
<b>CO3</b>	Imbibe the knowledge of effective classroom speaking and presentation											
<b>CO4</b>	Provide opportunities to learners to practice their communicative skills to become proficient users of English											
<b>CO5</b>	Write job applications											
<b>CO6</b>	Acquire knowledge about the various principles of communication

<b>191CE61</b>	<b>STRUCTURAL ANALYSIS - II</b>				<b>L-T-P</b>	<b>C</b>
				<b>2-1-0</b>		<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>VI</b>	<b>Category:</b>	<b>PCC</b>	
<b>Prerequisites:</b>	191CE52					
<b>Aim:</b>	To gain knowledge about analytical skills for finding the forces and moments in the structure.					
<b>INFLUENCE LINE</b>						<b>6+3</b>
Influence line - influence lines for bending moment and shear force, Muller-Breslau's principle,determinate and indeterminate beams - Maxwell's reciprocal theorem.						
<b>ANALYSIS OF ARCHES</b>						<b>6+3</b>
Two hinged and three hinged parabolic arches- circular arches, cables - tension forces in towers - influence line for horizontal thrust and bending moment.						
<b>FLEXIBILITY MATRIX METHOD</b>						<b>6+3</b>
Concept of flexibility matrix - analysis of continuous beams - plane frames and pin jointed plane trusses.						
<b>STIFFNESS MATRIX METHOD</b>						<b>6+3</b>
Stiffness matrix for beam element - analysis of continuous beams - plane frames & pin jointed plane Trusses						
<b>PLASTIC ANALYSIS</b>						<b>6+3</b>
Plastic moment of resistance - shape factor, collapse load - analysis of continuous beams and portals – limiting conditions for applications						
						<b>Total Periods</b> <b>45</b>
<b>Text books:</b>

<b>Course Outcomes:</b>						
At end of this course, the students will be able to						
<b>CO1</b>	Illustrate the concepts of ILD and moving loads on determinate structures					
<b>CO2</b>	Analyze three hinged arches of parabolic profiles					
<b>CO3</b>	Analyze three hinged arches of circular profiles					
<b>CO4</b>	Make use of Matrix Flexibility method to analyze the indeterminate pin jointed plane frames, continuous beams and rigid frames					
<b>CO5</b>	Make use of Matrix Stiffness method to analyze the indeterminate pin jointed plane frames, continuous beams and rigid frames					
<b>CO6</b>	Inspect indeterminate beams and frames for its plastic moment capacity.

<b>191CE62</b>	<b>DESIGN OF STEEL STRUCTURES</b>			<b>L-T-P</b>	<b>C</b>
			<b>2-1-0</b>		<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>VI</b>	<b>Category:</b>	<b>PCC</b>
<b>Prerequisites:</b>	Nil				
<b>Aim:</b>	To make the students familiar with the design of steel members				
<b>STRUCTURAL STEEL CONNECTIONS</b>				<b>6+3</b>	
Properties of steel – Structural steel sections – Limit State Design Concepts – Loads on Structures – Metal joining methods using rivets, welding, bolting – Design of bolted and welded joints – Eccentric connections - Efficiency of joints – High Tension bolts					
<b>TENSION MEMBERS</b>				<b>6+3</b>	
Types of sections – Net area – Net effective sections for angles and Tee in tension – Design of connections in tension members – Use of lug angles – Design of tension splice – Concept of shear lag					
<b>COMPRESSION MEMBERS</b>				<b>6+3</b>	
Types of compression members – Theory of columns – Basis of current codal provision for compression member design – Slenderness ratio – Design of single section and compound section compression members – Design of lacing and battening type columns – Design of column bases – Gusseted base					
<b>BEAMS</b>				<b>6+3</b>	
Design of laterally supported and unsupported beams – Built up beams – Beams subjected to biaxial bending – Design of plate girders riveted and welded – Intermediate and bearing stiffeners – Web splices – Design of beam columns					
<b>ROOF TRUSSES AND INDUSTRIAL STRUCTURES</b>				<b>6+3</b>	
Roof trusses – Roof and side coverings – Design loads, design of purlin and elements of truss; end bearing – Design of steel chimney.					
					<b>Total Periods</b> 45
Text books:					
1.Gambhir. M.L., "Fundamentals of Structural Steel Design", McGraw Hill Education India Pvt. Ltd.,2013. 2.Subramanian.N, "Design of Steel Structures", Oxford University Press, New Delhi,2013.					
References:

Ltd.,2009. 4.Shah.V.L. and Veena Gore, "Limit State Design of Steel Structures", IS 800–2007 Structures Publications, 2009. 5.IS800:2007, General Construction in Steel - Code of Practice, (Third Revision), Bureau of IndianStandards, New Delhi, 2007.					
Course Outcomes:					
At end of this course, the students will be able to					
CO1	Design common bolted and welded connections for steel structures				
CO2	Outline the design concepts of axially loaded columns and column base connections.				
CO3	Design tension members and understand the effect of shear lag.				
CO4	Design various industrial steel structures				
CO5	Design Roof trusses and purlins				
CO6	Design self-supporting steel chimney

<b>191CE63</b>	<b>CONCRETE TECHNOLOGY</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>VI</b>
<b>Prerequisites:</b>	191CE44	<b>Category:</b>	PCC
<b>Aim:</b>	To impart the knowledge about concrete making materials, properties of fresh and hardened Concrete, special concretes, mix design and non-destructive testing.		
<b>CONCRETE</b>			<b>9</b>
Fresh concrete - Constituent materials – Cement – Manufacturing and chemical composition - Types and grades - Mechanism of hydration - Properties and tests - Aggregates - Water – Concrete manufacturing stages - Workability - Concepts and tests; Hardened concrete - Properties and tests.			
<b>CHEMICAL AND MINERAL ADMIXTURES</b>			<b>9</b>
Necessity - Types - Chemical admixtures with specific properties - Accelerators - Retarders -Plasticizers and Super plasticizers - Water proofers - Mineral admixtures - Fly ash - Slag - Micro and Nano silica - Mineral additives and fillers and their effects on concrete properties.			
<b>MIX DESIGN</b>			<b>9</b>
Concept and principles – Influencing factors - Types and methods - Design practice of ACI, British and IS method - Variability in test results - Sampling and acceptance criteria - Quality control - Software for mix design.			
<b>DESTRUCTIVE AND NON-DESTRUCTIVE TESTS</b>			<b>9</b>
Creep of concrete - Shrinkage and thermal effects on concrete - Permeability - Air and water permeability tests &methods - Durability of concrete - Corrosion - Remedial measures - Destructive tests - NDT - Rebound Hammer - UPV - Corrosions Cell test – RCPT			
<b>SPECIAL CONCRETES AND CONCRETING METHODS</b>			<b>9</b>
Light weight concrete - Fibre reinforced concrete - Polymer concrete - Ferro-cement - Ready mix concrete- Self compacting concrete - High strength concrete - High performance concrete - Roller compacted concrete - Bioandbacterialconcrete-Smartconcrete-Extremeweatherconcreting-Vacuumdewateringconcreting- Underwater concreting - Guniting and shotcreting .

<b>Text books:</b>			
1. Shetty,M.S, "Concrete Technology", S.Chand and Company Ltd, New Delhi,2003. 2. Santhakumar,A.R; "Concrete Technology" , Oxford University Press, New Delhi,2007.			
<b>References:</b>			
1. Gambir, M.L; "Concrete Technology", 3rd Edition, Tata McGraw Hill Publishing Co Ltd, New Delhi, 2007. 2. Gupta.B.L., Amit Gupta, "Concrete Technology", Jain Book Agency,2010. 3. IS10262-1982 Recommended Guidelines for Concrete Mix Design, Bureau of Indian Standards, New Delhi.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Examine the concrete materials as per IS code.		
<b>CO2</b>	Explain the different types and necessity of admixtures.		
<b>CO3</b>	Design concrete mix as per ACI, British and IS methods.		
<b>CO4</b>	Demonstrate the destructive tests of hardened concrete.		
<b>CO5</b>	Demonstrate the non-destructive tests of hardened concrete.		
<b>CO6</b>	Design special concretes and explain their specific applications.

<b>191CE64</b>	<b>DESIGN OF REINFORCED CONCRETE STRUCTURES AND DETAILING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-2</b>	<b>4</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>VI</b>
<b>Prerequisites:</b>	191CE54	<b>Category:</b>	PCC
<b>Aim:</b>	To make the students familiar with the design of RC structures and detailing.		
<b>YIELD LINE THEORY</b>			<b>9+3</b>
Introduction to yield line theory of slabs – Application to square and rectangular slabs with simply supported or fixed boundary conditions subjected to uniformly distributed and central concentrated loads (by upper bound theorem). Concept of corner lever.			
<b>BUILDING FRAME</b>			<b>9+3</b>
Difference between multistory load bearing and framed structures – Elastic analysis using suitable substitute frames for gravity loadings – Approximate analysis of single and two bay frames upto 3 storeys for wind loads using portal and cantilever methods.			
<b>FLAT SLABS AND WALLS</b>			<b>9+3</b>
Design of Flat slabs using IS code – Direct design method – Detailing – Design of Reinforced concrete walls using IS code.			
<b>RETAINING WALLS</b>			<b>9+3</b>
Design of cantilever and counterfort retaining walls for level surface filled with / without uniform surcharge – Stability requirements – Description of inclined backfill.			
<b>WATER TANKS</b>			<b>9+3</b>
Classifications – Based on shapes, levels and functions – Principles of design – IS code provision – No tension basis – Design of underground rectangular tank – Design of overhead rectangular and circular tanks – Design of staging for rectangular tank – Descriptions of Intz type tank.			
			<b>Total Periods</b> <b>60</b>
<b>LIST OF EXPERIMENTS</b>			
1. Design and drawing of RCC cantilever and counter fort type retaining walls with reinforcement details 2. Design of solid slab and RCC Tee beam bridges for IRC loading and reinforcement details 3. Design and drafting of Intz type water tank, Detailing of circular and rectangular water tanks 4. Design of plate girder bridge – Twin Girder deck type Railway Bridge – Truss Girder bridges – Detailed Drawings including connections. 5. Design and detailing of T-BeamSlab 6. Design and detailing of Column and Footing.

IS456 - 2006 Code of practice for Plain and reinforced concrete code of practice			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			

<b>CO1</b>	Design RC slabs using yield line theory											
<b>CO2</b>	Design building frame using portal frame and cantilever methods											
<b>CO3</b>	Design flat slab and concrete walls using IS codes											
<b>CO4</b>	Design cantilever and counterfort retaining wall											
<b>CO5</b>	Classify water tank based on shapes, levels and functions											
<b>CO6</b>	Design underground and overhead water tank as per IS code

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Examine the quality of concrete materials as per relevant IS codes
<b>CO2</b>	Design the concrete mix by ACI and IS code methods
<b>CO3</b>	Determine the properties of concrete
<b>CO4</b>	Summarize special concretes and its specific applications
<b>CO5</b>	Inspect concrete samples for its quality control
<b>CO6</b>	Determine the Mechanical Properties of hardened concrete

<b>191CE68</b>	<b>Mini Project</b>						<b>L-T-P</b>	<b>C</b>
							<b>0-0-2</b>	<b>1</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>						<b>Sem:</b>	<b>VI</b>
<b>Prerequisites:</b>	Nil							
<b>Aim:</b>	To make the students to improve learn practically as they realize the value of practical training.							

**OBJECTIVES**

The students may be asked to work in groups with not more than two students in each group. Basic study through review of literature on the topic selected shall be completed. The scope of the project, necessary data, sources of such data etc. shall be identified. The group of students has to prepare a brief report on the work done during the semester and is to be submitted. The report should at least include Introduction, Aim and objective of the project, scope of the project, methodology, and review of literature and reference list. The group shall prepare and present a seminar based on this work.

**EVALUATION PROCEDURE**

1. Internal Marks: 20 marks (decided by conducting 3 reviews by the guide appointed by the Institution)
2. Evaluation of Project Report: 30 marks (Evaluated by the external examiner appointed the University). Every student belonging to the same group gets the same mark
3. Viva voce examination: 50 marks (evaluated by the internal examiner appointed by the HOD with the approval of HOI, external examiner appointed by the University and Guide of the course – with equal weightage.

	<b>Total Periods</b>	30
--	----------------------	----

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Apply the knowledge of core subjects in civil engineering projects.
<b>CO2</b>	Define the ethical and professional responsibilities as a Civil Engineer.
<b>CO3</b>	Infer the need for a continuous learning to be part with the constantly emerging field of civil engineering.
<b>CO4</b>	Formulate problems by collecting data, analyzing and designing a feasible and effective solution to the problem under all realistic constraints.
<b>CO5</b>	Explain the professional concepts while working as a team
<b>CO6</b>	Measure the ability to do project as an individual as well as a team.

<b>191HS67</b>	<b>Career English</b>					<b>L-T-P</b>	<b>C</b>					
						<b>0-0-2</b>	<b>-</b>					
<b>Programme:</b>	<b>B.E. Civil Engineering</b>					<b>Sem:</b>	<b>III</b>					
<b>Prerequisites:</b>	191HS51					<b>Category:</b>	<b>MC</b>					
<b>Aim:</b>	To practice English for Enhancing Employability skills											
<b>UNIT I</b>												
Verbal analogy, verbal reasoning, error spotting, sentence completion												
<b>UNIT II</b>												
Why is GD part of selection process? – Structure of GD – Moderator – Strategies in GD – Team work – Body Language – Mock GD – Video samples												
<b>UNIT III</b>												
Kinds of interviews – Required Key Skills – Corporate culture – Mock interviews – Video samples												
1. Resume / Report Preparation												
2. Presentation Skills: Students make presentations on given topics. (8)												
3. Group Discussion: Students participate in group discussions. (6)												
4. Interview Skills: Students participate in Mock Interviews (8)												
<b>Course Outcomes:</b>												
At end of this course, the students will be able to												
<b>CO1</b>	Enlarge the student's aptitude and reasoning skills											
<b>CO2</b>	Deal with the barriers that affect communication in a professional set up.											
<b>CO3</b>	Understand various stages of communication and the role of audience and purpose.											
<b>CO4</b>	Practice English for Enhancing Employability skills											
<b>CO5</b>	Develop students job prospects through oral communication											
<b>CO6</b>	Enhance the performance of learners at placement interviews and group discussions and other recruitment procedures

<b>191CE71</b>	<b>CONSTRUCTION MANAGEMENT</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>VII</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To impart the students as a decision maker in the construction industry.		
<b>INTRODUCTION</b>			<b>9</b>
Construction Management - Importance – Scope of construction Management – Principles – Management Functions – Construction stages - Constructor Sequence- Types of firms – Government – Private – Public sector – Owner-Builder Operation - Planning for materials – Machines – Organization of Project Participants Traditional Designer- Turnkey Operation -Leadership and Motivation for the Project Team			
<b>PLANNING AND SCHEDULING</b>			<b>9</b>
Construction Planning: Need – Collection of field data – Scheduling- Defining Activities- WBS creation, Project planning: Precedence Relation -Forms of scheduling – Bar charts – Milestone charts – Network analysis – CPM and PERT – Numbering events – Time calculations – Floats – Critical path – Time estimates – Time cost optimization – Resource leveling.			
<b>EXECUTION OF WORKS</b>			<b>9</b>
Execution of work – Departmental execution – Contract system – Calling of tenders – Tender documents – Types of contracts – Contracting firms – Specifications, quality control – Legal implications – Penalties – Arbitration.			
<b>STORES AND ACCOUNTS</b>			<b>9</b>
Measurements of works – Recording – Checking – Types of bills – Modes of payment – Cash Book – Imprest account – Temporary advance – Revised estimate – Approval and sanction of estimates – Budget -Completion report – Classification of stores – Maintenance – Inspection – Transfers – Surplus and shortage. .			
<b>INDUSTRIAL MANAGEMENT</b>			<b>9</b>
Relationship between management and labour – Industrial psychology – Motivating – Merit rating – Incentive plans – Leadership – Importance – Styles – Communication – Types – Methods – Process – Time and motion studies.			
	<b>Total Periods</b>	<b>45</b>	
<b>Text books:</b>			
1. Sengupta (2002), Construction Management, Tata McGraw-Hill. 2. Construction Management and accounts (2002) by J.L. Sharma, Satya Publications			
<b>References:</b>

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the fundamental techniques in construction management.		
<b>CO2</b>	Outline the system of scheduling by using software.		
<b>CO3</b>	Build the system of labour management and safety measures.		
<b>CO4</b>	Explain the engineering economics system and network analysis.		
<b>CO5</b>	Classify the basic value of project management.		
<b>CO6</b>	Appraise the system of payments, accounts and accounting management.

<b>191CE72</b>	<b>ENGINEERING ECONOMICS, ESTIMATION AND COSTING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>VII</b>
<b>Prerequisites:</b>	Nil	<b>Category:</b>	PCC
<b>Aim:</b>	To know about the basics of economics and cost analysis related to engineering and estimate any building through the quantity surveying and valuation.		
<b>BASIC PRINCIPLES AND METHODOLOGY OF ECONOMICS</b>			<b>9</b>
Demand/Supply – elasticity – Government Policies and Application. Theory of the Firm and Market Structure. Basic Macro-economic Concepts (including GDP/GNP/NI/Disposable Income) and Identities for both closed and open economies. Aggregate demand and Supply (IS/LM). Price Indices (WPI/CPI), Interest rates, Direct and Indirect Taxes, Public Sector Economics –Welfare, Externalities, Labour Market. Components of Monetary and Financial System, Central Bank –Monetary Aggregates; Commercial Banks & their functions; Capital and Debt Markets. Monetary and Fiscal Policy Tools & their impact on the economy – Inflation and Phillips Curve			
<b>INDIAN ECONOMY</b>			<b>9</b>
Brief overview of post-independence period – plans. Post reform Growth, Structure of productive activity. Issues of Inclusion – Sectors, States/Regions, Groups of people (M/F), Urbanization. Employment–Informal, Organized, Unorganized, Public, Private. Challenges and Policy Debates in Monetary, Fiscal, Social, External sectors.			
<b>ANALYSIS OF RATES AND TENDERS</b>			<b>9</b>
Rate analysis & preparation of bills – Data analysis of rates for various items of works – abstract estimates for Building projects, contracts-types of contracts - tender preparation documents.			
<b>QUANTITY ESTIMATION FOR BUILDING</b>			<b>9</b>
Estimation of building – Procedure of estimating, Types of estimates, detailed estimate of buildings including sanitary & electrical fittings.			
<b>VALUATION</b>			<b>9</b>
Valuation- rent fixation, tenders, - contracts –accounting procedure, measurement book, stores, cost & quality control – PWD & CPWD practice – Software Applications for Estimation of Buildings.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. B.N.Datta (1998), Estimating and costing, Charator Publishing House			
<b>References:</b>			
1. Vazirani (1997), Estimating and costing, Khanna Publishers 2. Mankiw Gregory N. (2002), Principles of Economics, Thompson Asia 3. V. Mote, S. Paul, G. Gupta(2004), Managerial Economics, Tata McGraw-Hill 4. Misra, S.K. and Puri (2009), Indian Economy, Himalaya.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Spell different concepts of economics and financial system		
<b>CO2</b>	Explain the methodology of economics and their function		
<b>CO3</b>	Interpret the basic concepts of Indian economic issues		
<b>CO4</b>	Analyze the item rates and preparation of building estimation		
<b>CO5</b>	Estimate the quantity of buildings		
<b>CO6</b>	Explain the concepts of quality control and utilizing estimation software

<b>Aim:</b>	To impart the students as a decision maker in the construction industry.		
<b>STRAIN GAUGES</b>			
Mechanical strain gauge – optical strain gauge – electrical resistance strain gauge - description and operation – inductance and capacitance strain gauges-strain rosettes – measurement of static and dynamic strain – effect of transverse strains –use of strain recorders and load cells –calibration of testing machines.			9+ 3
<b>THEORY OF PHOTO ELASTICITY</b>			
Theory of Photo Elasticity- Basic concepts ,stress optic law-Isoclinics and Iso chromatics and Materials fringe value- Crack propagation study using fringes- Components of photo elastic bench-Dark field and white field arrangements of photo elastic bench- Stress Freezing Technique-Hologram Technique.			9+ 3
<b>NDT METHODS</b>			
Load testing towers - brittle coating method - Moire fringe method- Ultra sonic pulse velocity technique - Rebound hammer method - X-ray method - Gamma ray method - corrosion measurements - linear polarization resistance - rapid chloride ion penetration test-open circuit potential measurements – Electrical impedance spectroscopy.			9+ 3
<b>MODEL ANALYSIS</b>			
structural similitude – use of models – structural and dimensional analysis – Buckingham pi theorem–MullerBreslau’s principle for direct and indirect analysis–use of Begg’s deformeter– moment indicators – design of models for direct and indirect analysis.			9+ 3
<b>INSTRUMENTATION</b>			
LVDT(linear variable differential transducer) –transducers for velocity and acceleration measurement-vibrationmeter–seismographs–vibrationanalyser–displayandrecordingsignals– cathode ray oscilloscope – XY plotter - chart plotter – digital acquisition systems.			9+ 3
		<b>Total Periods</b>	60
<b>Lab Experiment</b>			
1. Rebound Hammer Test 2. Ultrasonic Pulse Velocity Test 3. Determination of Impact resistance of Concrete 4. To study on Linear Variable Differential Transformer (LVDT) and use it in a simple experimental set up to measure a small displacement. 5. To measure the stress & strain using strain gauges mounted on steel beam.

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Illustrate the working principles and uses of different types of strain Gauges		

<b>CO2</b>	Show the behavior of photo elastic techniques applied to the Structures
<b>CO3</b>	Demonstrate different NDT methods.
<b>CO4</b>	Examine the structure by non – destructive testing methods and model analysis.
<b>CO5</b>	Apply the principle of model analysis to the prototype.
<b>CO6</b>	Explain the working of Begg's deformeter.

<b>191CE79</b>	<b>PROJECT-I</b>				<b>L-T-P</b>	<b>C</b>
					<b>0-0-4</b>	<b>2</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>				<b>Sem:</b>	<b>VII</b>
<b>Prerequisites:</b>	Nil					
<b>Aim:</b>	To make the students to improve the design principles in any of the civil engineering discipline.					

### **OBJECTIVES**

The objective of this course is to impart and improve the design capability of the student. This course conceives purely a design problem in any one of the disciplines of Civil Engineering; e.g., Design of an RC structure, Design of a waste water treatment plant, Design of a foundation system, Design of traffic intersection etc. The design problem can be allotted to either an individual student or a group of students comprising of not more than four. At the end of the course the group should submit a complete report on the design problem consisting of the data given, the design calculations, specifications if any and complete set of drawings which follow the design.

### **EVALUATION PROCEDURE**

The method of evaluation will be as follows:

1. Internal Marks: 20 marks (Decided by conducting 3 reviews by the guide appointed by the Institution)
2. Evaluation of Project Report: 30 marks (Evaluated by the external examiner appointed by the University). Every student belonging to the same group gets the same mark
3. Viva voce examination: 50 marks (Evaluated by the internal examiner appointed by the HOD with the approval of HOI, external examiner appointed by the University and Guide of the course – with equal Weightage)

	<b>Total Periods</b>	<b>60</b>
--	----------------------	-----------

### **Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Apply the knowledge of core subjects in civil engineering projects.
<b>CO2</b>	Compare the ethical and professional responsibilities as a Civil Engineer.
<b>CO3</b>	Understand the need for a continuous learning to be part with the constantly emerging field of civil engineering.
<b>CO4</b>	Extend the knowledge in collecting data, analyzing and designing a feasible and effective solution to the problem under all realistic constraints.
<b>CO5</b>	Apply the professional concepts while working as a team in finding a solution to real life Civil engineering problem.
<b>CO6</b>	Prove to work in a project as an individual as well as a team.

<b>191CE89</b>	<b>PROJECT II</b>				<b>L-T-P</b>	<b>C</b>
					<b>0-0-12</b>	<b>6</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Sem:</b>	<b>VIII</b>	<b>Category:</b>	<b>PROJ-CE</b>	
<b>Prerequisites:</b>	Nil					
<b>Aim:</b>	To make the students to conceive knowledge in various civil engineering streams through experiments and computer applications.					

### **OBJECTIVES**

The objective of the project work is to enable the students to work in convenient groups of not more than four members in a group on a project involving theoretical and experimental studies related to Civil Engineering. Every Project Work shall have a Guide who is a member of the faculty of Civil Engineering of the college where the student is registered. The hours allotted for this course shall be utilized by the students to receive directions from the Guide, on library reading, laboratory work, computer analysis or field work and also to present in periodical seminars the progress made in the project. Each student shall finally produce a comprehensive report covering background information, literature Survey, problem statement, Project work details and conclusions. This experience of project work shall help the student in expanding his / her knowledge base and provide opportunity to utilize the creative ability and inference capability.

### **EVALUATION PROCEDURE**

1. Internal Marks: 30 marks (decided by conducting 3 reviews by the guide appointed by the Institution)
2. Evaluation of Project Report: 30 marks (Evaluated by the external examiner appointed the University). Every student belonging to the same group gets the same mark
3. Viva voce examination: 40 marks (evaluated by the internal examiner appointed by the HOD with the approval of HOI, external examiner appointed by the University and Guide of the course – with equal weightage.

**Total Periods** | 180

<b>191CEEA</b>	<b>BASICS OF DYNAMICS AND ASEISMIC DESIGN</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b> PEC	
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To study dynamic and seismic forces due to earthquake and corresponding design of structures		
<b>THEORY OF VIBRATIONS</b>		<b>9</b>	
Concept of inertia and damping – Types of Damping – Difference between static forces and dynamic excitation – Degrees of freedom – SDOF idealization – Equations of motion of SDOF system for mass as well as base excitation – Free vibration of SDOF system – Response to harmonic excitation – Impulse and response to unit impulse – Duhamel integral.			
<b>MULTIPLE DEGREE OF FREEDOM SYSTEM</b>			<b>9</b>
Two degree of freedom system – Normal modes of vibration – Natural frequencies – Mode shapes - Introduction to MDOF systems – Decoupling of equations of motion – Concept of mode superposition (No derivations).			
<b>ELEMENTS OF SEISMOLOGY</b>			<b>9</b>
Causes of Earthquake – Geological faults – Tectonic plate theory – Elastic rebound – Epicenter – Hypocenter – Primary, shear and Raleigh waves – Seismogram – Magnitude and intensity of earthquakes – Magnitude and Intensity scales – Spectral Acceleration - Information on some disastrous earthquakes.			
<b>RESPONSE OF STRUCTURES TO EARTHQUAKE</b>			<b>9</b>
Effect of earthquake on different type of structures – Behaviour of Reinforced Cement Concrete, Steel and Prestressed Concrete Structure under earthquake loading – Pinching effect – Bauschinger Effects – Evaluation of earthquake forces as per IS:1893 – 2002 - Response Spectra – Lessons learnt from past earthquakes.			
<b>DESIGN METHODOLOGY</b>			<b>9</b>
Causes of damage – Planning considerations / Architectural concepts as per IS:4326 – 1993- Guidelines for Earthquake resistant design – Earthquake resistant design for masonry and Reinforced Cement Concrete buildings – Later load analysis – Design and detailing as per IS:13920 – 1993.			
			<b>Total Periods 45</b>
<b>Text books:</b>

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Classify static and dynamic problems		
<b>CO2</b>	Determine Natural frequencies, Mode shapes for Two and multi degree of freedom system		
<b>CO3</b>	Describe the causes of earthquake and tectonic plate theory.		
<b>CO4</b>	Examine the response of structures to earthquake		
<b>CO5</b>	Analyze the effect of earthquake on different type of structures.		
<b>CO6</b>	Design the structures as per IS codes by making use of base isolation techniques

<b>191CEEB</b>	<b>CONCEPT OF FINITE ELEMENT METHODS</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To develop an advanced understanding of the behavior, analysis and design of bridge Structures.		
<b>FUNDAMENTAL CONCEPTS</b>			<b>9</b>
Concept of an element - various element shapes - one, two and three dimensional elements - finite element procedure - stresses and equilibrium - boundary conditions - strain displacement relations - stress strain relations - Potential energy and equilibrium – Weighted residual and weak formulations – Variational approach – Rayleigh Ritz method.			
<b>DIRECT STIFFNESS METHOD</b>			<b>9</b>
Steps in direct method of FEA – element stiffness matrix – global stiffness matrix – boundary conditions – simple problems on beams and trusses.			
<b>ELEMENT SHAPES, NODAL UNKNOWNS AND COORDINATE</b>			<b>9</b>
Discretization - basic element shapes - element properties – node numbering procedure – convergence requirements – generalized co-ordinates – natural co-ordinates – shape functions for linear & quadratic models – stiffness matrix – nodal load vector – static condensation – simple problems.			
<b>TWO DIMENSIONAL PROBLEMS</b>			<b>9</b>
Introduction – finite element modelling – constant strain triangle – isoparametric representation – potential energy approach - element stiffness – force terms – stress calculations – introduction to beam element.			
<b>ISOPARAMETRIC ELEMENTS AND NUMERICAL INTEGRATION</b>			<b>9</b>
Introduction – higher order elements and its applications - concept of sub, iso and super parametric elements – shape functions - Gaussian quadrature – examples in one and two dimensional elements			
			<b>Total Periods 45</b>
<b>Text books:</b>

<b>191CEEE</b>	<b>FAST TRACK CONSTRUCTION TECHNIQUES</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To make the students to aware of advanced project management and digitization in construction		
<b>ADVANCED PROJECT MANAGEMENT</b>			<b>9</b>
Scheduling – Reduction in schedule - Resource management – Resource levelling techniques – Earned value management – integrated project planning and monitoring – Execution strategies (Traditional, phased, concurrent and fast track)- Procurement management –Fast tracking Vs Project crashing- Implications of Fast tracking			
<b>TEMPORARY STRUCTURES FOR CONSTRUCTION</b>			<b>9</b>
Formwork design – process automation –Selection of materials – Selection of systems			
<b>CONSTRUCTION METHODS AND EQUIPMENT</b>			<b>9</b>
Choice of technology – Selection of construction methods – Linear construction –prefabrication and pre-caging – precast construction – Modular construction			
<b>CONTRACT MANAGEMENT</b>			<b>9</b>
Types of contracts –Contractual provisions - Delay management –Risk management – Risk identification – Risk assessment –Risk Mitigation-Risk cost estimation			
<b>DIGITALIZATION CONSTRUCTION</b>			<b>9</b>
Resource tracking –Barcode –RFID; 3D printing –BIM (Building Information Modelling) –Robotics – Drones – Lidar.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1.Construction Project management—Planning, Scheduling and controlling—K. K. Chitkara—Eight reprint 2004, Tata McGraw Hill Publishing Company Limited.			
<b>References:</b>			
1.Scheduling Construction Projects—Principles and practices—Sandra Weber—Indian edition published in 2012—Pearson Publication.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Develop resource allocation concept and improve the fast track technique		
<b>CO2</b>	Model the fast-track formwork system		
<b>CO3</b>	Adapt modernized equipment for speed up the project		
<b>CO4</b>	Analyze the managerial risks in construction management		
<b>CO5</b>	Explain the advanced level tracking and monitoring system in construction.		
<b>CO6</b>	Apply BIM and its advantage in construction sector.

<b>191CEEF</b>	<b>GROUND IMPROVEMENT TECHNIQUES</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PE</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To gain knowledge about techniques to improve the strength of the soil to the building.		
<b>INTRODUCTION</b>			<b>9</b>
Role of ground improvement in foundation engineering - methods of ground improvement – Geotechnical problems in alluvial, laterite and black cotton soils -Selection of suitable ground improvement techniques based on soil condition.			
<b>DRAINAGE AND DEWATERING</b>			<b>9</b>
Drainage techniques - Well points - Vacuum and electroosmotic methods - Seepage analysis for two dimensional flow-fully and partially penetrating slots in homogenous deposits (Simple cases only).			
<b>IN-SITU TREATMENT OF COHESIONLESS AND COHESIVE SOILS</b>			<b>9</b>
In-situ densification of cohesionless and consolidation of cohesive soils -Dynamic compaction and consolidation – Vibrofloatation - Sand pile compaction - Preloading with sand drains and fabric drains – Stonecolumns – Lime piles - Installation techniques only - relative merits of various methods and their limitations.			
<b>EARTH REINFORCEMENT</b>			<b>9</b>
Concept of reinforcement - Types of reinforcement material - Applications of reinforced earth – use of Geotextiles for filtration, drainage and separation in road and other works.			
<b>GROUT TECHNIQUES</b>			<b>9</b>
Types of grouts - Grouting equipment and machinery - Injection methods - Grout monitoring – Stabilization with cement, lime and chemicals - Stabilization of expansive soils.			
	<b>Total Periods</b>	<b>45</b>	
<b>Text books:</b>			
1. Purushothama Raj, P. "Ground Improvement Techniques", Firewall Media,2005. 2. Moseley M.P., Ground Improvement Blockie Academic and Professional, Chapman and Hall, Glassgow, 2002.			
<b>References:</b>

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the concept of suitable foundation for suitable soil		
<b>CO2</b>	Identify proper drainage and dewatering facility for embankment		
<b>CO3</b>	Discover proper treatment process for different soil		
<b>CO4</b>	Decide proper reinforcement to the soil		
<b>CO5</b>	Apply the process of drainage and separation of road works		
<b>CO6</b>	Inspect proper grout material for soil stabilization of expansive soils

<b>191CEEG</b>	<b>HYDRAULIC STRUCTURES</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To impart knowledge of various structures for storage and distribution of water.		
<b>HYDROLOGY &amp; DESIGN FLOOD ESTIMATION</b>			<b>9</b>
Importance of hydrology – Hydrological cycle – Types of precipitation – Measurement of rainfall by rain gauges – Mean rainfall over a drainage basin – Various methods of computing runoff from its given rainfall – Design flood – Estimating design flood and flood flows.			
<b>DIVERSION AND IMPOUNDING STRUCTURES</b>			<b>9</b>
Weirs and Barrage – Types of impounding structures – Dams – Gravity dams – Earth dams and Arch dams – Spillways – Intake structures – Trash Racks – Energy dissipaters.			
<b>HYDRAULIC STRUCTURES FOR CANALS</b>			<b>9</b>
Classification of canals – Alignment of canals – Regime theories – Canal Headworks – Canal regulators – Canal drops – Cross drainage works – Canal falls and escapes – Lining and maintenance – Other methods.			
<b>GATES AND VALVES</b>			<b>9</b>
Lift gates – Necessity and types of Lift gates – Flow induced forces and vibration on vertical lift gates – Valves – Layout of Power Houses – Stilling basins and Drainage galleries.			
<b>WATER MANAGEMENT</b>			<b>9</b>
Modernization techniques – Rehabilitation – Command Area Development – Systems of rice intensification – Water delivery systems – Participatory Irrigation Management – Farmer's organization and turn over – Water users associations - Economic aspects.			
			<b>Total Periods 45</b>
<b>Text books:</b>			
1. Punmia, B.C., Pande. B.B Lal., "Irrigation and Water Power Engineering", Lakshmi Publications, New Delhi, 2001.			
<b>References:</b>

Sharma R.K, Sharma T.K., "Irrigation Engineering", S.Chand Publishers, New Delhi, 2001.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the design of canal and its maintenance		
<b>CO2</b>	Tell the types of canal, distributors, canal headworks, cross-drainage and canal regulator works		
<b>CO3</b>	Classify canals and Headworks		
<b>CO4</b>	Apply canal, dam and distributaries in civil engineering structures		
<b>CO5</b>	Formulate mix proportioning techniques for field applications		
<b>CO6</b>	Analyze characteristics and design of a concrete mix for field applications

<b>191CEEH</b>	<b>HYDROLOGY</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To impart knowledge on hydrological cycle, spatial and temporal measurement and analysis of rainfall and their applications including flood routing and ground water hydrology.		
<b>INTRODUCTION AND HYDRO METEOROLOGY</b>			<b>9</b>
Definition – Development of hydrology – hydrologic design – Hydrologic failures – Importance in Engineering – Hydrological budget. Weather and hydrology – General circulation Temperature humidity – Wind – Diurnal and monsonic wind systems.			
<b>PRECIPITATION AND RUNOFF</b>			<b>9</b>
Formation of precipitation – forms of precipitation – types of precipitation – Rainfall measurement – gauges – recorders – processing precipitation data – check for consistency – supply of missing data – Aerial mean mass curve technique – Intensity duration frequency curves.			
<b>ABSTRACTION, INFILTRATION AND EVAPORATION</b>			<b>9</b>
Process of evaporation, transpiration – Infiltration factors affecting evaporation – Measurement of evaporation and infiltration indices – Horton's equation.			
<b>HYDROGRAPH</b>			<b>9</b>
Runoff-Factors affecting runoff – measurement – streamgauging – stagedischarge relationship – Hydrograph components – Hydrograph separation – Unit hydrograph – Derivation of unit Hydrograph – S. Hydrograph – Synthetic hydrograph – Instantaneous Unit Hydrograph(IUH)			
<b>FLOOD ANALYSIS</b>			<b>9</b>
Empirical methods – statistical methods – flood routing – routing through reservoir routing – through channels – flood forecasting, water shed management.			
			<b>Total Periods 45</b>
<b>Text books:</b>			
1. Chow, V.T. Applied Hydrology, McGraw Hill Company			
<b>References:</b>

(1992), Applied Hydrology, Tata McGraw Hill Publishing Company.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the basic concepts of hydrology and integrate the physical hydrological processes.		
<b>CO2</b>	Explain the various process, measurement and estimation of hydrological components, evaporation, infiltration, stream flow etc.		
<b>CO3</b>	Develop runoff and hydrograph estimation and apply into engineering practices.		
<b>CO4</b>	Apply various statistical methods for hydrological analysis.		
<b>CO5</b>	Solve the flood route and channel route problems		
<b>CO6</b>	Construct the unit hydrograph for surface runoff

<b>191CEEI</b>		<b>INDUSTRIAL STRUCTURES</b>	<b>L-T-P</b>	<b>C</b>
			<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>		<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil			
<b>Aim:</b>	To impart a board knowledge in the area of planning and designing concept and functional requirements for industrial structures.			
<b>PLANNING</b>				<b>9</b>
Classification of Industries and Industrial structures – General requirements for industries – Planning and layout of buildings and components.				
<b>FUNCTIONAL REQUIREMENTS</b>				<b>9</b>
Lighting – Ventilation – Acoustics – Fire safety – Guidelines from factories act.				
<b>DESIGN OF STEEL STRUCTURES</b>				<b>9</b>
Industrial roofs – Crane girders – Mill buildings – Design of Bunkers and Silos.				
<b>DESIGN OF R.C. STRUCTURES</b>				<b>9</b>
Corbels, Brackets and Nibs - Silos and bunkers –Principles of folded plates and shell roofs.				
<b>PREFABRICATION</b>				<b>9</b>
Principles of prefabrication – Prestressed precast roof trusses - Functional requirements for Precast concrete units - Construction of roof and floor slabs - Wall panels.				
				<b>Total Periods 45</b>
<b>Text books:</b>				
1. Ramamrutham.S, Design of Reinforced Concrete Structures, DhanpatRai Publishing Company,2007. 2. Bhavikatti.S.S, Design of Steel Structures, J.K. International Publishing House Pvt. Ltd.,2009.				
<b>References:</b>				
1. Varghese.P.C., Limit State Design of Reinforced Concrete, PHI, Eastern Economy Editions, Second Edition, 2003. 2. Pasala Dayaratnam – Design of Steel Structure –2000.				
<b>Course Outcomes:</b>				
At end of this course, the students will be able to				
<b>CO1</b>	Summarize the concept of Industrial structures			
<b>CO2</b>	Explain the design and constructional aspects of Industrial structures.			
<b>CO3</b>	Infer the planning and functional requirements of Industrial structures			
<b>CO4</b>	Design Industrial roofs, Crane girders, Mill buildings, Bunkers and Silos			
<b>CO5</b>	Design Corbels, Brackets and Nibs.			
<b>CO6</b>	Analyze and design structural elements used in pre-cast construction including fabrication, erection and installation.

<b>191CEEJ</b>	<b>INDUSTRIAL WASTE TREATMENT AND DISPOSAL</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To provide the student to familiar with various industrial waste, treatment and disposal methods		
<b>INDUSTRIAL POLLUTION</b>			<b>9</b>
Types of industries and industrial pollution – Characteristics of industrial wastes – Population equivalent – Bioassay studies – effects of industrial effluents on streams, sewer, land, sewage treatment plants and human health – Hazardous Wastes – Environmental legislations related to prevention and control of industrial effluents and hazardous wastes – Pollution Control Boards.			
<b>WASTE MANAGEMENT APPROACH</b>			<b>9</b>
Waste management approach – Waste Audit – Volume and strength reduction – material and process modifications – Recycle, reuse and byproduct recovery – Applications.			
<b>LIQUID WASTE TREATMENT TECHNIQUES</b>			<b>9</b>
Equalization – Neutralization – removal of suspended and dissolved organic solids - Chemical oxidation – Removal of dissolved inorganics – Combined treatment of industrial and municipal wastes – Residue management.			
<b>INDUSTRIAL SOLID WASTE TREATMENT</b>			<b>9</b>
Physico-chemical treatment – solidification – incineration – Secured landfills – Legal Provisions.			
<b>CASE STUDIES OF INDUSTRIAL POLLUTION CONTROL</b>			<b>9</b>
Sources & their Characteristics, waste treatment flow sheets for selected industries such as textiles, tanneries, dairy, sugar, paper, distilleries, steel plants, refineries, fertilizer, thermal power plants.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. N.Rao & A.K.Dutta (1995), Wastewater Treatment, Oxford IBH Publication. 2. Nelson, L. Nemerow (2000), Liquid Waste of Industry, Theories, Practices and Treatment, Addison-Wesley Publishing Company, London.			
<b>References:</b>			
1. T.T. Shen, 1999, Industrial Pollution Prevention, Springerpublications. 2. R.L. Stephenson & J.B.Blackburn Jr. (1998), Industrial Wastewater Systems Handbook, Lewis Publishers, New York.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Label the wastewater generated from a specific industry and interpret the possible impacts on the environment.		
<b>CO2</b>	Identify the means and methods to reduce the quantity of generation of wastewater from industrial premises by performing source reduction techniques and waste audit.		
<b>CO3</b>	Design appropriate treatment systems for the wastewater generated from the industries		
<b>CO4</b>	Assess the possible recycling and reuse opportunities for the generated wastewater and residuals by employing suitable treatment units.		
<b>CO5</b>	Tell the feasibility and benefits of individual, common and joint treatment of industrial wastewater		
<b>CO6</b>	Make use of the provision for legal control of industrial pollution by legislations

<b>191CEEK</b>	<b>PRESTRESSED CONCRETE STRUCTURES</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To develop an advanced understanding of the behavior, analysis and design of Prestressed Concrete Structures.		
<b>INTRODUCTION – THEORY AND BEHAVIOUR</b>			<b>9</b>
Basic concepts – advantages – materials required – systems and methods of prestressing – analysis of sections – stress concept – strength concept – load balancing concept – effect of loading on the tensile stresses in tendons – effect of tendon profile on deflections – factors influencing deflections – calculation of deflections – short term and long term deflections - losses of prestress – estimation of crack width.			
<b>DESIGN CONCEPTS</b>			<b>9</b>
Flexural strength – simplified procedures- codal provision – strain compatibility method – basic concepts in selection of cross section for bending – stress distribution in end block - design of anchorage zone reinforcement – limit state design criteria – partial prestressing – applications.			
<b>CONTINUOUS BEAMS</b>			<b>9</b>
Analysis – incorporation of moment due to reactions- pressure line due to prestressing force – principle of linear transformation – concordant tendon profile – partially continuous beams – analysis for ultimate strength – moment redistribution.			
<b>CIRCULAR PRESTRESSING</b>			<b>99</b>
Introduction – General features of prestressed concrete tanks –Analysis and Design of prestressed concrete tanks – Design of cylindrical and non-cylindrical pipe.			
<b>PRESTRESSED COMPOSITE BEAMS</b>			<b>9</b>
Composite prestressed concrete beans – Design procedure – Calculation of stresses at important stages both for propped and unpropped constructions – Design of shear connectors – Shrinkage stresses.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Krishna Raju N., "Prestressed concrete", Tata McGraw Hill Company, New Delhi,2012. 2. Pandit.G.S. and Gupta.S.P., "Prestressed Concrete", CBS Publishers and Distributors Pvt. Ltd,2012.			
<b>References:</b>

<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the terminology related to pre-stressing.		
<b>CO2</b>	Analyze the sections using strength, stress load balancing concept and losses of prestressing.		
<b>CO3</b>	Design the flexural member and stress distribution in the end block.		
<b>CO4</b>	Design a prestress concrete pipes and tanks.		
<b>CO5</b>	Design the composite prestressed concrete beams.		
<b>CO6</b>	Determine the stress and estimate the deflection for propped and unpropped constructions.

<b>191CEEL</b>	<b>RAILWAY, AIRPORT AND HARBOUR ENGINEERING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To make the students aware of railways, airports and harbor design and planning.		
<b>RAILWAY COMPONENTS</b>			<b>9</b>
Comparison of railway and highway transport – Organization of Indian railways – Railway board – Zonal railways, different production units, undertakings, organizations, divisions – Railway terminology – Wheels – Rails – Sections – Length – Failures, wear on rails – Long welded rails – Rail joints – Creep – Effects – Remedies – Sleepers – Track fitting and fastenings – Ballast – Sub grade and Embankment – Track alignment – Surveys.			
<b>RAILWAY TRACK CONSTRUCTION</b>			<b>9</b>
Gradients – Speed, degree of curves, super elevation and cant deficiency – Negative super elevation – Curves – Points and crossings –Necessity – Turnouts – Switches – Types of switches crossing – Components, types – Sleeper at points and crossings.			
<b>RAILWAY OPERATION AND MAINTENANCE</b>			<b>9</b>
Stations and yards – Requirements, classification, layout of station – Platform – Loops, siding and level crossing – Loco sheds – Derailing switches, Fouling marks, Butter stop – Sand hump – Signaling – Object engineering principles – Classification and types – interlocking of signals and points.			
<b>AIRPORT</b>			<b>9</b>
Role of ICAO, FAA, DGCA and AAI – Aircraft characteristics – Airport site selection – Surveys – Drawings – Orientation of runway, wind rose diagram – ICAO classification of Airports – Runway geometrics – Corrections for length – Taxiway geometrics – Layout of airports, Apron, Hanger – Airport marking and Lightings – Air traffic control – ILS			
<b>HARBOUR</b>			<b>9</b>
Stations and yards – Requirements, classification, layout of station – Platform – Loops, siding and level crossing – Loco sheds – Derailing switches, Fouling marks, Butter stop – Sand hump – Signaling – Object engineering principles – Classification and types – interlocking of signals and points.			
			<b>Total Periods 45</b>
<b>Text books:</b>			
1. Rangwala S.C, Rangwala P.S, "Railway Engineering", Charotar Publishing House Pvt. Limited,2008. 2. Saxena Subhash C and Satyapal Arora, "A Course in Railway Engineering", Dhanpat Rai and Sons, Delhi,2006.			
<b>References:</b>			
1. Khanna S K, Arora M G and Jain S "Airport Planning and Design", Nemchand and Brothers, Roorkee, 2005. 2. J.S. Mundrey, "A course in Railway Track Engineering". Tata McGraw Hill,2000			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Interpret Zonal of railways and different production units		
<b>CO2</b>	Develop skills required for Track alignment in railway Surveys.		
<b>CO3</b>	Demonstrate the requirements and classification of stations and yards		
<b>CO4</b>	Plan and design the runways by using wind rose diagram		
<b>CO5</b>	Understand the Airport marking and Lightings		
<b>CO6</b>	Develop the skills required for planning, site selection and layout of harbours

<b>191CEEM</b>	<b>REMOTE SENSING AND GIS</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To introduce the students to the basic concepts and principles of various Components of remote sensing.		
<b>EMR AND ITS INTERACTION WITH ATMOSPHERE &amp; EARTH MATERIAL</b>			<b>9</b>
Definition of remote sensing and its components – Electromagnetic spectrum – wavelength regions important to remote sensing – Wave theory, Particle theory, Stefan-Boltzman and Wein's Displacement Law – Atmospheric scattering, absorption – Atmospheric windows – spectral signature concepts – typical spectral reflective characteristics of water, vegetation and soil.			
<b>PLATFORMS AND SENSORS</b>			<b>9</b>
Types of platforms – orbit types, Sun-synchronous and Geosynchronous – Passive and Active sensors – resolution concept – Pay load description of important Earth Resources and Meteorological satellites – Airborne and space borne TIR and microwave sensors.			
<b>IMAGE INTERPRETATION AND ANALYSIS</b>			<b>9</b>
Types of Data Products – types of image interpretation – basic elements of image interpretation - visual interpretation keys – Digital Image Processing – Pre-processing – image enhancement techniques – multispectral image classification – Supervised and unsupervised.			
<b>GEOGRAPHIC INFORMATION SYSTEM</b>			<b>9</b>
Introduction – Maps– Map projections – map analysis – GIS definition – basic components of GIS – standard GIS software's – Data type – Spatial and non-spatial (attribute) data – measurement scales – data models – various data inputs – digitization and scanning.			
<b>APPLICATION OF REMOTE SENSING AND GIS</b>			<b>9</b>
Data Base Management Systems (DBMS) –Remote sensing data –attribute data analysis-integrated data analysis-datacompression.Applications-Transport, Waterresources,LandinformationsystemandDisaster management.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Atkinson and <u>Nicholas Tate</u> , “Advances in Remote Sensing and GIS Analysis” Wiley India Pvt Ltd, (2012).			
<b>References:</b>			
1. <u>Anil K. Jamwal</u> , “Remote Sensing and GIS” JnanadaPrakashan ,2008. 2. Thomas.M.Lillesand Ralph.W.Kiefer, “Remote Sensing and Image Interpretation” John Wiley and Sons, Inc, 2003.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the knowledge of remote sensing and earth material		
<b>CO2</b>	Apply the knowledge of modern tools to access space details		
<b>CO3</b>	Evaluate the interpretation of data and digital image processing		
<b>CO4</b>	Execute the process of preparation of maps by GIS		
<b>CO5</b>	Analyze the data with measurement scale and validation of data		
<b>CO6</b>	Formulate the methods of data base management system in GIS

<b>191CEEN</b>	<b>REPAIR AND REHABILITATION OF STRUCTURES</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To make the students to assess the distressed building and find out the method of rehabilitation.		
<b>GENERAL ASPECTS</b>			<b>9</b>
Performance of construction materials and components in services for strength permeability, thermal properties and cracking effects due to climate, temperature, chemicals, wear and erosion, Design and construction errors, Effects of cover thickness.			
<b>MAINTENANCE AND DIAGNOSIS OF FAILURE</b>			<b>9</b>
Definitions :Maintenance, Repair and rehabilitation, Facets of Maintenance, Importance of Maintenance, Preventive measures based on various aspects of inspection- Assessment procedure for evaluating a damaged structure. Diagnosis of construction failures.			
<b>DAMAGES AND THEIR REMEDIES</b>			<b>9</b>
Corrosion damage of reinforced concrete, methods of corrosion protection, corrosion inhibitors, corrosion resistant steels, coatings, cathodic protection, rust eliminators. Causes of deterioration of concrete, steel, masonry and timber structures, surface deterioration, efflorescence, causes, prevention and protection.			
<b>REPAIRS, REHABILITATION AND RETROFITTING OF STRUCTURES</b>			<b>9</b>
Repairs to overcome low member strength – deflection, cracking, chemical disruption, weathering corrosion, wear, fire, leakage and marine exposure.			
<b>NON-DESTRUCTIVE TESTING</b>			<b>9</b>
Non-destructive testing: Ultrasonic and sonic tester – Flaw detectors – Rebound test – Hammer strength evaluation of existing structures.			
			<b>Total Periods 45</b>
<b>Text books:</b>			
1. Dr.B.Vidivelli, “Rehabilitation of Concrete Structures”, Standard Publishers Distributors, 2007.			
<b>References:</b>			
1. Guha, P.K, “Maintenance and Repairs of Buildings”, New Central Book Agency (P) Ltd, Calcutta,2011. 2. Macdonald, S, “Concrete - Building Pathology”, Blackwell Science Limited, Oxford,2008. 3. Shetty, M.S, “Concrete Technology – Theory and Practice”, S. Chand and Company Ltd, New Delhi,2012. 4. Chudley, R, “The Maintenance and Adaptation of Buildings”, Longman Group Ltd, New York,2002.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the causes of deterioration of concrete and steel structures.		
<b>CO2</b>	Evaluate the failures and to identify preventive measures in construction techniques.		
<b>CO3</b>	Examine the different methods of repairing concrete and steel structures.		
<b>CO4</b>	Demonstrate the different methods of strengthening existing structures.		
<b>CO5</b>	Apply the different non-destructive tests for assessment of deterioration of structures.		
<b>CO6</b>	Decide repair method of structures in marine exposure

<b>191CEEO</b>	<b>SMART MATERIALS AND STRUCTURES</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To give an insight into the latest developments regarding smart materials and their use in structures.		
<b>INTRODUCTION</b>			<b>9</b>
Introduction to Smart Materials and Structures – Instrumented structures functions and response – Sensing systems – Self-diagnosis – Signal processing consideration – Actuation systems and effectors.			
<b>MEASURING TECHNIQUES</b>			<b>9</b>
Strain Measuring Techniques using Electrical strain gauges, Types – Resistance – Capacitance – Inductance – Wheatstone bridges – Pressure transducers – Load cells – Temperature Compensation – Strain Rosettes.			
<b>SENSORS</b>			<b>9</b>
Sensing Technology–Types of Sensors – Physical Measurement using Piezo Electric Strain measurement – Inductively Read Transducers – The LVOT – Fiber optic Techniques. Chemical and Bio-Chemical sensing in structural Assessment – Absorptive chemical sensors – Spectroscopes – Fiber Optic Chemical Sensing Systems and Distributed measurement.			
<b>ACTUATORS</b>			<b>9</b>
Actuator Techniques – Actuator and actuator materials – Piezoelectric and Electrostrictive Material – Magneto structure Material – Shape Memory Alloys – Electro orheological Fluids– Electromagnetic actuation – Role of actuators and Actuator Materials.			
<b>SIGNAL PROCESSING AND CONTROL SYSTEMS</b>			<b>9</b>
Data Acquisition and Processing – Signal Processing and Control for Smart Structures – Sensors as Geometrical Processors – Signal Processing – Control System – Linear and Non- Linear.			
		<b>Total Periods</b>	<b>45</b>
<b>Text books:</b>	1. Brain Culshaw – Smart Structure and Materials Artech House – Borton.London-2006.		
<b>References:</b>	<ol style="list-style-type: none"> <li>1. Srinath L. S. – Experimental Stress Analysis – Tata McGraw-Hill,2005.</li> <li>2. Mel.M.Schwartz, Encyclopedia of Smart Materials, John Wiley and Sons Inc.,2002.</li> </ol>		
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain instrumented structures, their functions and response.		
<b>CO2</b>	Identify strain measuring techniques using electrical strain gauges.		
<b>CO3</b>	Construct Chemical and Bio-Chemical sensing in structural Assessment.		
<b>CO4</b>	Compare Piezoelectric and Electrostrictive Material.		
<b>CO5</b>	Construct Signal Processing and Control for Smart Structures.		
<b>CO6</b>	Make use of the sensors in smart materials for safety and quality in core.

<b>191CEEP</b>	<b>SOLID AND HAZARDOUS WASTE MANAGEMENT</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To provide principles of solid waste management and legislation.		
<b>FUNDAMENTALS OF WASTE MANAGEMENT</b>			<b>9</b>
Types and sources of solid waste, non-hazardous and hazardous waste-Present scenario and need for solid and hazard waste management- Legislations on management and handling of solid waste sand hazardous waste - Elements of integrated waste management and roles of stakeholders - Financing and Public Private Participation for waste management.			
<b>MUNICIPAL SOLID WASTE</b>			<b>9</b>
Waste generation rates and variation in MSW- waste sampling and characterization physical, chemical and biological properties of solid wastes- Source reduction of wastes- Recycling and Reuse-Handling storage and collection of MSW-Analysis of collection system-Optimization of collection routes-Need for transfer and transport – transfer station.			
<b>PROCESSING TECHNOLOGIES</b>			<b>9</b>
Waste processing – purposes of processing-Material separation and processing technologies-Biological conversion technologies-Chemical conversion technologies and-Thermal conversion technologies-Energy recovery from conversion products-Co- processing of solid waste.			
<b>NON-HAZARDOUS &amp; HAZARDOUS WASTES INDUSTRIAL SOLID WASTES</b>			<b>9</b>
Recycling and reuse of solid wastes-Handling and disposal methodologies of high volume non-hazardous solid wastes. Identification, classification of Hazardous waste-Source and characterization of hazardous waste – TCLP tests-Storage, labeling and handling of hazardous wastes-Hazardous waste manifests and transport-Waste minimization options-Hazardous waste technological options-Physical treatment methods and chemical treatment methods-Biological treatment methods.			
<b>DISPOSAL OF MUNICIPAL SOLID WASTE &amp; HAZARDOUS WASTE</b>			<b>9</b>
Disposal in landfills –Types-Site selection criteria's-Design and operation of landfill-Leachate and landfill gas management-Land fill closure and environmental monitoring-Land fill remediation. Hazardous waste landfills-Site selection Criteria-Design and Operation of Hazardous waste landfills-Remediation of H.W disposal sites.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. George Tchobanoglou et.al, “Integrated Solid Waste Management”, McGraw-Hill Publishers, 1993. 2. B.Bilitewski, G.HardHe, K.Marek, A.Weissbach, and H.Boeddicker, “Waste Management”, Springer, 1994.			
<b>References:</b>

Bhide A.D. and Sundaresan, B.B., “Solid Waste Management in Developing Countries”, INSDOC, 1993			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the functional elements of municipal solid waste management system		
<b>CO2</b>	Identify the concept of waste characterization and collection system		
<b>CO3</b>	Evaluate the various processing technologies for MSW		
<b>CO4</b>	Choose the treatment, storage, and disposal options for hazardous waste		
<b>CO5</b>	Identify various disposal methods of Hazardous waste		

**CO6** | Decide feasible remediation measures for the contaminated sites

**Mapping with Programme Outcomes:**

<b>191CEEQ</b>	<b>TRAFFIC ENGINEERING AND MANAGEMENT</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To impart the students familiar with the principles in managing the quality.		
<b>INTRODUCTION</b>			<b>9</b>
Significance and scope, Characteristics of Vehicles and Road Users, Skid Resistance and Braking Efficiency (Problems), Components of Traffic Engineering- Road, Traffic and Land Use Characteristics.			
<b>TRAFFIC SURVEYS AND ANALYSIS</b>			<b>9</b>
Surveys and Analysis – Volume, Capacity, Speed and Delays, Origin and Destination, Parking, Pedestrian Studies, Accident Studies and Safety Level of Services- Basic principles of Traffic Flow.			
<b>TRAFFIC CONTROL</b>			<b>9</b>
Traffic signs, Road markings, Design of Traffic signals and Signal co-ordination (Problems), Traffic control aids and Street furniture, Street Lighting, Computer applications in Signal design.			
<b>GEOMETRIC DESIGN OF INTERSECTIONS</b>			<b>9</b>
Conflicts at Intersections, Classification of ‘At Grade Intersections, - Channelized Intersections – Principles of Intersection Design, Elements of Intersection Design, Rotary design, Grade Separation and interchanges – Design principles.			
<b>TRAFFIC MANAGEMENT</b>			<b>9</b>
Traffic Management- Transportation System Management (TSM) – Travel Demand Management (TDM), Traffic Forecasting techniques, Restrictions on turning movements, One way Streets, Traffic Segregation, Traffic Calming, Tidal flow operations, Exclusive Bus Lanes, Introduction to Intelligent Transportation System (ITS).			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Subhash Saxena, “A Course in Traffic Engineering and Design”, DhanpatRai& Sons, 2010.			
<b>References:</b>

<b>191CEER</b>	<b>TRANSPORT PLANNING AND MANAGEMENT</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To provide knowledge on concepts of distribution and transport planning and Zoning.		
<b>TRANSPORT PLANNING PROCESS</b>			<b>9</b>
Scope – interdependence of land use and traffic – systems approach to transport planning – survey of existing conditions and forecasting future conditions. Transport survey – definition of study area – zoning survey – types and methods – inventory on transport facilities – inventory of land use and economic activities.			
<b>TRIP GENERATION</b>			<b>9</b>
Factors governing trip generation and attraction rates – multiple linear regression analysis – category analysis – critical appraisal of techniques.			
<b>DISTRIBUTION METHODS</b>			<b>9</b>
Uniform factor method, average factor methods – gravity model and its calibration – opportunity model.			
<b>TRIP ASSIGNMENT AND MODAL SPLIT</b>			<b>9</b>
Traffic assignment – general principles – assignment techniques – all nothing assignment – multiple root assignment – capacity – restraint assignment – diversion curves Modal split – advantages and limitations.			
<b>EVALUATION TECHNIQUES</b>			<b>9</b>
Economic evaluation techniques – performance evaluation – rating and ranking methods – case studies in evaluation – rating and ranking methods – case studies in evaluation of transport projects – land use transport models – transport planning for medium and small sized towns.			
			<b>Total Periods   45</b>
<b>Text books:</b>			
1. L.R. Kadiyali (2001), Traffic Engineering and Transport planning, Khanna Publishers, New Delhi			
<b>References:</b>			
1. Paul.H.Wright (1995), Transportation Engineering – Planning & Design, John Wiley & Sons, New York. 2. John W Dickey (1995), Metropolitan Transportation Planning, Tata McGraw-Hill publishing company Ltd, New Delhi.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the inventory of land use and economic activities		
<b>CO2</b>	Apply the multiple linear regression in Transport Planning Process		
<b>CO3</b>	Make use of Uniform factor method and average factor methods		
<b>CO4</b>	Assess the trip and modal split		
<b>CO5</b>	Identify the factors of economic evaluation techniques		
<b>CO6</b>	Develop skills required for transport planning for medium and small sized towns.		

**Mapping with Programme Outcomes:**

<b>191CEES</b>	<b>WATER RESOURCES SYSTEM PLANNING AND MANAGEMENT</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>PEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To make the students to have knowledge about water resources and its management.		
<b>GENERAL</b>			<b>9</b>
Water resources survey – Water resources of India and Tamilnadu – Description of water resources planning – Economics of water resources planning, physical and socio economic data – National Water Policy – Collection of meteorological and hydrological data for water resources development.			
<b>HYDROLOGIC CYCLE</b>			<b>9</b>
Components of Hydrological cycle -system representation–Historical development of hydrology –Weather system –cloud and cloud seeding -General atmospheric circulation –Types and forms of precipitation – measurement of rainfall –optimum rain gauge network design			
<b>WATER RESOURCE NEEDS</b>			<b>9</b>
Consumptive and non-consumptive water use - Estimation of water requirements for irrigation, for drinking and navigation - Water characteristics and quality – Scope and aims of master plan - Concept of basin as a unit for development - Water budget and development plan.			
<b>RESERVOIR PLANNING AND MANAGEMENT</b>			<b>9</b>
Reservoir - Single and multipurpose – Multi objective - Fixation of Storage capacity –Strategies for reservoir operation - Sedimentation of reservoirs - Design flood-levees and flood walls - Channel improvement.			
<b>ECONOMIC ANALYSIS</b>			<b>9</b>
Estimation of cost and Evaluation of Benefits - Discount rate - Discounting factors – Discounting techniques – Computer Applications.			
	<b>Total Periods</b>	<b>45</b>	
<b>Text books:</b>			
1. Linsley R.K. and Franzini J.B, “Water Resources Engineering”, McGraw-Hill Inc,2007. 2. Chaturvedi M.C., “Water Resources Systems Planning and Management”, Tata McGraw-Hill Inc., New Delhi,2008.			
<b>References:</b>

Loucks, Daniel P.; van Beek, Eelco; Stedinger, Jerry R.; Dijkman, Jozef P.M.; Villars, Monique T., “Water ResourcesSystemsPlanningandManagement:AnIntroductiontoMethods,ModelsandApplications” (Paris : UNESCO, 2005)			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Explain the general principles of systems analysis and apply to problems in Water Resources Engineering		
<b>CO2</b>	Make use of various methods of water resources economics to various problems in Water Resources Engineering		
<b>CO3</b>	Interpret surface and sub-surface water quality management		
<b>CO4</b>	Infer legal aspects of water and environment systems		
<b>CO5</b>	Assess water demands from towns, agriculture and industry including their quantification		
<b>CO6</b>	Develop and apply numerical model for various application along with better understanding aquifer characteristics

<b>191OE7A</b>	<b>AIR AND NOISE POLLUTION CONTROL</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>OEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	Promote societies in harmony with nature, while adapting to climate change		
<b>SOURCES AND EFFECTS OF AIR POLLUTION</b>			<b>9</b>
Classification of air pollutants – Particulates and gaseous pollutants – Sources of air pollution – Source inventory – Effects of air pollution on human beings, materials, vegetation, animals – global warming-ozone layer depletion, Sampling and Analysis – Basic Principles of Sampling – Source and ambient sampling – Analysis of pollutants – Principles.			
<b>TRANSPORT OF AIR POLLUTION</b>			<b>9</b>
Elements of atmosphere and dispersion of pollutants – Meteorological factors – Wind roses – Lapse rate - Atmospheric stability and turbulence – Plume rise – Dispersion of pollutions – Gaussian dispersion models – Applications.			
<b>CONTROL OF AIR POLLUTION</b>			<b>9</b>
Concepts of control – Principles and design of control measures – Particulates control by gravitational, centrifugal, filtration, scrubbing, electrostatic precipitation – Selection criteria for equipment, gaseous pollutant control by adsorption & absorption, condensation, combustion – Pollution control for specific major industries.			
<b>AIR QUALITY MANAGEMENT</b>			<b>9</b>
Airqualitystandards–Airqualitymonitoring–Airpollutioncontrolefforts–Zoning–Townplanning regulation of new industries – Legislation and enforcement – Environmental Impact Assessment –Methods.			
<b>NOISE POLLUTION &amp; CONTROL</b>			<b>9</b>
Sound and Noise: Sources of noise pollution – environmental and industrial noise; effects of noise pollution - fundamentals of sound generation - propagation, sound measurement - sound level meters – types, components, Noise prevention & control measures, environmental and industrial noise -noise control legislation.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Noel De Nevers (2000), Air Pollution Control Engineering, 2 <sup>nd</sup> Edition, McGraw Hill International Edition. 2. Singal, S.P. (2000), Noise Pollution and Control, First Edition, Narosa Publishing House, New Delhi.			
<b>References:</b>			
1. Rao C.S., (2006) Environmental Pollution Control Engineering, 2 <sup>nd</sup> edition, New Age International, Delhi. 2. W.L. Heumann (1997), Industrial Air Pollution Control Systems, McGraw Hill, New York. 3. Rao M.N., & Rao H V N. (1996), Air Pollution Control, Tata-McGraw Hill, New Delhi.			
<b>Course Outcomes:</b>			
At end of this course, the students will be able to			
<b>CO1</b>	Classify the sources of air pollutants and methods of controlling.		
<b>CO2</b>	Identify the sources of sampling and dispersion of pollutants.		
<b>CO3</b>	Apply principles and design of control measures.		
<b>CO4</b>	Identify the gaseous pollutant control by adsorption, absorption, condensation and combustion.		
<b>CO5</b>	Define the environmental impact assessment and air quality.		
<b>CO6</b>	Describe the sources and control method of noise pollution.

<b>191OE7B</b>	<b>ENERGY SCIENCE AND ENGINEERING</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>OEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To provide introduction to energy systems and renewable energy resources, alternative energy sources and their technology applications		
<b>INTRODUCTION TO ENERGY SCIENCE</b>			<b>9</b>
Scientific principles and historical interpretation to place energy use in the context of pressing societal, environmental and climate issues; Introduction to energy systems and resources; Introduction to Energy, sustainability & the environment.			
<b>ENERGY SOURCES</b>			<b>9</b>
Overview of energy systems, sources, transformations, efficiency, and storage. Fossil fuels (coal, oil, oil-bearing shale and sands, coal gasification) - past, present & future, Remedies & alternatives for fossil fuels - biomass, wind, solar, nuclear, wave, tidal and hydrogen; Sustainability and environmental trade-offs of different energy systems; possibilities for energy storage or regeneration (Ex. Pumped storage hydro power projects, superconductor-based energy storages, high efficiency batteries)			
<b>ENERGY &amp; ENVIRONMENT: ENERGY EFFICIENCY AND CONSERVATION:</b>			<b>9</b>
Introduction to clean energy technologies and its importance in sustainable development; Carbon footprint, energy consumption and sustainability; introduction to the economics of energy; How the economic system determines production and consumption; linkages between economic and environmental outcomes; How future energy use can be influenced by economic, environmental, trade, and research policy.			
<b>CIVIL ENGINEERING PROJECTS CONNECTED WITH THE ENERGY SOURCES:</b>			<b>9</b>
Coal mining technologies, Oil exploration offshore platforms, Underground and under-sea oil pipelines, solar chimney project, wave energy caissons, coastal installations for tidal power, wind mill towers; hydro power stations above-ground and underground along with associated dams, tunnels, penstocks, etc.; Nuclear reactor containment buildings and associated buildings, design and construction constraints and testing procedures for reactor containment buildings; Spent Nuclear fuel storage and disposal systems.			
<b>ENGINEERING FOR ENERGY CONSERVATION:</b>			<b>9</b>
Concept of Green Building and Green Architecture; Green building concepts (Green building encompasses everything from the choice of building materials to where a building is located, how it is designed and operated); <i>LEED ratings</i> ; Identification of energy related enterprises that represent the breath of the industry and prioritizing these as candidates; Embodied energy analysis and use as a tool for measuring sustainability. Energy Audit of Facilities and optimization of energy consumption.			
			<b>Total Periods</b> <b>45</b>

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Explain the concept of Energy science
<b>CO2</b>	Spell the basics of energy system and resources
<b>CO3</b>	Demonstrate the solar energy perspectives and design aspects.
<b>CO4</b>	Influence the importance of energy efficiency and conservation.
<b>CO5</b>	Tell the concepts of civil engineering projects connected with the energy sources
<b>CO6</b>	Explain various energy conservation techniques

<b>191OE7C</b>	<b>ENVIRONMENT AND ECOLOGY</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>OEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To impart the basic knowledge about Environment & Ecology.		
<b>FUNDAMENTALS OF ENVIRONMENT &amp; ECOLOGY</b>			<b>9</b>
Environment -Ecology and Ecosystem -Food chain -Food web -Trophic level -Energy flow -Introduction, types, characteristic features, structure and function -Forest -Grassland, Desert and Aquatic ecosystems - Effects of human activities on environment, Agriculture, Housing, Industry, Mining and Transportation activities.			
<b>NATURAL RESOURCES</b>			<b>9</b>
Water Resources -Mineral Resources -Soil, Material cycles - Carbon, Nitrogen and Sulphur Cycles -Energy - Different types of energy -Conventional and Non-Conventional sources -Hydro Electric, Fossil Fuel based, Nuclear, Solar, Biomass and Geothermal energy and Bio-gas.			
<b>ENVIRONMENTAL POLLUTION &amp; CURRENT ENVIRONMENTAL ISSUES OF IMPORTANCE</b>			<b>9</b>
Air Pollution, Water pollution, Land pollution, Noise pollution - Causes, effects and control measures Climate Change and Global warming effects -Acid Rain, Ozone Layer depletion, Photochemical Smog, Solid waste management and Waste water treatment.			
<b>ENVIRONMENT QUALITY STANDARDS</b>			<b>9</b>
Ambient air quality standards-Water quality parameters and standards -Turbidity, pH, Suspended solids, hardness, residual chlorine, sulphates, phosphates, iron and manganese, DO, BOD and COD.			
<b>ENVIRONMENT IMPACT ASSESSMENT</b>			<b>9</b>
Introduction to EIA-Screening, Scoping, Public Participation. EIA for infrastructure projects -Highways – Dams –Multi-storey Buildings –Water Supply and Drainage -Case studies.			
			<b>Total Periods 45</b>

<b>161OE7D</b>	<b>FUNDAMENTALS OF FIRE SAFETY</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. Civil Engineering</b>	<b>Category:</b>	<b>OEC</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To provide an in depth knowledge about the fundamentals of fire and explosion and their prevention techniques.		
<b>FUNDAMENTALS OF FIRE</b>			<b>9</b>
Combustion process & concepts, combustion in solids, liquid, gases- smoldering fires- Spontaneous combustion - rapid fire progress phenomena- Properties influencing fire hazard – properties of solid, liquid and gaseous fuels - classification of fires.			
<b>FIRE CONTROL</b>			<b>9</b>
Fire extinguishers – Location and operation of extinguishers - Extinguishing methods- extinguishing agents: water, foam, chemical powder, CO <sub>2</sub> , sand, steam, saw dust – Fire detectors – Fire tender - Automatic fire extinguishing system - Fixed firefighting installations - Risk analysis: risk assessment, consequence analysis, risk reduction – Fire drill – Emergency procedures.			
<b>PRODUCTS AND EFFECTS OF COMBUSTION</b>			<b>9</b>
Heat: Conduction, convection, radiation- effects of heat, flames and smoke – different fire gases and their effects – Smoke movement control and venting - Negative pressure wave – Fragmentation – case studies.			
<b>BUILDING FIRE SAFETY</b>			<b>9</b>
Objectives of fire safe building design, Fire load, fire resistant material and fire testing – concept of egress design - exits – width calculations – fire safety requirements for high rise buildings – Behavior of materials & structures in fire – Concrete and steel. Flame spread in high rise building – Statutory requirements.			
<b>FUNDAMENTALS OF EXPLOSION</b>			<b>9</b>
Introduction – Explosion fundamentals – Types – Physical, BLEVE, Chemical explosion – Vapour cloud explosion – Dust explosion – Explosion prevention – Explosion mitigation.			
			<b>Total Periods 45</b>
<b>Text books:</b>			
1. Dasa K, “Principles of Fire Safety Engineering: Understanding Fire and Fire Protection”, Prentice Hall India Learning Private Limited(2014). 2. Gupta, R.S., “Handbook of Fire Technology” Orient Longman, Bombay,2010.

<b>191BAE1</b>	<b>ENGINEERING ECONOMICS &amp; ACCOUNTING</b>				<b>L-T-P</b>	<b>C</b>		
					<b>3-0-0</b>	<b>3</b>		
<b>Programme:</b>	<b>B.E. / B.Tech</b>	Sem:	-	<b>Category:</b>	<b>OEC</b>			
<b>Prerequisites:</b>	Nil							
<b>Aim:</b>	To enable the students and provide an analytical idea about economics and accounting practices							
<b>INTRODUCTION TO ECONOMICS&amp;DEMAND</b>						9		
Managerial Economics - Relationship with other disciplines - Firms: Types, objectives and goals - Managerial decisions - Decision analysis. Demand - Types of demand - Determinants of demand - Demand function - Demand elasticity - Demand forecasting.								
<b>SUPPLY, PORDUCTION AND COST CONCEPTS</b>						9		
<b>Supply</b> - Determinants of supply - Supply function - Supply elasticity. <b>Production function</b> - Introduction - Production Process & Function - One Variable and Two Variable Inputs - Isoquants - Returns to scale. <b>Cost Concepts</b> - Cost function – Types of Cost - Determinants of cost - Short run and Long run cost curves - Cost Output Decision - Estimation of Cost.								
<b>PRICING AND CAPITAL BUDGETING</b>						9		
<b>Pricing</b> - Determinants of Price - Pricing under different objectives and different market structures - Price discrimination - Pricing methods in practice. <b>Capital Budgeting</b> - Investments - Risks and return evaluation of investment decision - Average rate of return - Payback Period - Net Present Value - Internal rate of return.								
<b>FINANCIAL ACCOUNTING</b>						9		
<b>Financial Accounting</b> - Trail Balance, Balance sheet and related concepts: Trading Account, Profit & Loss Statement and related concepts - Analysis & Interpretation of financial statements - Financial Ratio Analysis.								
<b>COST ACCOUNTING</b>						9		
<b>Cost Accounting</b> - Types of costing - traditional costing approach - activity based costing - full cost pricing - marginal cost pricing - going rate pricing - bid pricing - feasibility reports - technical, economic and financial feasibility.								
						<b>Total Periods</b> 45		
<b>Text books:</b>								
1. McGuigan, Moyer and Harris, "Managerial Economics; Applications, Strategy and Tactics", Cengage Learning, 13 <sup>th</sup> Edition,2013. 2. Prasanna Chandra. "Fundamentals of Financial Management", Tata McGraw Hill Publishing Ltd., 8 <sup>th</sup> Edition,2011.								
<b>References:</b>								
1. Paresh Shah, "Basic Financial Accounting for Management", Oxford University Press, New Delhi,2007. 2. Sasmitha Mishra, "Engineering Economics and costing", PHI Learning, 2 <sup>nd</sup> Edition,2010.								

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Explain the economic theories, cost concepts and major economic problems
<b>CO2</b>	Tell the concepts of Demand, Supply and its types.
<b>CO3</b>	Make use of the concept of theory of production
<b>CO4</b>	Determine the recent pricing methods in market and prepare internal rate of return, payback period, net present value for project selection
<b>CO5</b>	Interpret the accounting systems and analyze financial statements using ratio analysis.
<b>CO6</b>	Construct an analytical idea about financial feasibility.

**Mapping with Programme Outcomes:**

<b>191BAE2</b>	<b>ENTREPRENEURSHIP</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Sem:</b>	<b>-</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To develop and strengthen entrepreneurial quality and motivation in students and impart basic entrepreneurial skills and understandings to run a business efficiently and effectively.		
<b>ENTREPRENEURSHIP</b>			<b>9</b>
Entrepreneur – Types of Entrepreneurs – Difference between Entrepreneur and Intrapreneur Entrepreneurship in Economic Growth, Factors Affecting Entrepreneurial Growth. Entrepreneur Vs. Entrepreneurship, Entrepreneur Vs. Manager.			
<b>MOTIVATION</b>			<b>9</b>
Attributes and Characteristics of a successful Entrepreneur, Major Motives Influencing an Entrepreneur – Achievement Motivation Training, Self-Rating, Business Games, Thematic Apperception Test – Stress Management, Entrepreneurship Development Programs – Need, Objectives.-women Entrepreneurs.			
<b>BUSINESS PLAN PREPARATION</b>			<b>9</b>
Small Enterprises – Definition, Classification – Characteristics, Ownership Structures – Project Formulation – Steps involved in setting up a Business – identifying, selecting a Good Business opportunity, Market Survey and Research, Techno Economic Feasibility Assessment – Preparation of Preliminary Project Reports – Project Appraisal – Sources of Information – Classification of Needs and Agencies.			
<b>FINANCING AND ACCOUNTING</b>			<b>9</b>
Need – Sources of Finance, Term Loans, Capital Structure, Financial Institution, Management of working Capital, Costing, Break Even Analysis, Taxation – Income Tax, Excise Duty – Sales Tax.			
<b>SUPPORT TO ENTREPRENEURS</b>			<b>9</b>
Sickness in small Business – Concept, Magnitude, Causes and Consequences, Corrective Measures – Business Incubators – Government Policy for Small Scale Enterprises – Growth Strategies in small industry – Expansion, Diversification, Joint Venture, Merger and Sub Contracting.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			
1. Hisrich, "Entrepreneurship", Tata McGraw Hill, 9 <sup>th</sup> Edition, New Delhi, 2014 2. S. S. Khanka, "Entrepreneurial Development", S.Chand and Co. Ltd., New Delhi, (Revised Edition) 2013.			

<b>Course Outcomes:</b>	
At end of this course, the students will be able to	
<b>CO1</b>	Extend the knowledge about the ideologies of entrepreneur.
<b>CO2</b>	Demonstrate a solid fundamental knowledge of entrepreneur and their successful characteristics within the broad field of entrepreneurship.
<b>CO3</b>	Assess and to prepare the feasible business plan and project reports for initiating businesses.
<b>CO4</b>	Identify the ways to get financing for starting up the business and taxation issues.
<b>CO5</b>	Discover the ways of sickness in business and its turnout initiatives by the Government policies.
<b>CO6</b>	Develop and strengthen entrepreneurial quality and motivation in students and impart basic entrepreneurial skills

<b>191BAE3</b>	<b>ESSENTIALS OF MANAGEMENT</b>			<b>L-T-P</b>	<b>C</b>
				<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Sem:</b>	<b>-</b>	<b>Category:</b>	<b>OEC</b>
<b>Prerequisites:</b>	Nil				
<b>Aim:</b>	To study the evolution of Management, to study the functions and principles of management and to learn the application of the principles in an organization.				
<b>INTRODUCTION TO MANAGEMENT AND ORGANIZATIONS</b>					<b>9</b>
Definition of Management – Science or Art – Manager Vs Entrepreneur - types of managers - managerial roles and skills – Evolution of Management – Scientific, human relations, system and contingency approaches – Types of Business organization - Sole proprietorship, partnership, company- public and private sector enterprises - Organization culture and Environment – Current trends and issues in Management.					
<b>PLANNING</b>					<b>9</b>
Nature and purpose of planning – planning process – types of planning – objectives – setting objectives – policies – Planning premises – Strategic Management – Planning Tools and Techniques – Decision making steps and process.					
<b>ORGANISING</b>					<b>9</b>
Nature and purpose – Formal and informal organization – organization chart – organization structure – types – Line and staff authority – departmentalization – delegation of authority – centralization and decentralization – Job Design - Human Resource Management – HR Planning, Recruitment, selection, Training and Development, Performance Management, Career planning and management.					
<b>DIRECTING</b>					<b>9</b>
Foundations of individual and group behaviour – motivation – motivation theories – motivational techniques – job satisfaction – job enrichment – leadership – types and theories of leadership – communication – process of communication – barrier in communication – effective communication – communication and IT.					
<b>CONTROLLING</b>					<b>9</b>
System and process of controlling – budgetary and non-budgetary control techniques – use of computers and IT in Management control – Productivity problems and management – control and performance – direct and preventive control – reporting.					
					<b>Total Periods</b> <b>45</b>
<b>Text books:</b>					
1. Harold Koontz, Heinz Weihrich and Mark V Cannice, “Management - A global & Entrepreneurial Perspective”, Tata McGraw Hill, 12 <sup>th</sup> Edition,2014. 2. James A.F. Stoner, R. Edward Freeman, Daniel R. Gilbert Jr., “Management”, Prentice-Hall of India, 6 <sup>th</sup> Edition,2012.

<b>191BAE4</b>	<b>INTELLECTUAL PROPERTY RIGHTS</b>			<b>L-T-P</b>	<b>C</b>
				<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Sem:</b>	<b>-</b>	<b>Category:</b>	<b>OEC</b>
<b>Prerequisites:</b>	Nil				
<b>Aim:</b>	To provide an idea about IPR, registration and its enforcement				
<b>INTRODUCTION</b>					9
Introduction to IPRs, Basic concepts and need for Intellectual Property - Patents, Copyrights, Geographical Indications, IPR in India and Abroad – Genesis and Development – the way from WTO to WIPO –TRIPS, Nature of Intellectual Property, Industrial Property, technological Research, Inventions and Innovations – Important examples of IPR.					
<b>REGISTRATION OF IPRs</b>					9
Meaning and practical aspects of registration of Copy Rights, Trademarks, Patents, Geographical Indications, Trade Secrets and Industrial Design registration in India and Abroad.					
<b>AGREEMENTS AND LEGISLATIONS</b>					9
International Treaties and Conventions on IPRs, TRIPS Agreement, PCT Agreement, Patent Act of India, Patent Amendment Act, Design Act, Trademark Act, Geographical Indication Act.					
<b>DIGITAL PRODUCTS AND LAW</b>					9
Digital Innovations and Developments as Knowledge Assets – IP Laws, Cyber Law and Digital Content Protection – Unfair Competition – Meaning and Relationship between Unfair Competition and IP Laws – Case Studies.					
<b>ENFORCEMENT OF IPRs</b>					9
Infringement of IPRs, Enforcement Measures, Emerging issues – Case Studies.					
					<b>Total Periods</b> 45
<b>Text books:</b>					
1. S.V. Satarkar, 'Intellectual Property Rights and Copy Rights', ESS Publications, New Delhi,2002. 2. Vinod V. Sople, 'Managing Intellectual Property', PHI Learning Pvt. Ltd, 4 <sup>th</sup> Edition,2014.					
<b>References:</b>					
1. Deborah E. Bouchoux, 'Intellectual Property: The Law of Trademarks, Copyrights, Patents and Trade Secrets', Cengage Learning, Third Edition,2012. 2. Prabuddha Ganguli, 'Intellectual Property Rights: Unleashing the Knowledge Economy', McGraw Hill Education, 2011. 3. Derek Bosworth and Elizabeth Webster, 'The Management of Intellectual Property', Edward Elgar Publishing Ltd.,2013.					

<b>Course Outcomes:</b>
At end of this course, the students will be able to
<b>CO1</b> List Intellectual property rights in professional society.
<b>CO2</b> Model the process that shapes the registration of various categories of Intellectual Property Rights.
<b>CO3</b> Relate familiarity with agreements, and legislations of act relating to IPR.
<b>CO4</b> Identify digital products and respective legislations.
<b>CO5</b> Utilize the ability of individuals to recognize and enforcing the legislations.

<b>CO6</b>	Infer an idea about IPR, registration and its enforcement.

<b>191BAE5</b>	<b>PROFESSIONAL ETHICS IN ENGINEERING</b>				<b>L-T-P</b>	<b>C</b>
					<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	Sem:	-	<b>Category:</b>	<b>OEC</b>	
<b>Prerequisites:</b>	Nil					
<b>Aim:</b>	To enable the students to create an awareness on Engineering Ethics and Human Values					
<b>HUMAN VALUES</b>						9
Morals, values and Ethics – Integrity – Work ethic – Service learning – Civic virtue – Respect for others – Living peacefully – Caring – Sharing – Honesty – Courage – Valuing time – Cooperation – Commitment – Empathy – Self-confidence – Character – Spirituality – Introduction to Yoga and meditation for professional excellence and stress management.						
<b>ENGINEERING ETHICS</b>						9
Senses of Engineering Ethics – Variety of moral issues – Types of inquiry – Moral dilemmas – Moral Autonomy – Kohlberg’s theory – Gilligan’s theory – Consensus and Controversy – Models of professional roles – Theories about right action – Self-interest – Customs and Religion – Uses of Ethical Theories						
<b>ENGINEERING AS SOCIAL EXPERIMENTATION</b>						9
Engineering as Experimentation – Engineers as responsible Experimenters – Codes of Ethics – A Balanced Outlook on Law.						
<b>SAFETY, RESPONSIBILITIES AND RIGHTS</b>						9
Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk – Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) –Discrimination.						
<b>GLOBAL ISSUES</b>						9
Multinational Corporations – Environmental Ethics – Computer Ethics – Weapons Development – Engineers as Managers – Consulting Engineers – Engineers as Expert Witnesses and Advisors – Moral Leadership – Code of Conduct – Corporate Social Responsibility.						
						<b>Total Periods</b> 45
<b>Text books:</b>						
1. Mike Martin and Roland Schinzinger, “Ethics in Engineering”, McGraw Hill, New York, 2012. 2. Charles EHarrisJr, Michael S. Pritchard, Ray W James, Elian E Englehardt, Michael J Rabins, “Engineering Ethics – Concepts and Cases”, 6 <sup>th</sup> Edition, Wadsworth Publishing, 2019.

David Erman & Michele Shauf, “Computers, Ethics and Society”, Oxford University Press, 2012.						

<b>Course Outcomes:</b>
At end of this course, the students will be able to
<b>CO1</b> Outline human values in professional society.

<b>CO2</b>	Identify the core values that shape the ethical behavior of an engineer.
<b>CO3</b>	Enhance familiarity with codes of conduct, and responsibilities of engineers in professional society to ensure balanced outlook
<b>CO4</b>	Identify ethical concerns and conflicts.
<b>CO5</b>	Extend the ability to recognize and resolve ethical dilemmas.
<b>CO6</b>	Plan moral and social ethics and loyalty and to appreciate the rights of others.

<b>191BAE6</b>	<b>WOMEN STUDIES AND WOMEN EMPOWERMENT</b>	<b>L-T-P</b>	<b>C</b>
		<b>3-0-0</b>	<b>3</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Sem:</b>	<b>-</b>
<b>Prerequisites:</b>	Nil		
<b>Aim:</b>	To study the legal provisions for women and women's access to justice and familiarize the students with the notion of gender and its operation in society.		
<b>WOMEN'S STUDIES: AN INTRODUCTION</b>			<b>9</b>
Women's Studies -Definition, Scope and Controversies. Basic concepts of Women's Studies- Women's Studies perspectives- Gender: Perspectives-Gender sensitive approach- Gender and sex- Biological determinism- stereotyping- Socialization- Patriarchy- Devaluation- Marginalization- Silencing- Male Gaze- Power politics- Gynocriticism- Gender mainstreaming- Gender and work-Invisibility-Glass ceiling. Women's Studies in India.			
<b>LEGISLATION AND GENDER JUSTICE</b>			<b>9</b>
Women's rights as human rights, UN Conventions, Convention on the Elimination of all forms of Discrimination against Women (CEDAW), Millennium Development Goals (MDGs) - Women's Rights in the Indian Constitution, Fundamental Rights, Directive Principles- Protective legislation for women in the Indian constitution- Anti dowry, SITA, PNDT, and Prevention Sexual Harassment at Workplace (Visaka case), Domestic violence (Prevention) Act- Women's Rights to property, Uniform Civil Code, Property rights according to religious background Muslim, Christian.			
<b>FEMINIST THEORIES</b>			<b>9</b>
Early feminist thinkers- J.S Mill, Mary Wollstonecraft - Women's Movements before and during the world war.- Recent trends in feminist thinking- Masculinities, Eco-feminism, queer theory, transgender politics, Cyber feminism, Post-colonial - Different Schools of feminist through intheIndian context- National and regional feminist thoughts.			
<b>GENDER AND MASS MEDIA</b>			<b>9</b>
Definition of gender, difference between sex and gender- Feminist terminology, stereotyping, patriarchy, silencing, marginalization - Male Gaze, Feminist film criticism, thematic and semiotic analysis- Various forms of mass media. Print media, radio, visual, new media- internet, feminism and cyber space, texting, SMS and cell phone usage - Influence of media in society, patriarchy – inoperation, use of feminist methods for - critiquing media representation, practice sessions.			
<b>WOMEN AND SOCIETY IN INDIA</b>			<b>9</b>
Women's position from Vedic times to the present, women participation in India's independence movement - Social construction of gender and gender roles – Socialization - Women in family- Women in family- feminization of poverty, violence against women, empowerment measures - Women and environment- eco-feminist movements, women and globalization- women'slabour,discriminatory wages, changing working conditions and workplace related issues.			
			<b>Total Periods</b> <b>45</b>
<b>Text books:</b>			

1. Roberta Rosenberg, "Women's Studies: An Interdisciplinary Anthology", Peter Lang,2001.
2. Jean Fox O'Barr, "Feminism in Action: Building Institutions and Community through Women's Studies", University of North Carolina Press,1994.

**References:**

1. Jill Duerr Berrick, "Faces of Poverty: Portraits of Women and Children on Welfare", Oxford University Press,1997.

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1</b>	Explain the laws related to women's, rights protection.
<b>CO2</b>	Show stereotypical representation of women in the media and equip them to critique them.
<b>CO3</b>	Identify specific cultural contexts of women in India.
<b>CO4</b>	Infer the legal provisions for women and women's access to justice.
<b>CO5</b>	Identify the notion of gender and its operation in society.
<b>CO6</b>	Identify workplace related issues and discriminatory wages.

<b>191MC01</b>	<b>DESIGN THINKING</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>0</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Category:</b>	<b>MC</b>
<b>Aim:</b>	To impart knowledge on design thinking process for understanding complex designs and to provide design skills to analyze design thinking issues and apply the tools and techniques of design.		
<b>OVERVIEW OF DESIGN THINKING PROCESS</b>			6
Introduction to design thinking: Definition, Origin of design thinking, Importance of design thinking, Design vs Design thinking, Problem solving, Understanding design thinking and its process model, Design thinking tools. Human-Centered Design (HCD) process - Empathize, Define, Ideate, Prototype and Test and Iterate or Empathize, Analyze, Solve and Test.			
<b>EMPATHIZE</b>			6
Design thinking phases, How to empathize, Role of empathy in design thinking, purpose of empathy maps, Things to be done prior to empathy mapping, creation of user personas, customer journey mapping, How might we questions.			
<b>SOLVE / IDEATE</b>			6
Silent brainstorming, metaphors for ideation, CREATE and What-If tool for ideation, introduction to TRIZ, Inventive principles and their applications			
<b>ANALYZE / DEFINE</b>			6
Root cause analysis, conflict of interest, perspective analysis, big picture thinking through system operator, big picture thinking through function modeling.			
<b>TEST (PROTOTYPING AND VALIDATION)</b>			6
Prototyping, Assumptions during the design thinking process, Validation in the market, best practices of presentation.			
			<b>Total Periods</b> 30

**Course Outcomes:**

At end of this course, the students will be able to

<b>CO1.</b>	Demonstrate knowledge of design thinking process
<b>CO2.</b>	Recall design thinking techniques to design relevant products/services
<b>CO3.</b>	Apply human centered design (HCD) methodology for product or service design.
<b>CO4.</b>	Develop techniques for innovative products or services
<b>CO5.</b>	Analyse the causes for the problems in the design of products or services
<b>CO6.</b>	Organize the steps to gain practical knowledge of prototyping, testing and validation.

<b>191MC02</b>	<b>ESSENCE OF INDIAN TRADITIONAL KNOWLEDGE</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>0</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Category:</b>	<b>MC</b>
<b>Aim:</b>	To facilitate the students with the concepts of Indian traditional knowledge and to make them understand the Importance of roots of knowledge system.		
<b>INTRODUCTION TO TRADITIONAL KNOWLEDGE</b>			<b>6</b>
Define traditional knowledge, nature and characteristics, scope and importance, kinds of traditional knowledge, the physical and social contexts in which traditional knowledge develop, the historical impact of social change on traditional knowledge systems. Indigenous Knowledge (IK), characteristics, traditional knowledge vis-à-vis indigenous knowledge, traditional knowledge Vs western knowledge traditional knowledge vis-à-vis formal knowledge			
<b>PROTECTION OF TRADITIONAL KNOWLEDGE</b>			<b>6</b>
The need for protecting traditional knowledge Significance of TK Protection, value of TK in global economy, Role of Government to harness TK.			
<b>LEGAL FRAME WORK AND TRADITIONAL KNOWLEDGE</b>			<b>6</b>
The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, Plant varieties Protection and Farmer's Rights Act, 2001 (PPVFR Act);The Biological Diversity Act 2002 and Rules 2004, the protection of traditional knowledge bill, 2016. Geographical indicators act 2003.			
<b>TRADITIONAL KNOWLEDGE AND INTELLECTUAL PROPERTY</b>			<b>6</b>
Systems of traditional knowledge protection, Legal concepts for the protection of traditional knowledge, Certain non IPR mechanisms of traditional knowledge protection, Patents and traditional knowledge, Strategies to increase protection of traditional knowledge, global legal FORA for increasing protection of Indian Traditional Knowledge.			
<b>TRADITIONAL KNOWLEDGE IN DIFFERENT SECTORS</b>			<b>6</b>
Traditional knowledge and engineering, Traditional medicine system, TK and biotechnology, TK in agriculture, Traditional societies depend on it for their food and healthcare needs, Importance of conservation and sustainable development of environment, Management of biodiversity, Food security of the country and protection of TK.

<b>191MC03</b>	<b>INDIAN CONSTITUTION</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>0</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Category:</b>	<b>MC</b>
<b>Aim:</b>	To understand the importance of Indian constitution, Administration, Concept and Development of Human Rights, election commission.		
<b>INTRODUCTION TO INDIAN CONSTITUTION</b>			6
Constitution - meaning of the term, Indian Constitution- Sources and constitutional history, Features- Citizenship, Preamble, Fundamental Rights and Duties, Directive Principles of State Policy.			
<b>UNION GOVERNMENT AND STATE GOVERNMENT</b>			6
<b>Union Government and its Administration</b> Structure of the Indian Union: Federalism, Centre- State relationship, President: Role, power and position, PM and Council of ministers, Cabinet and Central Secretariat, Lok Sabha, Rajya Sabha, The Supreme Court and High Court: Powers and Functions			
<b>State Government and its Administration</b>			
Governor: Role and Position, CM and Council of ministers, State Secretariat: Organization, Structure and Functions			
<b>LOCAL ADMINISTRATION AND PACHAYAT RAJ</b>			6
<b>Local Administration</b> District's Administration head: Role and Importance, Municipalities: Introduction, Mayor and role of Elected Representative, CEO of Municipal Corporation,			
<b>Panchayat raj:</b> Introduction, PRI: Zila Panchayat, Elected officials and their roles, CEO Zila Panchayat: Position and role, Block level: Organizational Hierarchy (Different departments), Village level: Role of Elected and Appointed officials, Importance of grass root democracy.			
<b>CONCEPT AND DEVELOPMENT OF HUMAN RIGHTS</b>			6
Meaning Scope and Development of Human Rights, United Nations and Human Rights – UNHCR, UDHR 1948, ICCPR 1996 and ICESCR 1966, Human Rights in India: Protection of Human Rights Act, 1993 - (NHRC and SHRC), First, Second and Third Generation Human Rights, Judicial Activism and Human Rights.			
<b>ELECTION COMMISSION</b>			6
Election Commission- Role and Functioning, Chief Election Commissioner and Election Commissioners, State Election Commission: Role and Functioning, Institute and Bodies for the welfare of SC/ST/OBC and women

<b>191MC04</b>	<b>UNIVERSAL HUMAN VALUES</b>	<b>L-T-P</b>	<b>C</b>
		<b>2-0-0</b>	<b>0</b>
<b>Programme:</b>	<b>B.E. / B.Tech</b>	<b>Category:</b>	<b>MC</b>
<b>Aim:</b>	To facilitate the competence to understand the harmony in nature/existence and participation of human being in the nature/existence.		
<b>INTRODUCTION</b>			6
The basic human aspirations and their fulfillment through Right understanding and Resolution; All-encompassing Resolution for a Human Being, its details and solution of problems in the light of Resolution.			
<b>UNDERSTANDING HUMAN BEING AND ITS EXPANSION</b>			6
The domain of right understanding starts from understanding the human being (the knower, the experience and the doer); and extends up to understanding nature/existence – its interconnectedness and co-existence; and finally understanding the role of human being in existence (human conduct).			
<b>ACTIVITIES OF THE SELF</b>			6
Understanding the human being comprehensively is the first step and the core theme of this course; human being as co-existence of the self and the body; the activities and potentialities of the self; Reasons for harmony/contradiction in the self.			
<b>UNDERSTANDING CO-EXISTENCE WITH OTHER ORDERS</b>			6
The need and the process of inner evolution (through self-exploration, self-awareness and self-evaluation)-particularly awakening to activities of the Self: Realization, Understanding and Contemplation in the Self (Realization of Co-Existence, Understanding of Harmony in Nature and Contemplation of Participation of Human in this harmony/ order leading to comprehensive knowledge about the existence			
<b>EXPANSION OF HARMONY FROM SELF TO ENTIRE EXISTENCE</b>			6
Understanding different aspects of All-encompassing Resolution (understanding, wisdom, science etc.), Holistic way of living for Human Being with All-encompassing Resolution covering all four dimensions of human endeavour viz., realization, thought, behavior and work (participation in the larger order) leading to harmony at all levels from self to Nature and entire Existence.
